## CORPORATE HISTORY

**1936:**  
Established as Yaou Shouten Ltd.

**1960:**  
Air conditioning business start. Japan-domestic business start.

**1971:**  
Air conditioner exports to Middle East.

**1977:**  
"Super Power, Super Quiet" series

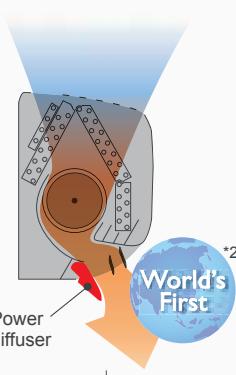

**1982:**  
Window type 3 Super series  
**AL/AX series**

**1985:**  
Large wall mounted and multi air conditioner introduced.

**1991:**  
Air conditioner with the world's first lambda heat exchanger

**1995:**  
Air conditioner with the world's first power diffuser

**2001:**  
VRF air conditioners

**AIRSTAGE™**

**2003:**  
Air conditioner with the world's first automatic self-cleaning filter system

**nocria™**

# Harmony between Global Environmental Protection and Company Activities

The Fujitsu General Group strives for business activities that achieve harmony between contributing to protecting the global environment and company activities while making environmental protection activities an important issue in company management. The Fujitsu General Group is working to improve its environmental friendliness by building an environmental management system (EMS); taking environmental protection measures throughout the product life cycle of materials procurement, product development and design, manufacturing, and recycling; and by taking the environment into consideration during business activities such as by saving energy and resources and reducing waste.

# High Efficiency

## Pursuit of Seasonal Efficiency

Over 90% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity. We focused on high seasonal efficiency by all DC inverter control and high efficiency technology.

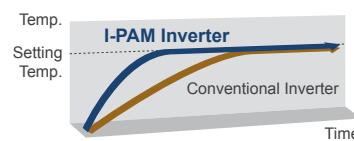

## Optimized Inverter Control

### I-PAM (IPM\*+PAM) Inverter control

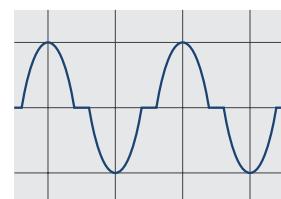

I-PAM inverter control is a technology which reduces loss by adjusting the current waveform to a better sine waveform. This promotes the effective use of the input power supply to attain high performance.

In addition, the voltage is raised at the start of operation and fast comfort is attainable by more powerful operation.

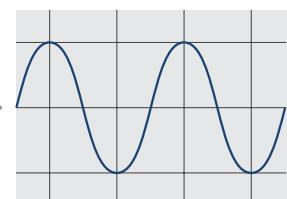

IPM\*: Intelligent Power Module

Conventional inverter control

I-PAM inverter control

### V-PAM (Vector+I-PAM) Inverter control

V-PAM inverter control reduces the effects of magnetic flux and increases the maximum speed and efficiency of the compressor by vector control technology. With this technology, further miniaturization, higher efficiency, and better performance are attained.

More compact than conventional models

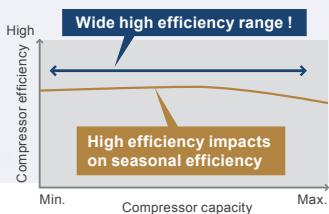

Vector I-PAM

It becomes more powerful with the newly developed high efficient compressor motor control.

# All DC Inverter Technology

## DC Twin Rotary Compressor

The high efficiency DC inverter type "2-cylinder rotary compressor" is used for our product ranges. It has achieved higher energy efficiency compared with similar compressors by optimizing the structure inside the compressor.

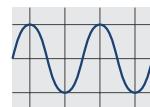

## DC Fan Motor

DC fan motor produces high power, wide operation range, and high efficiency.

## Sine-Wave DC inverter control

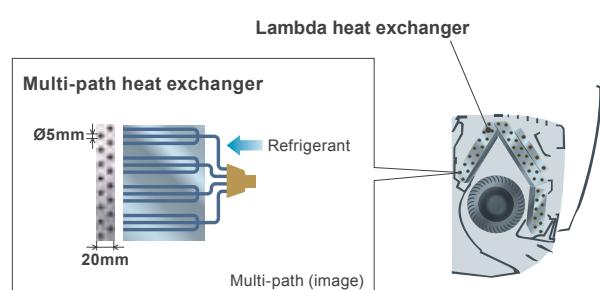

High efficiency operation is realized by using a sine wave DC inverter control.

# High Efficiency Heat Exchanger

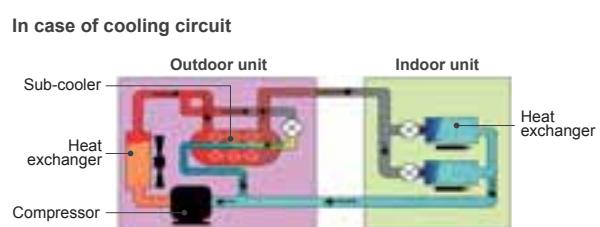

## High density multi-path heat exchanger

Heat exchange performance is substantially improved by thin and high-density heat exchanger and multi-path efficiency technology.

## High performance sub-cool heat exchanger

Higher performance achieved by mounting of counter type bypass circuit. (Large multi type, VRF)

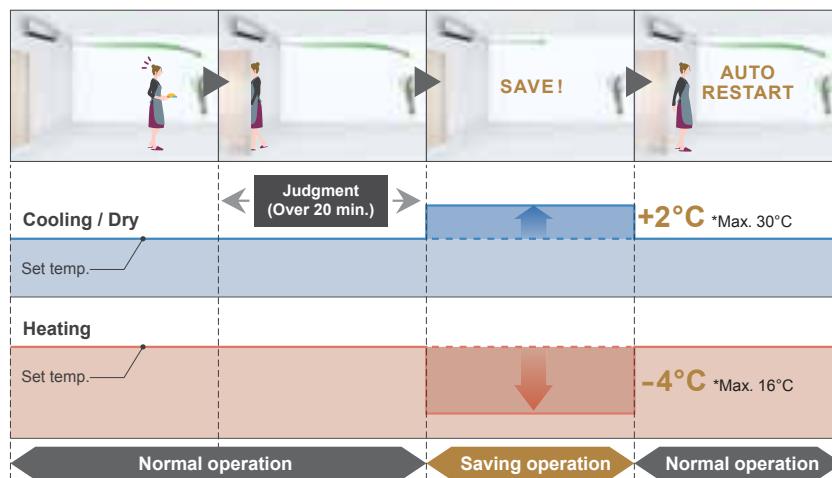

# Energy Saving Control

## Smart Operation

### Human sensor control

Human sensor catches movements of people in a room, and operates with lower capacity when people leave the room. When people come back to the room, it automatically returns to the previous operating mode.

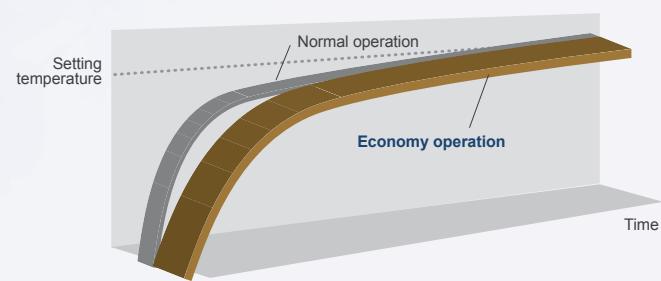

Human sensor coverage

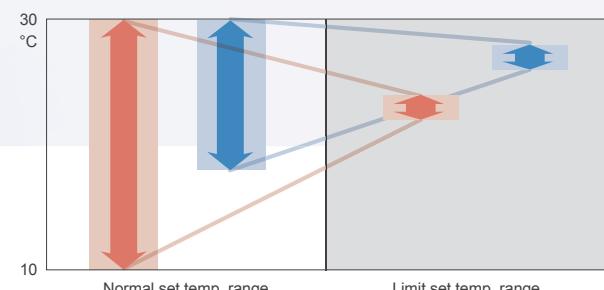

## Economy operation

Limits the maximum operation current, and the power consumption is cut down and the maximum load is suppressed.

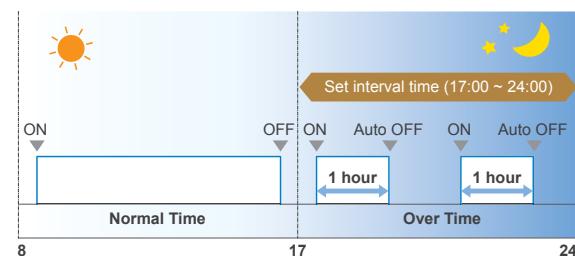

## Room temperature set point limitation

The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

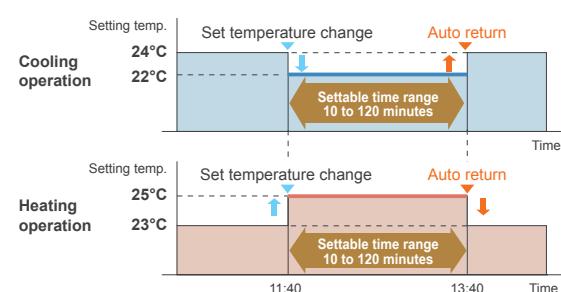

## Auto OFF timer

- The indoor unit automatically is turned off when it reaches to the preset operating time frame.
- The time frame of the "Auto off timer" can be flexibly scheduled.
- Off time can be set from 30 to 240 minutes.

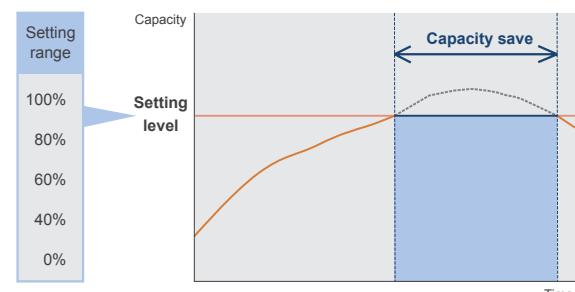

## Set Temperature Auto Return

- The setting temperature automatically returns to the previous setting temperature.
- The time range in which the set temperature can be changed is 10 to 120 minutes.

