System Outline

- Compact outdoor unit
- 8 rooms multi
- Broad lineup of indoor units

Flexible multi system contains high-level functions in a compact body to comfortably control 8 rooms. An indoor unit connection capacity from 11.2 kW to 18.2 kW is possible, and indoor units with a capacity of 2.0 kW to 7.0 kW can be selected and combined to meet the application. Installation is easy and saves space, so we can recommend this system for a wide range of applications including community housing, single-unit residences, and stores.

Indoor units 8 types, 28 models

Compact Outdoor Unit

About 14kW class multi split model

New model

Height difference **▲ 29%**

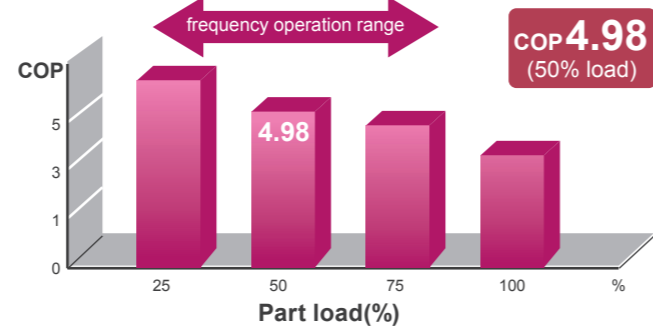

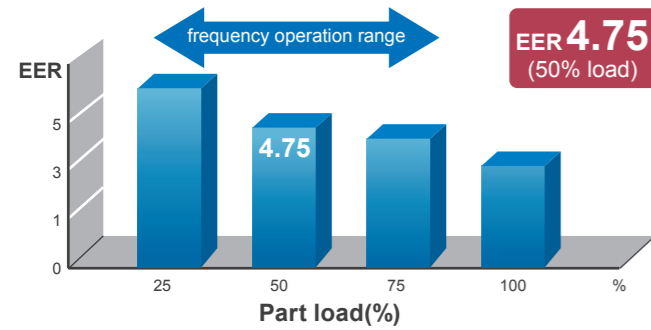

Compact and lightweight outdoor unit is easy to carry in. It can be installed in various obscure places.

High seasonal efficiency

The actual performance is conducted under various outside temperatures depending on weather and seasons, furthermore, especially for multi system, not all the rooms are operated all the time. So over 90% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity. Considering these, we focused on energy-saving performance which is based on actual use. Efficiency of part load performance was drastically improved by developing ALL DC and our own inverter system.

Innovated technology

High efficiency large fan :
New high efficiency fan is mounted.

DC fan motor :
High performance and high efficiency has been realized by using a small DC fan motor.

High efficiency DC twin rotary compressor :
A high performance, low noise, large capacity DC twin rotary compressor is used.

Heat exchanger :
Reduced compact size and energy saving has been realized by utilizing high density piping design and 3-Row heat exchanger.

More Comfort

Quick comfort by optimized refrigerant control

Every room meets set point most quickly and comfortably by optimized refrigerant control.

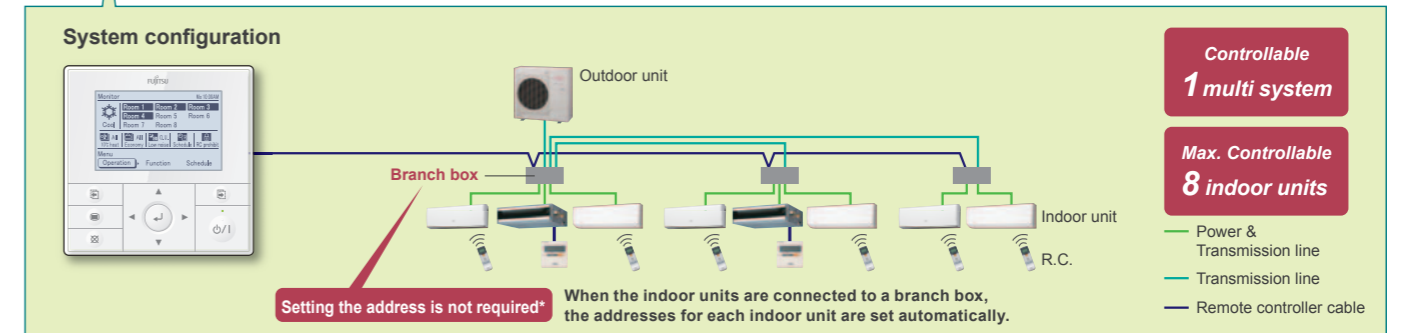

Convenient Control System

System overview

All indoor units are provided with wireless or wired remote controllers as standard equipment. Other options, such as individual and central remote controllers, are also available. The easy-to-operate central remote controller makes it simple to control the operation mode, temperature, airflow volume, timer, and other functions of each indoor unit from a single location.