## Capacity save operation

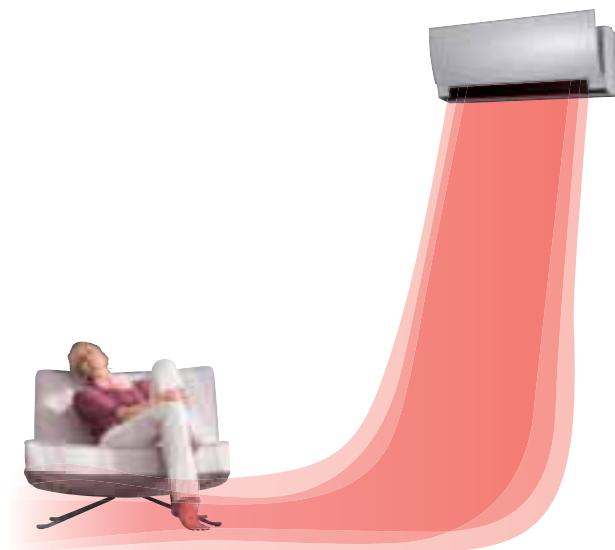

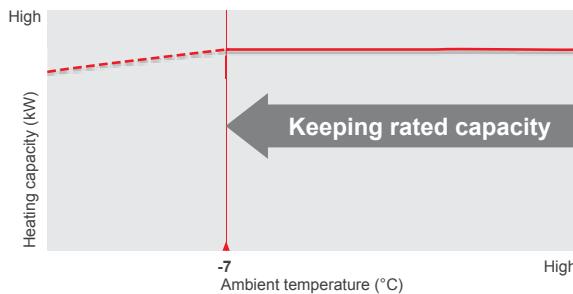

Operation capacity can be set in 5 steps for rated capability. The power consumption at peak is cut down and the maximum load is suppressed.

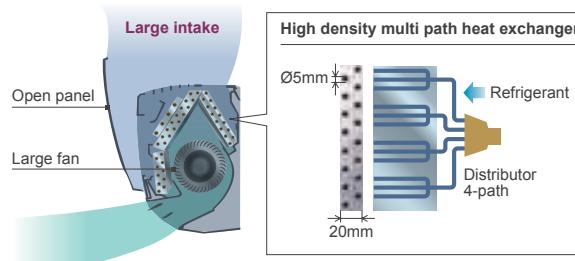

# Comfort Performance

## Powerful Heating

High heating capacity is realized even at low outdoor temperature by mounting a large heat exchanger or large DC rotary compressor and developing high performance inverter PCB

**Indoor unit :** Equipped with high density multi-path heat exchanger to increase the cooling and heating efficiency. The comfort is improved by adopting an open panel and large diameter long fan to take in large airflow volume and blow out a powerful airflow.

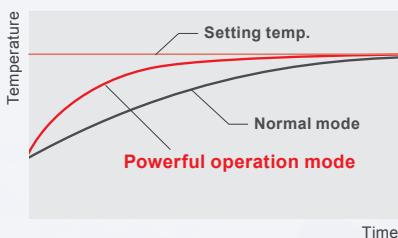

**Outdoor unit :** Adopts a large heat exchanger and DC twin rotary compressor\* to utilize the high capacity more effectively. The operating noise is also reduced using an efficient airflow structure design.

# Quick Comfort

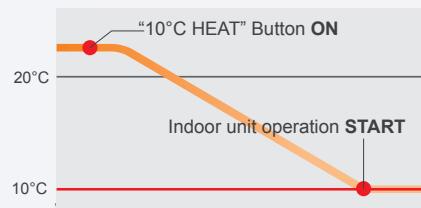

## Powerful operation

Continuous operation by maximum air flow and maximum compressor speed after a certain period of time allows the temperature to reach the setting temp. quickly.

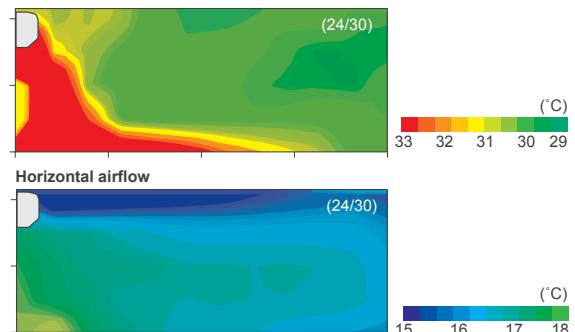

## 10°C Heat operation

When you leave, minimum heating operation is performed to maintain the room temperature. (Maintain at 10°C)

## Comfort Airflow

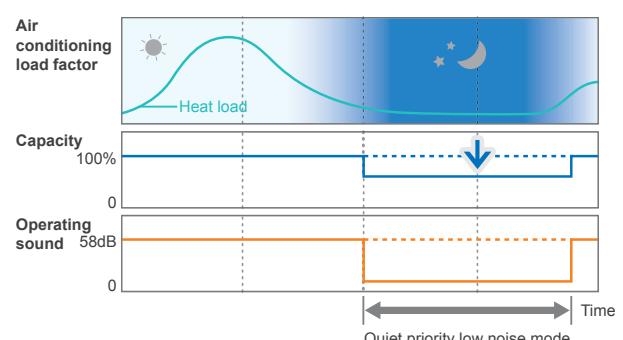

Precision wind direction control is realized and ventilation efficiency is also improved by 3 technologies. Our airflow control makes your environment more comfortable.

# Quiet and Comfort Control

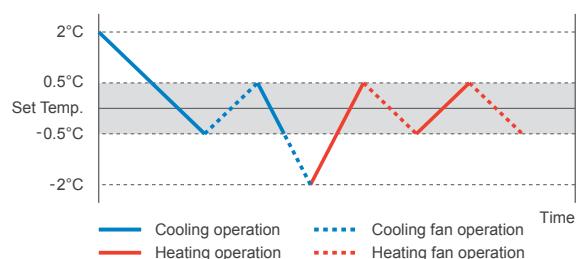

## Outdoor unit low noise operation

Users can choose low noise levels, depending on the installation environment. The operation time can be set using the timer.

## Auto changeover function

At Auto setting, the cooling/heating mode is automatically switched according to the set temperature and room temperature.

## CORE TECHNOLOGY

LT  
Series  
LU  
Series

Pursuit of advanced design achieving both functionality and beauty.

reddot design award  
winner 2012

LM  
Series

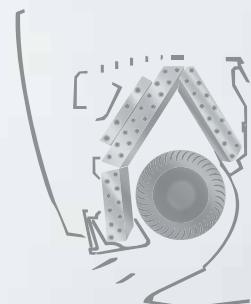

LL  
Series

The stylish design of this simple flat panel looks thin and compact from all directions.

## Creating Harmony and New Interior Design Space in a Variety of Installation Environments

Thinness and simplicity was thoroughly pursued in this design to fit the interior design. The lambda shaped high-density multi-path heat exchanger construction and full cover slide open panel provide both beauty and functionality. The remote controller has also been designed utilizing ergonomics for ease of use while also pursuing beauty even in the details. Fujitsu General provides its customers with highly functional air conditioners designed with high artistic sensitivity

Wall Mounted

**High Spec. & Design :** ASYG09LTCA / ASYG12LTCA

**Basic :** ASYG09LLCA / ASYG12LLCA

# Smart Design

# User Friendly Control

## Residential use

### Home central control

Central Remote Controller

The individual controllers match the user operational environments and the home controller makes batch energy saving management easy. Ease of use was pursued using simple operation buttons, a large LCD screen, and other features.

### Simple individual control

Slim Wireless  
Remote Controller

**NEW**

Wired  
Remote Controller

Simple  
Remote Controller

Fujitsu General provides an interface that supports central management systems like KNX, Modbus, BACnet, and LONWORKS. This allows customers to easily perform central control and monitoring of air conditioning equipment.

Fujitsu General is using ergonomics to expand the use of user friendly designs such as easy-to-read large LCD displays, easy-to-operate buttons, and displays with easily recognizable colors and icons.

## Commercial use

We offer a wide range of central control equipment to meet the building air conditioning scope and application. Great care was taken to achieve a visually intuitive design and one-touch operation.

# Design Simulator

Put the charts and pens away and design your projects on your computer with ease using the Design Simulator. Everything from selecting indoor and outdoor units, allocating controls and optional parts to designing the piping and wiring systems is made easier using the program's built-in features. Once your project is designed take advantage of the Export functions to easily get materials lists, product specifications, refrigerant calculations and more - it'll even export to Word or Excel formats, and group the relevant CAD data for your project.

## Automatically create model selection information

- Each unit can be automatically set by entering the required performance, type, and temperature conditions for each indoor unit and then dragging and dropping into the outdoor unit.
- Piping and wiring diagrams can be created automatically and it is easy to set branches, grouping, and options.
- The additional refrigerant charging amount is automatically calculated when the pipe length is entered.
- It is also easy to set the remote controller groups, central controller and converters.
- The equipment list including the equipment information is created automatically.

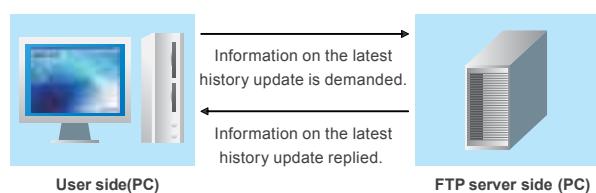

## Output the format that matches the application

The information specific to your project can be exported in a number of industry standard file formats.

- Word format (rtf)
- Excel format (csv)
- Auto CAD format (DXF)
- 2D Data (DXF)
- 3D Data (RFA)

## Update your Design Simulator

Database can be easily updated online using AutoUpdate function through FTP.

# Building Information Modeling (BIM)

FUJITSU GENENRAL provides the Building Information Modeling (BIM) object models and contents for our VRF system and some products to the architect, designer and contractor using Autodesk® Revit® technology from our Website and Autodesk® Seek Website, etc.

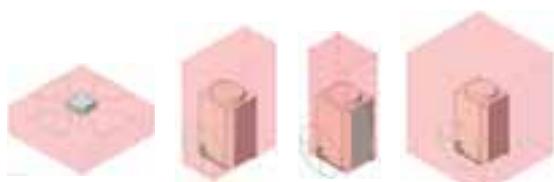

## 3D and 2D product data

We provide 3D data that is closer to the product appearance. 2D CAD design operations are supported and 2D display is also provided. The data can also be output in other formats, such as DXF and DWG, which are used by other design CAD.

## Installation limitation

The equipment installation limitation range is shown. The distance range from the wall, etc., is automatically displayed to make it easy to provide highly reliable layout designs.

## Installation information

Other information, such as symbols showing the airflow direction that are required for installation drawings, is built in and can be automatically reflected in 2D drawings. Installation drawings can be created easily.

## Product specifications & Link information

Contains the basic information required for air conditioner design, including unit size, capacity, input power, noise, and airflow rate.

These data can be procured from the Fujitsu General Website, Design Simulator, and Autodesk® Seek Website.

Fujitsu General following  
the EU climate action plan  
20/20/20 by 2020

### 20% less Primary Energy Use

Fujitsu General products with high efficiency and therefore low electricity input and low primary energy usage

### 20% less CO<sub>2</sub> Emissions

Fujitsu General products sharply following the F-Gas regulation 842 / 2006 / EC

### 20% share of Renewable Energy

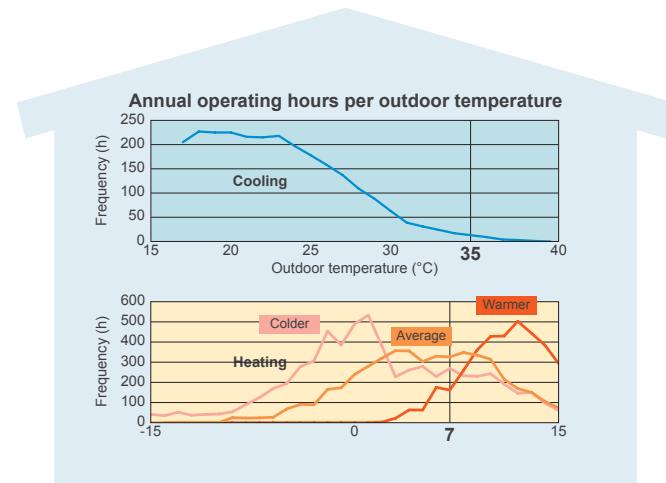

Fujitsu General promoting air sourced heat pumps as renewable energy source heating systems

## Pursuit of Energy Saving Taking Actual Operation into Consideration

The heat load varies greatly depending on the time and season. However, the operation ratio EER or COP up to now has been calculated based on the rated value and the annual operating hours per outdoor temperatures was not taken into consideration.

For this reason, SEER and SCOP\* have been made the standard in terms of actual operating hours throughout the year.

\*: SEER = Seasonal Energy Efficiency Ratio  
SCOP = Seasonal Coefficient Of Performance

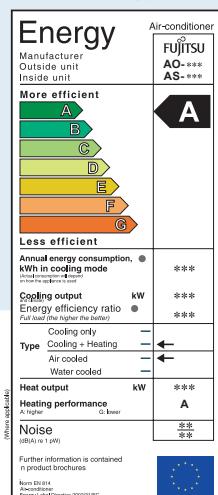

Fujitsu General provides air conditioners with higher SEER and SCOP.

\*SEER and SCOP are indexes that express the annual energy efficiency calculated based on the regulations of (EU) 626/2011.

## Energy Efficiency Classifications

New Energy Labelling Requirement 626 / 2011 / EU : Our models have reached the "Class A" ranking, the highest energy efficiency level that is now shown on energy labels in Europe.

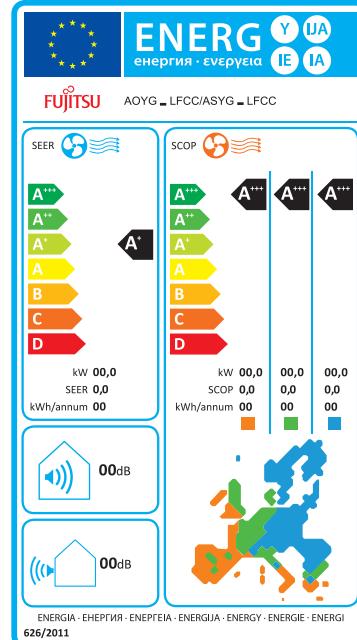

Current Energy Label

- Performance notation based on multiple points calculations that better matches the actual operation
- Energy labelling revision
- Raising of the CLASS A level

- Three climate zone for heating (Average zone : mandatory) (Warmer and colder zone are optional)
- Seasonal efficiency
- Sound power level

New Energy Label\*

EER (Cooling mode)	COP (Heating mode)
A $3.20 < \text{EER}$	$3.60 < \text{COP}$
B $3.20 \geq \text{EER} > 3.00$	$3.60 \geq \text{COP} > 3.40$
C $3.00 \geq \text{EER} > 2.80$	$3.40 \geq \text{COP} > 3.20$
D $2.80 \geq \text{EER} > 2.60$	$3.20 \geq \text{COP} > 2.80$
E $2.60 \geq \text{EER} > 2.40$	$2.80 \geq \text{COP} > 2.60$
F $2.40 \geq \text{EER} > 2.20$	$2.60 \geq \text{COP} > 2.40$
G $2.20 \geq \text{EER}$	$2.40 \geq \text{COP}$

### Gradual ranking regulation up to A+++ (2013 ~ 2019)

Energy saving design to provide a comfortable indoor environment while being environment-friendly.

An air conditioner that is people-friendly is also environment-friendly. Fujitsu General offers a broad lineup of products from large living rooms to bedrooms and children's rooms. We make your room more comfortable with a wide range of air conditioner types from ceiling wall type with automatic filters and cleaning functions to wall mounted type that improve the air cleaning function. Of course these models feature highly efficient operation that conserves electricity.

High Spec. & Design : ASYG09LTCA / ASYG12LTCA

Wireless R.C.

For ASYG09LTCA

For ASYG12LTCA

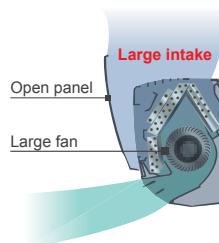

ALL  
DC

## Features

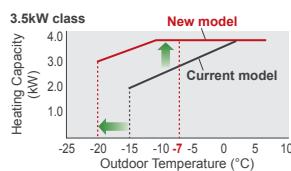

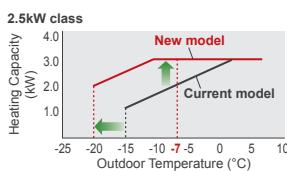

### Thin & Slim design

Thin and slim design is realized by high density multi-path heat exchanger and high efficiency wind blower.

### Powerful heating

Rated heating capacity is maintained up to an outdoor temperature lower than -7 °C. This new model can operate even at -20 °C low outdoor temperature.

### Powerful operation mode

20 minutes continuous operation by maximum airflow and maximum compressor speed is possible. Rapid cooling and heating makes the room comfortable quickly.

### 10°C HEAT Operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.  
\*Only available with Wireless RC.

### Energy saving control

Human sensor catches movements of people in a room, and operates with lower capacity when people leave the room. When people come back to the room, it automatically returns to previous operating mode.

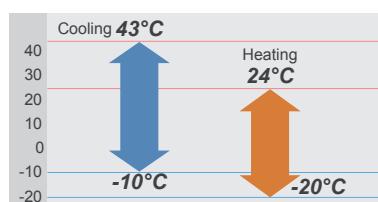

### 3 Mode timer (Weekly/Program/Sleep)

Weekly timer can be easily set by wireless remote controller. ON, OFF can be set up to 4 times in 1 day and up to 28 times in 1 week. For other modes, program timer and sleep timer can be also selected by one push.

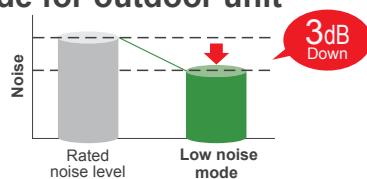

### Low ambient operation

### Low noise mode for outdoor unit

Low noise mode of outdoor unit can be selected by wireless remote controller.

### Optional parts

Wired Remote Controller: UTY-RNNYM / UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

Communication Kit: UTY-TWBXF

External Connect Kit: UTY-XWZXZ5

## Features

### “Vertical airflow” provides powerful floor level heating

### “Horizontal airflow” does not blow cool air directly at the occupants in the room

## Air conditioner filter features

Antibacterial deodorizing pre-filter with special ceramic powder

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(\*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

+ Using different filters at both sides

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

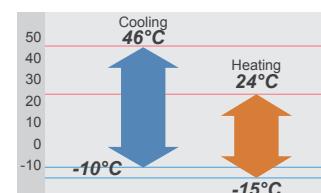

## Flexible Installation

	18 type	24 type	30 type
Max. Piping Length	<b>25m</b>	<b>30m</b>	<b>50m</b>
Max. Height	<b>20m</b>	<b>20m</b>	<b>30m</b>

## Easy maintenance

Simplification of drain pan cleaning improves maintenance-ability.

## Low ambient operation

## Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

External Connect Kit: UTY-XWZX

## Features

### High efficient compact design

### ON-OFF Programmable timer

You can set an integrated ON-OFF or OFF-ON timer suitable for your life style.  
(Setting time: 0.5, 1, 1.5, 2, 2.5, ----9.5, 10, 11, 12 hours)

### Powerful operation

20 minutes continuous operation by maximum airflow and maximum compressor speed is possible. Rapid cooling and heating makes the room comfortable quickly.