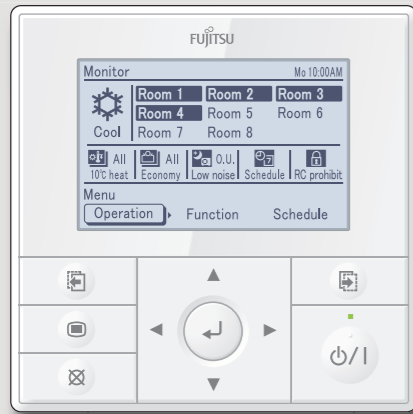

*Note : Cross-over connections are not allowed in the refrigerant system. Group settings are not allowed.

Central Remote Controller

Central remote controller was developed for residential applications. All indoor units can be batched controlled using simple operations. Schedule management and other functions can be used to achieve even greater energy savings.

UTY-DMMYM

Central & Individual Control

Batched control of up to 8 indoor units. The temperature, airflow volume, and remote control prohibition settings of all indoor units can be batched.

User-friendly operation

- Large backlight LED screen
- Large easy-to-see operation panel

Multiple language support

Corresponds to 9 different languages (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

Comfort control

10°C heat operation

When you leave, minimum heating operation is performed to maintain the room temperature (maintain at 10°C).

Low noise operation

Users can choose from 4 low noise levels, depending on the installation environment. The operation time can be set using the timer.

Convenience

Weekly schedule timer

The ON/OFF setting can be set for 4 times a day. Two weekly patterns can be set to match the cooling and heating seasons.

Economy operation

Economy operation is energy saving, as the set temperature of indoor unit is shifted by 1°C and the maximum electric value of the outdoor unit is suppressed.

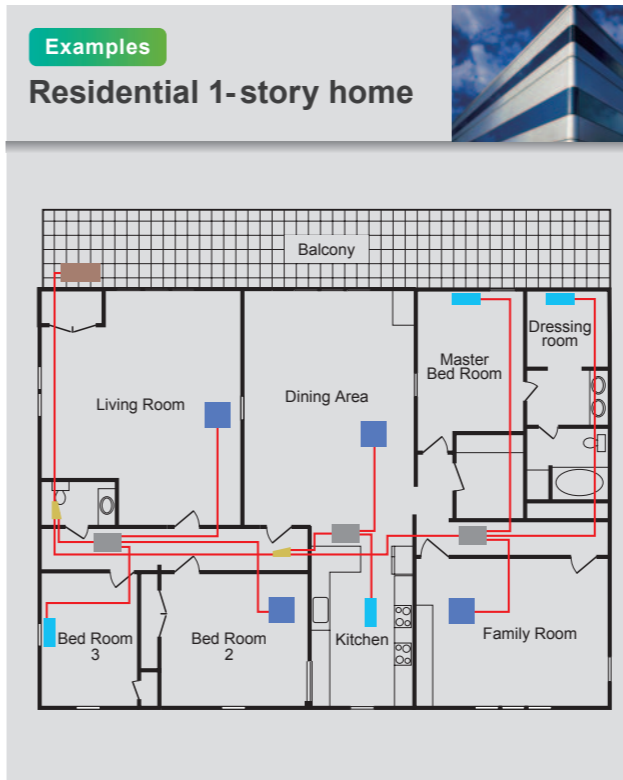

Prohibited Settings

The remote controller operation of all indoor units comes with a lock function to prevent unapproved operations in the various rooms. The central remote controller also has a key lock function to prevent children from playing with it, etc

Flexible Design

A variety of installation patterns can be supported using the branch box connection method.

- Outdoor unit
- 2.5 kW Indoor unit
- 2.0 kW Indoor unit
- Branch box

Large capacity connection

Up to 8 indoor units can be connected to one outdoor unit. A maximum of 130% indoor unit connectable capacity. Match any room layout

Connectable indoor unit capacity Ratio up to 130%

Connectable indoor unit number Up to 8

*At least 2 units must be connected. Minimum capacity connection from 80%

Long piping design

Can be installed in high rise condominium or commercial building

Total pipe length 115m max.

Easy Installation

All flare piping connection and simple installation that minimizes wiring mistakes.

Branch Box

Allowed Branch Box Mounting Direction

Hanging from the ceiling

Do not hang from the ceiling when performing a vertical installation.

Horizontal Wall Mounting

Install the unit with its top side facing upwards.

Vertical Wall Mounting

Install the unit with the control box facing upwards.