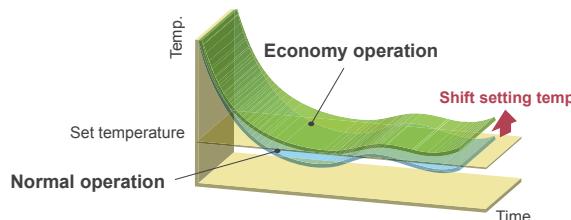

### Super Quiet Operation

Top class low noise operation by new airflow construction. Our quiet operation makes the more comfortable environment in a bed room and a study room, etc.

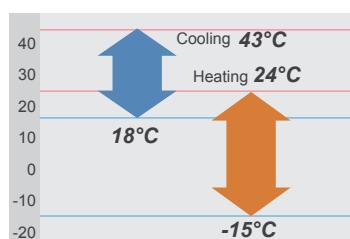

### Economy operation

Setting temp. is shifted by 1°C automatically.

### Low ambient operation

### Optional parts

Remote Controller Holder: UTZ-RXLA  
Protective net: UTZ-NXCA

## Features

### Flexible & easy installation

### 2-Fan & Wide airflow

### Filter features

#### Long-life\* Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

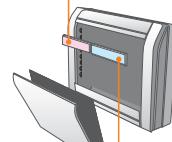

(\*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

Using different filters at both sides

#### Apple-catechin Filter

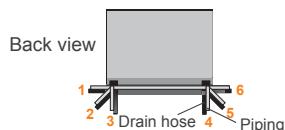

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

#### Apple-catechin Filter

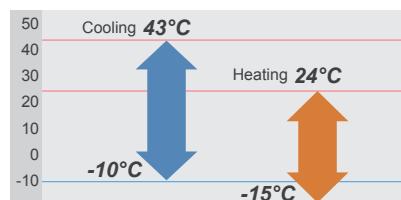

#### Ion Deodorization Filter

### Flexible piping connection 6 direction of drain & piping

### Low ambient operation

### 10°C HEAT Operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied

### Easy maintenance

Removable and washable panel

Removable panel ~

### Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

Half Concealed Kit: UTR-STA

External Connect Kit: UTY-XWZX

## Features

### 2-stage turbo fan

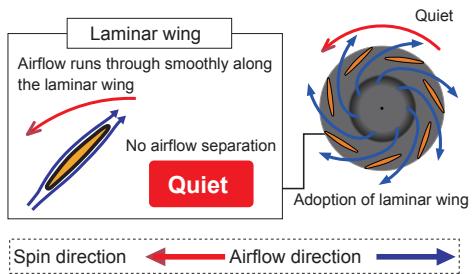

High efficiency design by 2 stage structure

### Quiet quality

Optimization of wing form (laminar wing type) and wing number (7 blades each)

Designed by CFD-analysis (fluid) simulations

### Easy maintenance

#### ① Maintenance of fan motor and fan

Maintenance of the fan motor and fan can be done easily after taking off the panel as the bell mouth of the fan can be removed easily.

A : Fan motor    B : 2-stage turbo fan  
C : Bell-mouth    D : Panel

#### ② Long life filter

: standard equipment

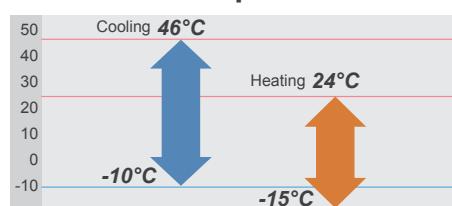

#### ③ Adaptation of transparent drainage parts

During installation, maintenance and operation, the drain pump and kit can be checked easily.

### High lift drain pump

### Low ambient operation

### Compact design

World's first 24,000Btu model in the compact cassette category (Easy installation by taking off ceiling panel of 600 x 600 size)

### Optional parts

Air Outlet Shutter Plate:	UTR-YDZB
Wired Remote Controller:	UTY-RNNYM, UTY-RVNYM
Simple Remote Controller:	UTY-RSNYM
Insulation Kit For High Humidity:	UTZ-KXGC
External Connect Kit:	UTY-XWZX
External Control Set:	UTD-ECS5A
Fresh Air Intake Kit:	UTZ-VXAA

AUYG36LRLA [3phase] / AUYG45LRLA [3phase] / AUYG54LRLA [3phase]

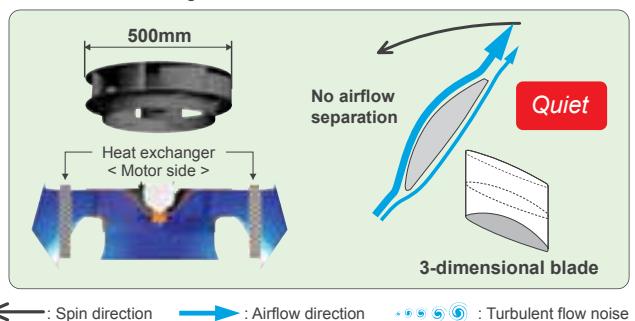

## Features

### High efficiency turbo fan with 3-dimensional blade

Previous turbo fan: Air passing through the heat exchanger was uneven and the air would only flow close to the ceiling.

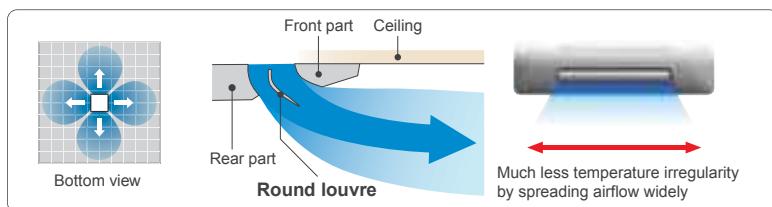

New turbo fan: High efficiency airflow distribution has been achieved by the introduction of a 3 dimensional blade which increases the air passing over the heat exchanger.

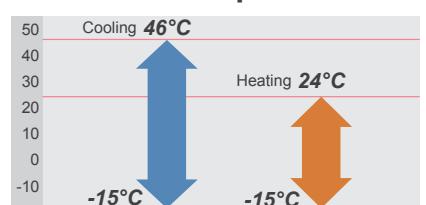

### Improvement of the airflow distribution

New louvre: The louvre design distributes air leaving a space between the chassis and the ceiling allowing far and wide airflow distribution.

### Low ambient operation

### Optional parts

Wired Remote Controller:	UTY-RNNYM, UTY-RVNYM
Simple Remote Controller:	UTY-RSNYM
IR Receiver Kit:	UTY-LRHYA2
Wide Panel:	UTG-AGYA-W
Panel Spacer:	UTG-BGYA-W
Air Outlet Shutter Plate:	UTR-YDZC
Insulation Kit For High Humidity:	UTZ-KXGA
External Connect Kit:	UTY-XWZX UTY-XWZXZ2 UTY-XWZXZ3
External Control Set:	UTD-ECS5A
Fresh Air Intake Kit:	UTZ-VXGA

### Adjustment of hanger position is possible after installation

### High lift drain pump

## Features

### Flexible installation

#### Example for floor installation

Floor console

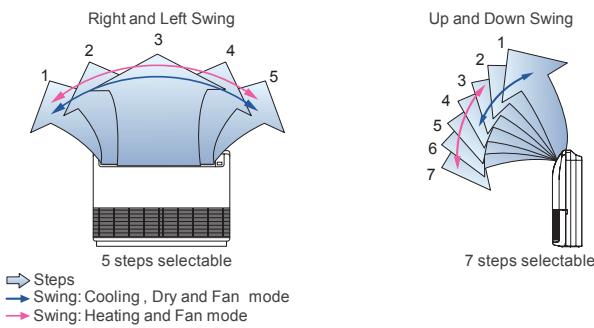

#### Example for ceiling installation

Under ceiling

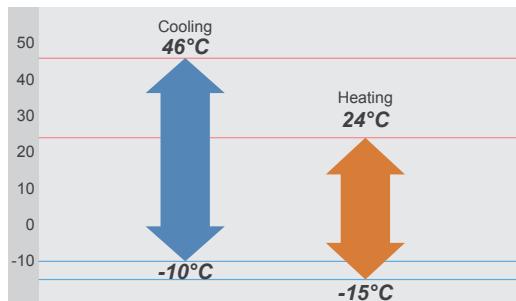

### Double auto swing

A combination of right/left and up/down directional swing allows 3-dimensional air direction control

### Low ambient operation

### Easy installation

Main work settings can be done easily from the remote controller at installation

#### Main work settings

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

#### Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

External Connect Kit: UTY-XWZX

Main work settings can be done easily from the remote controller at installation

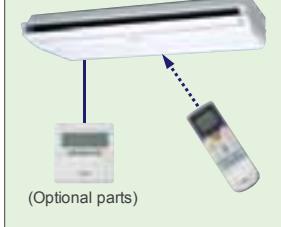

#### Main work settings

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

**Conventional type**  
Setting by DIP switch inside control box

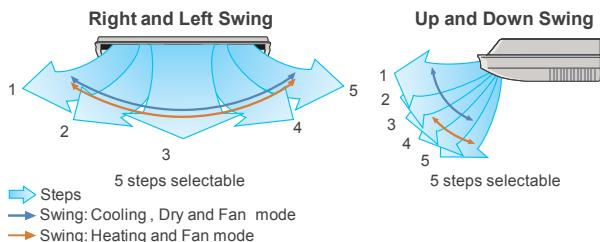

**Setting by wireless or wired remote controller**

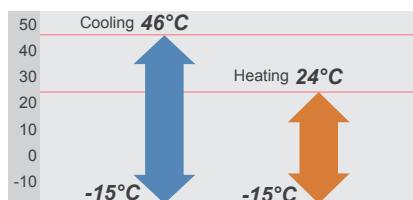

### Multi auto swing

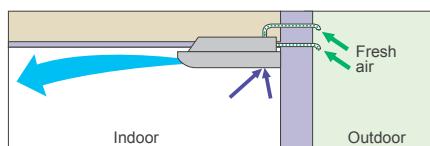

A combination of right/left and up/down directional swing allows 3-dimensional air direction control.

### Low ambient operation

### Fresh air intake

### Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

Drain Pump Unit: UTR-DPB24T

External Connect Kit: UTY-XWZX

UTY-XWZXZ2

UTY-XWZXZ3

External Control Set: UTD-ECS5A

Flange: UTD-RF204

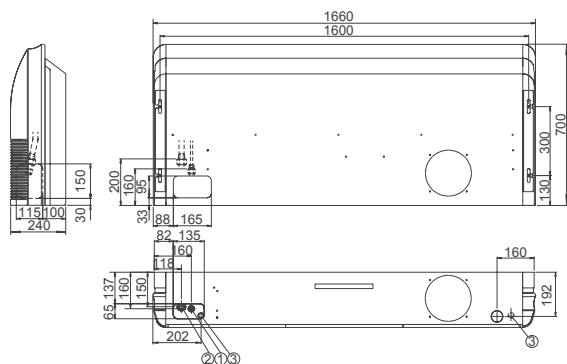

## Specifications

  - ③ Drain piping connection

# Slim Duct

Model : ARYG12LLTB / ARYG14LLTB / ARYG18LLTB

Wired R.C.

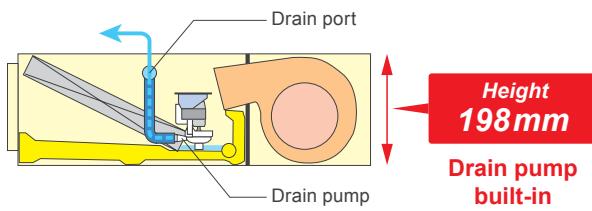

ALL  
DC

## Features

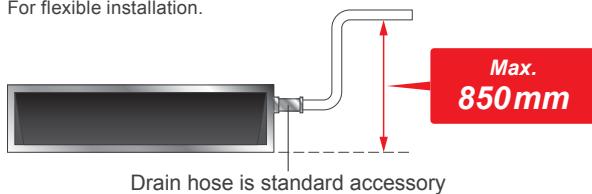

### Slim design

The slim design allows installations where ceilings are narrow.

### Drain hose as standard accessory

For flexible installation.

### Selectable with a wide range of static pressure

By using the DC fan motor, it is possible to change the static pressure range from 0 to 90Pa.

The change of static pressure range is possible by remote controller.

Static pressure range  
0 to 90 Pa

### Flexible installation

Ceiling concealed

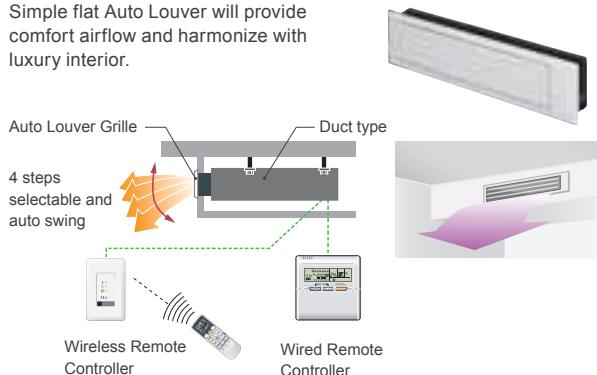

Floor concealed

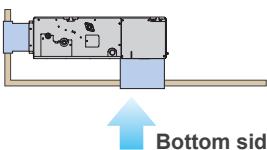

### Auto Louver Grille Kit (Option)

Simple flat Auto Louver will provide comfort airflow and harmonize with luxury interior.

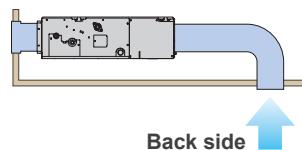

### Air-intake

Air intake direction can be selected to match the installation site.

Bottom side

Back side

### Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

IR Receiver Kit: UTY-LRHYM

Remote Sensor Unit: UTY-XSZX

External Control Set: UTD-ECS5A

Auto Louver Grille Kit: UTD-GXSA-W (For ARYG12 / 14LLTB)

UTD-GXSB-W (For ARYG18LLTB)

## Features

### Slim & Compact design

In the case of bottom return air connection, not only does the indoor unit design allow for installation in a narrow ceiling space of up to 270mm, further space savings have been achieved by mounting the control box internally inside the chassis.

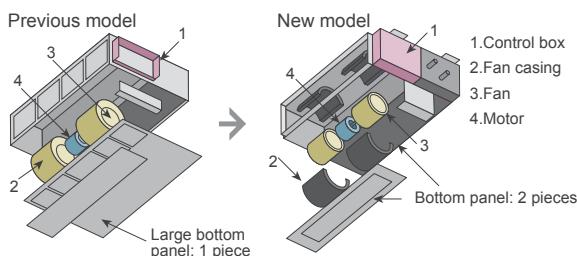

### Two-direction drain piping

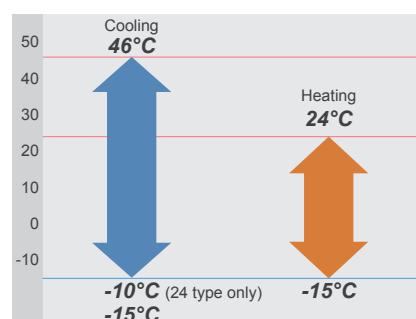

### Easy maintenance

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

#### See below for the case of rear suction type

### Low ambient operation

### Easy installation

Main work settings can be done easily from the remote controller at installation

#### Main work settings

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

#### Conventional type

Setting by DIP switch inside control box

#### Setting by wired remote controller

### Optional parts

ARYG45/54LHTA

ARYG60LHTA

Wired R.C.

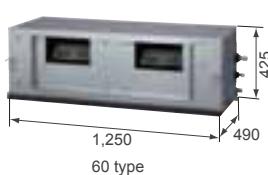

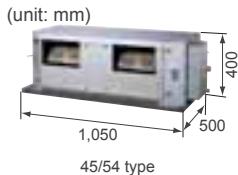

## Features

### High energy efficiency

Significantly greater efficiency is realized by using all DC inverter technology.(60 type)

### Easy installation (Compact size & Lightweight)

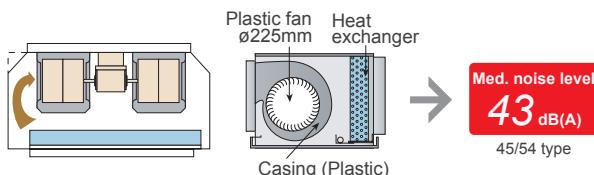

A compact size and lightweight indoor unit has been developed by reducing the basic chassis and the overall material weight.

### Low noise

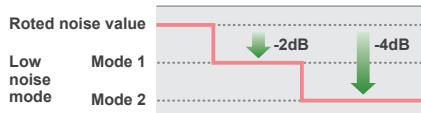

#### Indoor unit

Cutting off the corners has enabled less turbulent airflow.  
Low noise is realized by adopting a plastic case and a plastic fan.

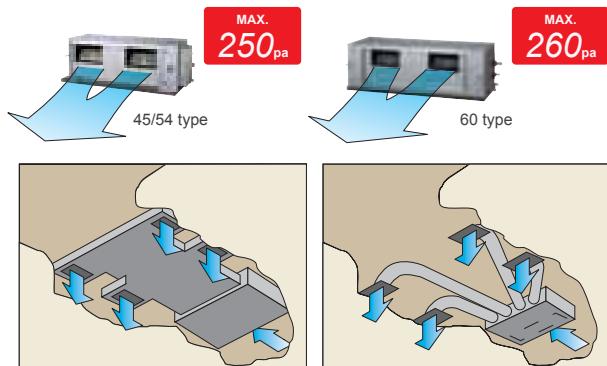

#### Outdoor unit

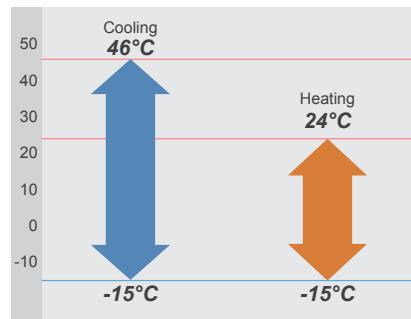

2 stage low noise mode can be selected.(Option)

### Design also corresponding to high static pressure

### Low ambient operation

### Optional parts

Wired Remote Controller: UTY-RNNYM, UTY-RVNYM

Simple Remote Controller: UTY-RSNYM

Long-Life Filter: UTD-LF60KA (For ARYG45/54LHTA only)

Remote Sensor Unit: UTY-XS2X

External Connect Kit: UTY-XWZXZ2, UTY-XWZXZ3

External Control Set: UTD-ECS5A

## Features

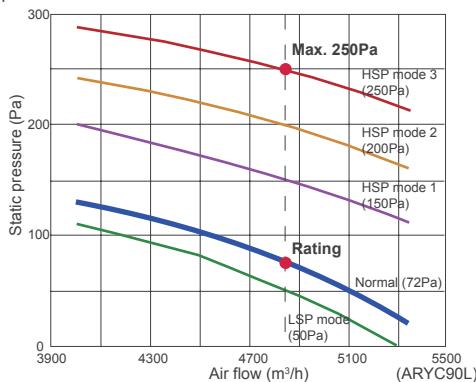

### High energy efficiency

Significantly greater efficiency is realized by using DC twin rotary compressor, all DC inverter technology, and large heat exchanger.

### 5 Static Pressure selection

Improvement and design flexibility has allowed multiple fan speeds and static pressure modes. Low noise is realized by adopting plastic case, plastic fan.