Common main pipe diameter

Common main pipe diameter improves piping workability.

Common
Liquid : \varnothing 9.52 mm
Gas : \varnothing 15.88 mm

Lightening of outdoor unit

Easier to carry and install.

Can be carried by 2 people

4-way piping connection

Four directions piping connection is possible. The perfect route can be selected according to the installation.

Wireless R.C.

Slim & Smart design

Slim & Smart design is realized by adopting high density multi path heat exchanger and big open panel for large intake airflow.

3 Mode timer *Only available with Wireless RC. (Weekly/Program/Sleep)

Weekly timer can be easily set by wireless remote controller. ON, OFF can be set up to 4 times in 1 day and up to 28 times in 1 week. For other modes, program timer and sleep timer can be also selected by one push.

Powerful operation

20 minutes continuous operation by maximum airflow and maximum compressor speed is possible. Rapid cooling and heating makes the room comfortable quickly.

Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM
Simple Remote Controller: UTY-RSNYM

AGYG12LVCA
AGYG14LVCA

Wireless R.C.

2-Fan & Wide airflow

Filter features

Long-life* ion deodorization filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.

Using different filters at both sides

Apple-catechin filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

Easy maintenance

Washable panel removable

Flexible piping connection 6 direction of drain & piping

Flexible & easy installation

Grille is an option

Easy maintenance

1 Maintenance of fan motor and fan

Maintenance of the fan motor and fan can be done easily after taking off the panel as the bell mouth of the fan can be removed easily.

A : Fan motor B : 2-stage turbo fan
C : Bell-mouth D : Panel

2 Long life filter

: standard equipment

3 Adaptation of transparent drainage parts

During installation, maintenance and operation, the drain pump and kit can be checked easily.

2-stage turbo fan

High efficiency design by 2 stage structure

Wind velocity

Fast

Slow

2-stage turbo fan

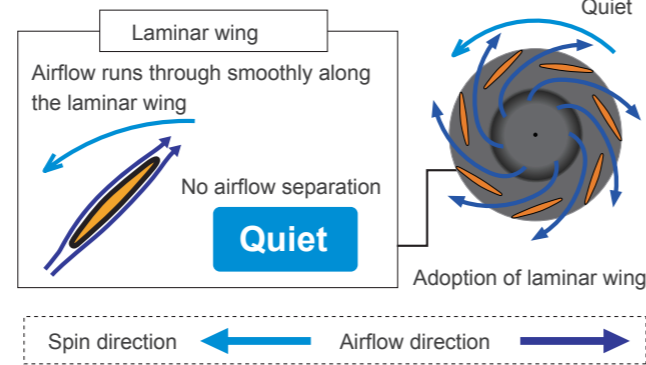

A evenly spread air distribution across the heat exchanger is possible due to the new 2 stage turbo fan which produces two separate airflow streams.

Heat exchange efficiency: **20%UP**

Quiet quality

Optimization of wing form (laminar wing type) and wing number (7 blades each)

Designed by CFD-analysis (fluid) simulations

Slim Duct

•Slim design with drain pump •Increase static pressure range •Dual concealed type

ARYG07LLTA
ARYG09LLTA
ARYG12LLTB
ARYG14LLTB
ARYG18LLTB

Slim design

This model is slim design, it can install at the place where a ceiling is narrow.

Air-intake

Air intake direction can be selected to match the installation site.

Selectable with a wide range of static pressure

By using DC fan motor, it is possible to change the static pressure range 0 to 90Pa.

The change of static pressure range is possible by remote controller.

High lift drain pump

Drain hose is standard accessory

Auto Louver Grille Kit (Option)

Simple flat Auto Louver will provide comfort airflow and harmonize with luxury interior.

Flexible installation

Optional parts

Wired Remote Controller

Max. controllable
16
Indoor units

Hi-grade individual control using various functions.

- 3.7-inch LCD backlight screen.
- Supporting various Energy Saving functions with simple operation.
- Multiple Language Support. (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

High performance and compact size

- In addition to the individual control, various energy saving controls can be realized using only one remote controller.

Various energy saving function

Auto OFF Timer

- The indoor unit automatically is turned off when it reaches the preset operating time frame.
- The time frame of the "Auto off timer" can be flexibly scheduled.
- Can be set off time 30 ~ 240 minutes

Weekly Timer function

- Can be set up to 8 times per day (On/Off, mode, Temp)
- 2 pattern settings (i.e. Summer/Winter setting) are available.

User friendly view and Easy operation

- Icon display of effectual functions.
- Main functions in large icons: "Mode", "Set Temp", and "Fan".
- Easy to operate by Control guide display.
- Simple operation with easy 4-way navigation pad.