### Pursuance of amenity performance

Various remote controllers and sensors can be selected

### Outdoor unit quiet operation

A low outdoor noise operation mode allows the outdoor unit to have two quiet mode operation settings.

### Peak cut operation

A peak power consumption mode controls a 4 step outdoor operation control to cut down energy usage at peak energy usage times.

### Easy Service & Maintenance

- Split front panel allows for maintenance from top or bottom of the outdoor unit
- Fan motors of the indoor unit can be removed separately

### Optional parts

Wired Remote Controller:	UTY-RNNYM, UTY-RVNYM
Simple Remote Controller:	UTY-RSNYM
Remote Sensor Unit:	UTY-XSZX
External Control Set:	UTD-ECS5A

Control several indoor units with one outdoor unit.  
Build the optimum system you desire.

If you want to keep a large floor as well as many rooms comfortable, we recommend you use Multi Split to build a simple system using one outdoor unit. Choose from a large lineup of indoor units that best matches your rooms. You can mix and match them at will. Build the system that is just right for you.

## MULTI SPLIT

Multi Split provides comfort in a variety of situations  
from home to office and store.

# 2 & 3-4 Rooms Multi

**2 Rooms :** AOYG14LAC2 / AOYG18LAC2

**3 Rooms :** AOYG18LAT3 / AOYG24LAT3

**4 Rooms :** AOYG30LAT4

## Features

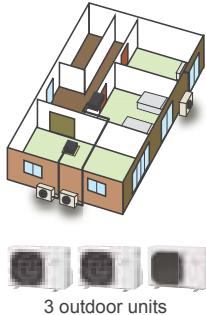

### Space-saving installation

Multiple indoor units can be connected to 1 outdoor unit, and long piping connection is also possible. Compared with single type, the outdoor unit can be installed in various places to realize the space-saving installation.

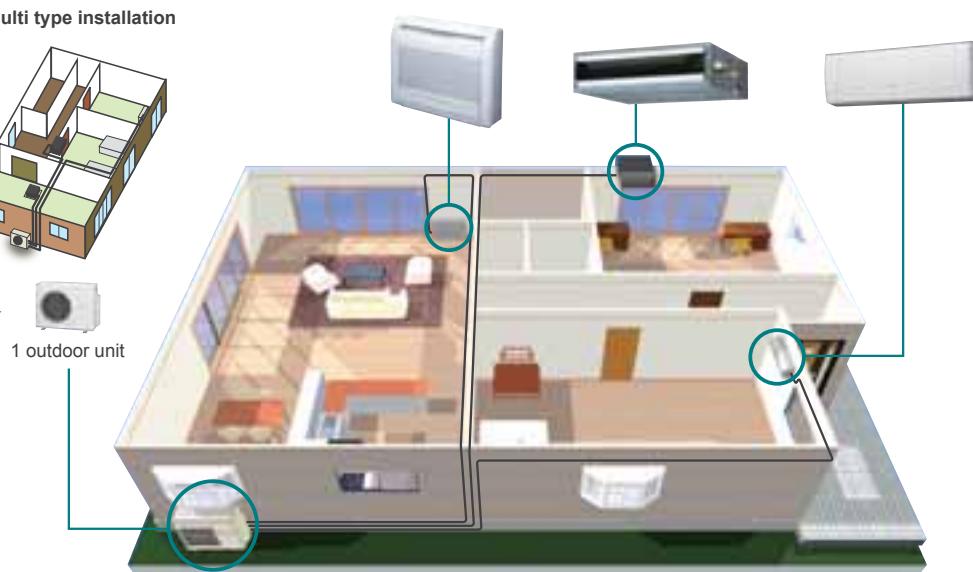

### Wide range of indoor units with various models

8 types 28 models are lined up in the capacity range from 2kW to 7kW class. Wide range of needs can be met from rooms of private homes to large shops and hotels.

Ex.) Single type installation

Multi type installation

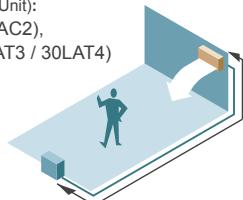

### Flexible installation

Up to max. piping length of 70m (AOYG30LAT4), max. height difference of 15m can be supported. Multi type can be installed at large-size residence or buildings with multiple floors.

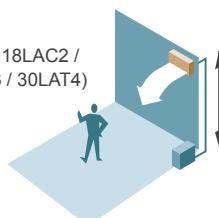

#### Max. Piping Length (Each Unit):

**20m** (AOYG14LAC2 / 18LAC2),  
**25m** (AOYG18LAT3 / 24LAT3 / 30LAT4)

#### Max. Height:

**15m** (AOYG14LAC2 / 18LAC2 / 18LAT3 / 24LAT3 / 30LAT4)

#### Total Piping Length:

**30m** (AOYG14LAC2 / 18LAC2),  
**50m** (AOYG18LAT3 / 24LAT3),  
**70m** (AOYG30LAT4)

# 8 Rooms Multi

**NEW** 8 Rooms : AOYG45LBT8

ALL  
DC

## Features

### High Efficiency & Compact

#### Compact outdoor unit

#### Innovated technology

**High efficiency large fan :**  
New high efficiency fan is mounted.

**DC fan motor :**  
High performance and high efficiency has been realized by using a small DC fan motor.

**Heat exchanger :**  
Reduced compact size and energy saving has been realized by utilizing high density piping design and 3-Row heat exchanger.

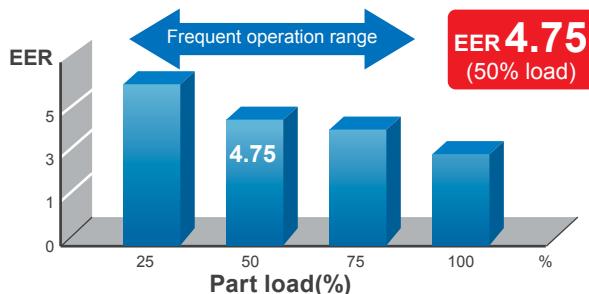

**High efficiency DC twin rotary compressor :**  
A high performance, low noise, large capacity DC twin rotary compressor is used.

### High seasonal efficiency

The actual performance is conducted under various outside temperatures depending on weather and seasons, furthermore, especially for multi system, not all the rooms are operated all the time. So over 90% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity.

Considering these, we focused on energy-saving performance which is based on actual use.

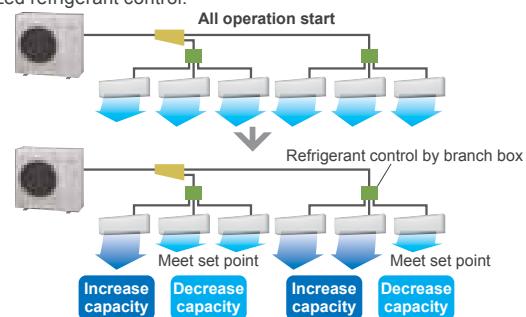

Efficiency of part load performance was drastically improved by developing ALL DC and our own inverter system.

### More Comfort

#### Quick comfort by optimized refrigerant control

Every room meets the set point most quickly and comfortably by optimized refrigerant control.

## Features

### Central Remote Controller Option

Central remote controller developed for residential applications.  
All indoor units can be batched controlled using simple operations.  
Schedule management and other functions can be used to achieve even greater energy savings.

### Central & Individual Control

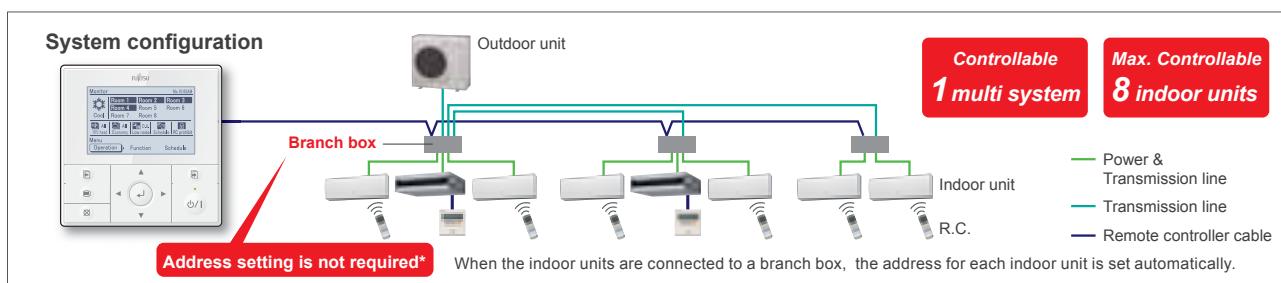

Batched control of up to 8 indoor units. The temperature, airflow volume, and remote control prohibition settings of all indoor units can be batched.

### User-friendly operation

- Large backlight LED screen
- Large easy-to-see operation panel

### Multiple language support

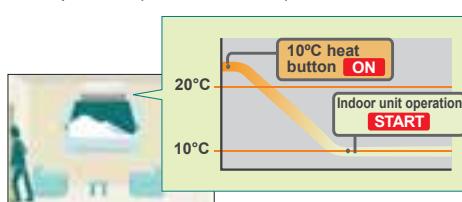

Corresponds to 9 different languages (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

\*Note : Cross-over connections are not allowed in the refrigerant system. Group settings are not allowed.

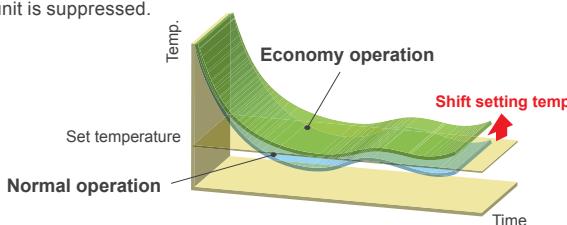

### 10°C heat operation

When you leave, minimum heating operation is performed to maintain the room temperature (maintain at 10°C).

### Economy operation

Economy operation is energy saving, as the set temperature of indoor unit is shifted by 1°C and the maximum electric value of the outdoor unit is suppressed.

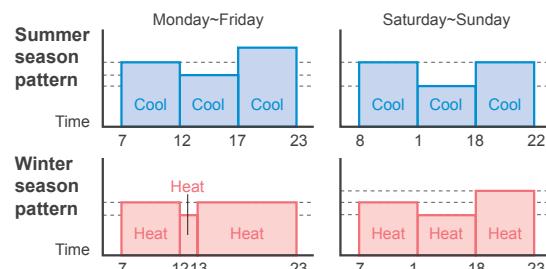

### Prohibited Settings

The remote controller operation of all indoor units comes with a lock function to prevent unapproved operations in the various rooms. The central remote controller also has a key lock function to prevent children from playing with it, etc

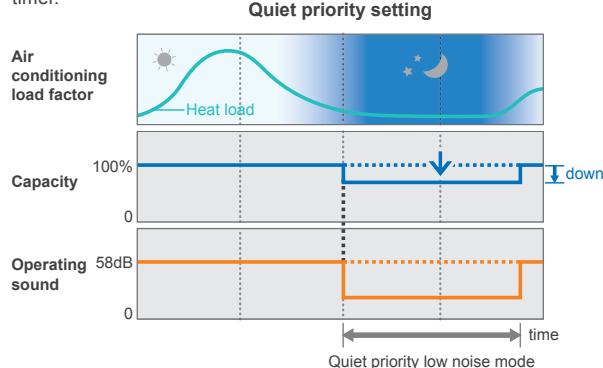

### Weekly schedule timer

The ON/OFF setting can be set for 4 times a day. Two weekly patterns can be set to match the cooling and heating seasons.

### Low noise operation

Users can choose from 4 low noise levels, depending on the installation environment. The operation time can be set using the timer.

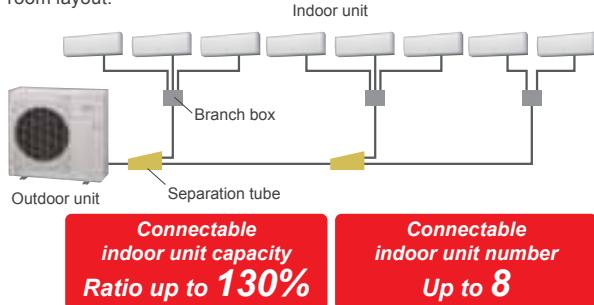

# 8 Rooms Multi

## Features

### Flexible Design & Easy Installation

#### Large capacity connection

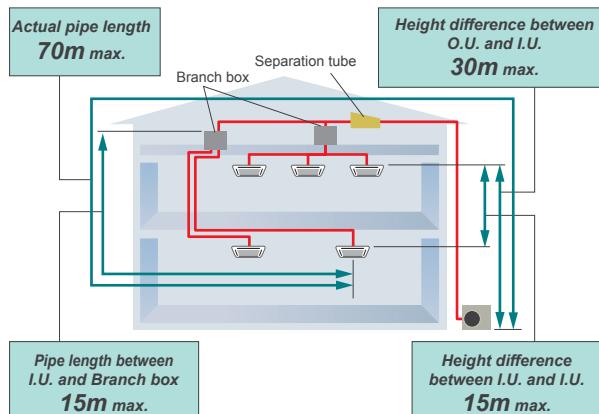

Up to 8 indoor units can be connected to one outdoor unit. A maximum of 130% indoor unit connectable capacity. Match any room layout.

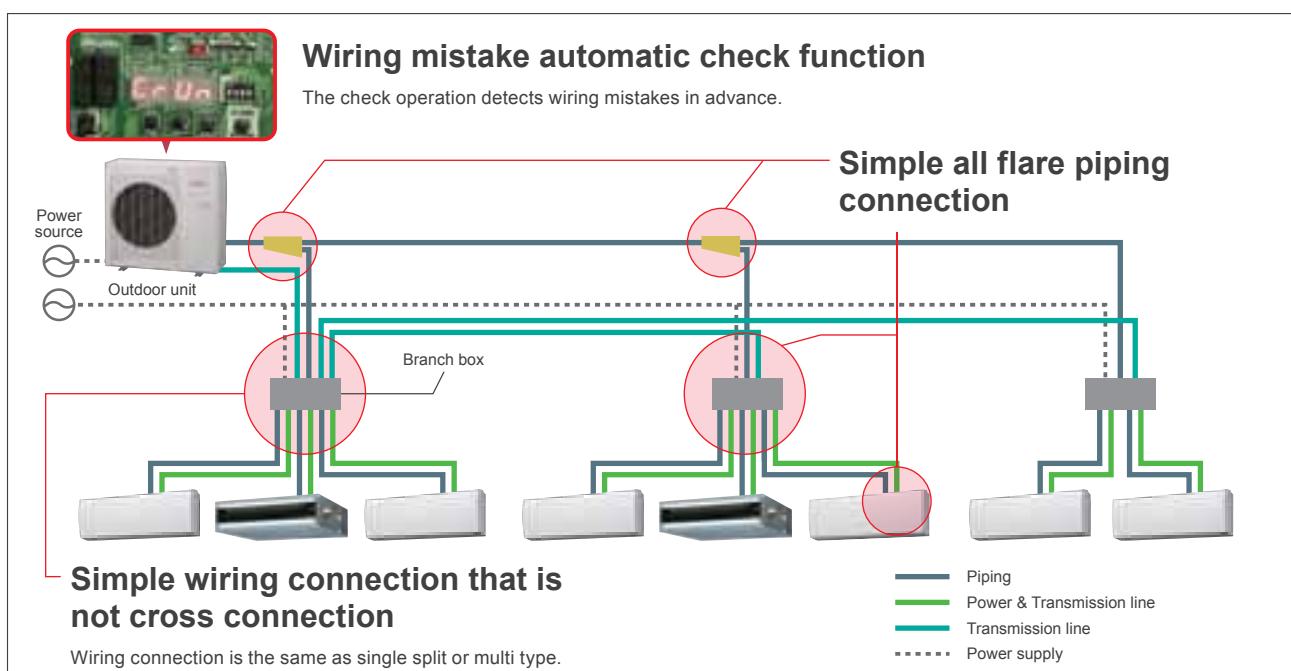

#### Long piping design

Can be installed in high rise condominiums or commercial buildings.

**Total pipe length  
115m max.**

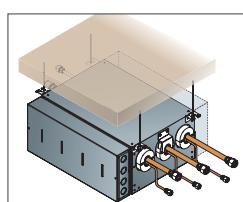

All flare piping connection and simple installation that minimizes wiring mistakes.

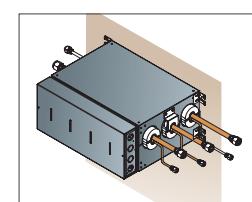

#### Branch Box can be mounted flexibly.

Allowed Branch Box Mounting Direction

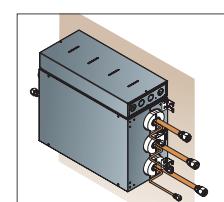

##### Hanging from the ceiling

Do not hang from the ceiling when performing a vertical installation.

##### Horizontal Wall Mounting

Install the unit with its top side facing upwards.

##### Vertical Wall Mounting

Install the unit with the control box facing upwards.

Note: •7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h models

•The above is the value for connecting with Wall Mounted type.

•2 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 5m, Height difference: 0m (Outdoor unit to Indoor unit)

•The Total ability of connected a indoor unit is up to 36000Btu from 14000Btu.

\*1: When ASYG18L is connected, connect at least 1 wall mounted type for 9000Btu.

# Multi Combination Table

Note: •Cooling capacity is based on 27°CDB/19°CWB(indoor temperature),35°CDB(outdoor temperature)

•Pipe Length: 5m (Outdoor unit to Branch box), 3m (Branch box to Indoor unit)

•Height difference: 0m (Outdoor unit to Indoor unit)

•The values in this table should be used only as a guide. These values are calculated at standard conditions.

To fix your selection of models, select them according to "Model Selection" in the D&T manual.

\*1:LMC type is not available for this combination.

Note: •Heating capacity is based on 20°CDB(indoor temperature),7°CDB/6°CWB(outdoor temperature)

•Pipe Length: 5m (Outdoor unit to Branch box), 3m (Branch box to Indoor unit)

•Height difference: 0m (Outdoor unit to Indoor unit)

•The values in this table should be used only as a guide. These values are calculated at standard conditions.

To fix your selection of models, select them according to "Model Selection" in the D&T manual.

# Simultaneous Multi Twin / Triple

**Model :** AOYG36LATT [3phase]  
AOYG45LATT [3phase]  
AOYG54LATT [3phase]

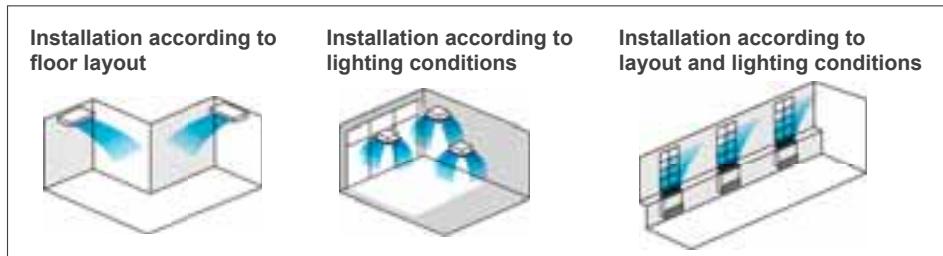

ALL  
DC

## Features

**Can support various installation scenes from office to commercial space by same place multi connection of up to 3units.**

Indoor units distributed layout according to the shape and number of people and lighting conditions of the room even on wide floors and atypical floors. Ideal comfortable air flow distribution can be realized.

## Simultanious Operation Multi type Indoor Unit Line up

## Wired Remote Controller : UTY-RVNYM

Hi-grade individual control using various functions.