Set Temperature Auto Return

- The setting temperature automatically returns to the previously set temperature.
- The time range in which the set temperature can be changed is 30 to 120 minutes.

Set Temperature Upper and Lower Limit Setting

- The set temperature range can be set for each operation mode. (Cooling / Heating / Auto)

Auto Louver Grille Kit

Simple flat Auto Louver will provide comfort airflow and harmonize with luxury interior.

UTD-GXSA-W
UTD-GXSB-W

Flexible Control

Operation with indoor unit

Auto Louver can be operated by synchronizing remote controller of indoor unit.

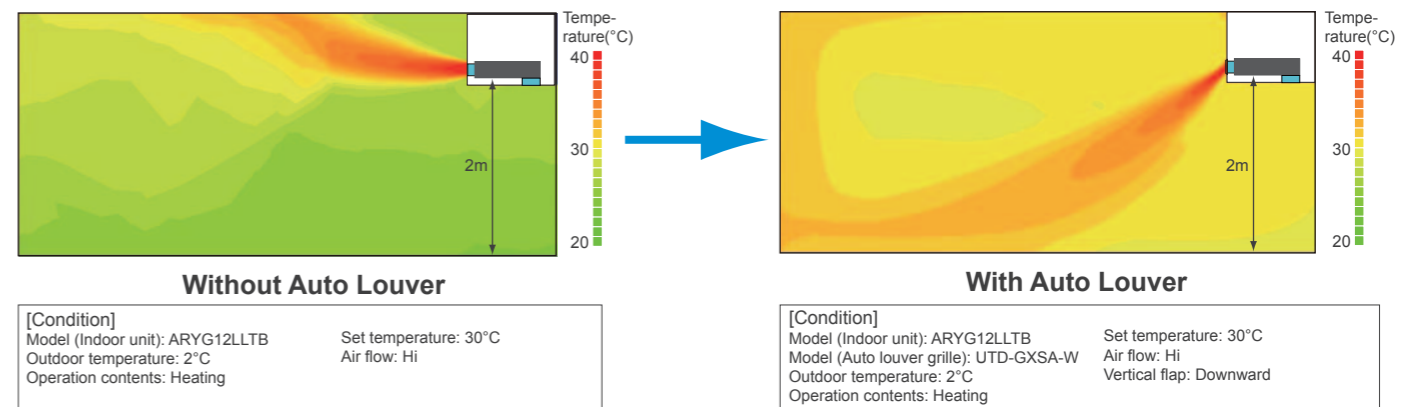

UP and Down auto swing

Auto airflow direction and auto swing 4 steps selectable

Auto-closing louver

When operation of indoor unit is stopped, the louver will automatically close.

Ideal warm airflow

Specifications

Model No.	UTY-RVNYM	
Power supply	DC 12V	
Dimension (H x W x D) (mm)	mm	120 x 120 x 21.3
Weight	g	220

* DC12V is supplied by indoor unit.

Specifications

Model No.	UTD-GXSA-W	UTD-GXSB-W
Applicable Indoor Unit	ARYG07/09LLTA ARYG12/14LLTB	ARYG18LLTB

Fixing of Auto Louver Grille	Screw fixing to Flange or Square Duct	
Extension Square Duct Limit	1.0m (Max. duct length between indoor unit and Grille)	
Net Dimension (H x W x D)	mm	180x683x(84+9)
Weight	Net	kg (lb.)
	Gross	kg (lb.)
Color	White	
Louver Motor	Stepping Motor	
Accessories	Fitting Flame, etc.	
Operation range	Cooling	°C
	Heating	°C
		% RH

Comfortable function

Up / down swing flaps
The up/down flaps automatically swing up and down.

Auto restart
In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.

Connectable fresh air duct

Double swing automatic
Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

Auto-changeover
The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.

Fresh air intake
Fresh air can be taken in by a fan which can be connected using external control unit.

Automatic air flow adjustment
The micro-computer automatically adjusts the air flow effectively to follow the changes of room temperature.

10°C HEAT operation
The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

Economy mode
Limits the maximum operation current, and performs operation with the power consumption suppressed.

Powerful mode
Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.

Convenient function

Sleep timer
The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

Program timer
This digital timer allows selection of one of four options: ON, OFF, ON → OFF or OFF → ON.

Weekly timer
Different on-off times can be set for each day.

Weekly + setback timer
Weekly + Setback timer can set temperature for two times spans and for each day of the week.

Filter sign
Indicates the filter cleaning period by lamp. To enable Filter sign, it has to be selected on the function setting.

Clean function

Long-life ion deodorization filter
The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

Apple-catechin filter
Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.