- 3.7-inch LCD backlight screen.
  - Supporting various Energy Saving functions with simple operation.
  - Multiple Language Support.
- (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

## High performance and compact size

- In addition to the individual control, various energy saving controls can be realized using only one remote controller.

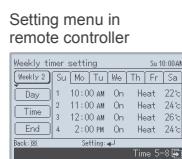

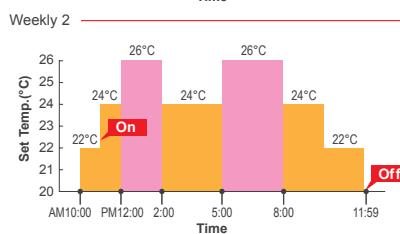

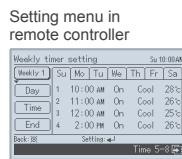

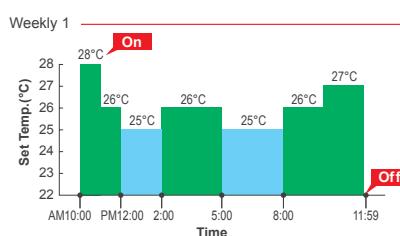

## Various energy saving function

### Auto OFF Timer

- The indoor unit automatically is turned off when it reaches the preset operating time frame.
- The time frame of the "Auto off timer" can be flexibly scheduled.
- Can be set off time 30 ~ 240 minutes

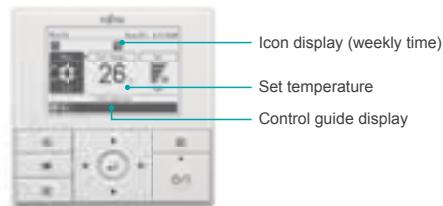

## Weekly Timer function

- Can be set up to 8 times per day (On/Off, mode, Temp)
- 2 pattern settings(i.e. Summer/Winter setting) are available.

## User friendly view and Easy operation

- Icon display of effectual functions.
- Main functions in large icons: "Mode", "Set Temp", and "Fan".
- Easy to operate by Control guide display.
- Simple operation with easy 4-way navigation pad.

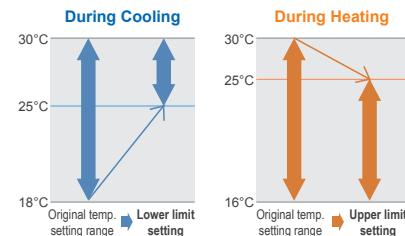

## Set Temperature Auto Return

- The setting temperature automatically returns to the previously set temperature.
- The time range in which the set temperature can be changed is 30 to 120 minutes.

## Set Temperature Upper and Lower Limit Setting

- The set temperature range can be set for each operation mode. (Cooling / Heating / Auto)

## Specifications

Model name	UTY-RVNYM
Power supply	DC 12V
Dimension (H × W × D) (mm)	120 × 120 × 21.3
Weight (g)	220

\* DC12V is supplied by indoor unit.

# OPTIONAL PARTS FOR SPLIT & MULTI SPLIT

## Auto Louver Grille Kit : UTD-GXSA-W / UTD-GXSB-W / UTD-GXSC-W

Simple flat Auto Louver will provide comfort airflow and harmonize with luxury interior.

### Flexible Control

#### • Operation with indoor unit

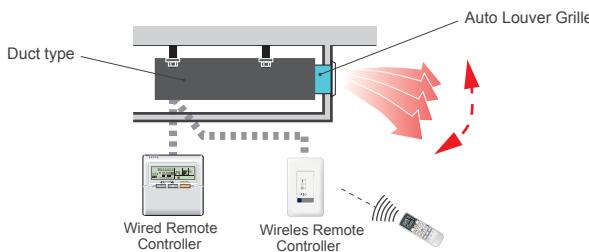

Auto Louver can be operated by synchronizing remote controller of indoor unit.

#### • UP and Down auto swing

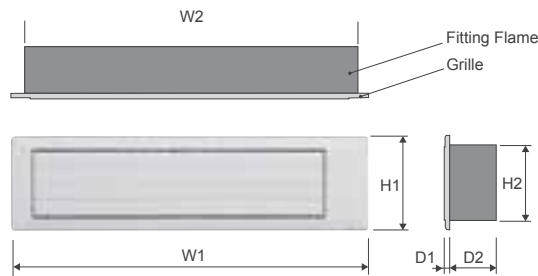

- Auto airflow direction and auto swing
- 4 steps selectable

#### • Auto-closing louver

When operation of indoor unit is stopped, the louver will automatically close.

AIRSTAGE™ creates a comfortable space with a wide range of series variations.

Comfort is required of spaces where people gather. VRF is a large multi system that effectively air conditions a wide variety of spaces from large buildings to personal residences. This system makes these spaces comfortable utilizing high environmental performance and powerful but pleasant operation.

8HP-48HP

**33** models

Space saving combination  
8HP to 48HP / 21 models

Energy efficiency combination  
16HP to 44HP / 12 models

Heat Pump type for heating or cooling operation

Systems for large offices, hotels, and large composite facilities

**AIRSTAGE™ V-II**

8HP-48HP

**34** models

Space saving combination  
8HP to 48HP / 21 models

Energy efficiency combination  
16HP to 44HP / 13 models

Heat Recovery type for simultaneous heating and cooling operation

Systems compatible with individual operation mode control, as well as large offices, hotels, and large composite facilities

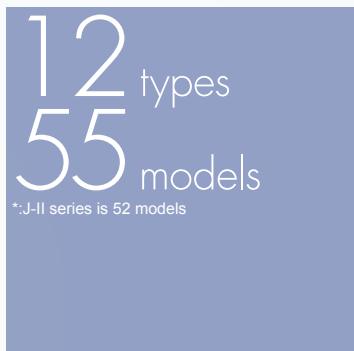

**NEW**

**AIRSTAGE™ VR-II**

A pleasant air conditioned environment matched to the needs is created by combining a wide variety of outdoor units, indoor units, and controllers.

## Indoor Units Line-up

Page 124~

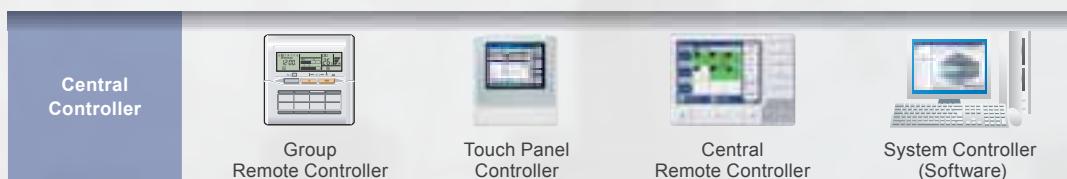

Capacity range 1.1kW to 25.0kW (J-II can be connected up to 14.0kW.)

## Various User-friendly Controllers

Page 130~

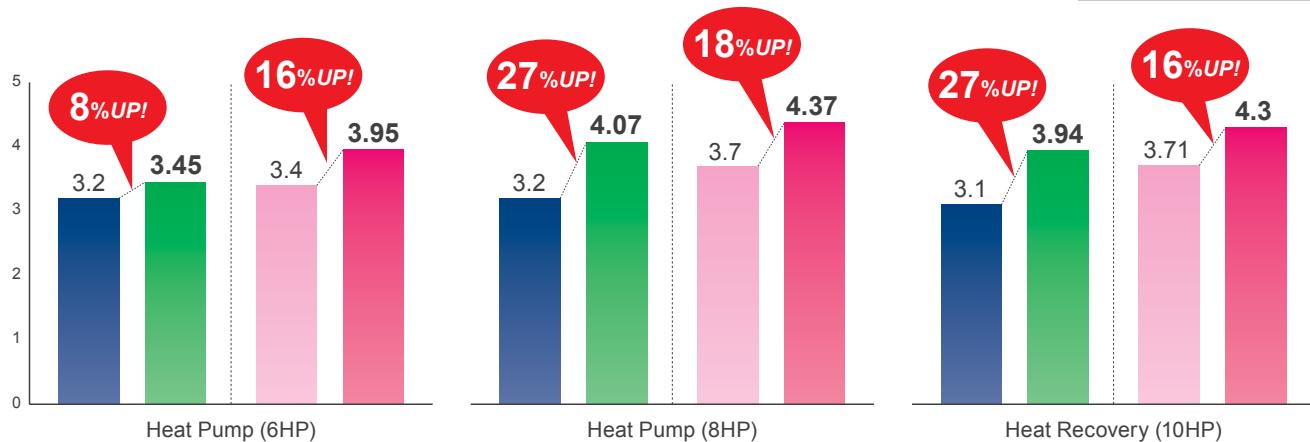

Every user's needs are supported by offering a variety of controls, such as individual control, central control and building management control options.

## Highly Energy Efficiency

Significantly efficiency is improved by using DC twin rotary compressor , inverter technology, and large heat exchanger.

EER COP	

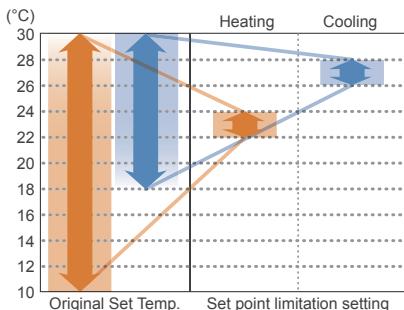

## Features

### Energy Saving Function

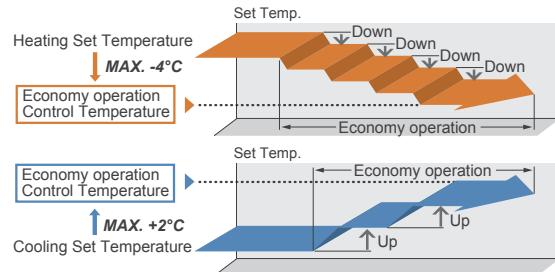

#### Room temperature set point limitation

The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

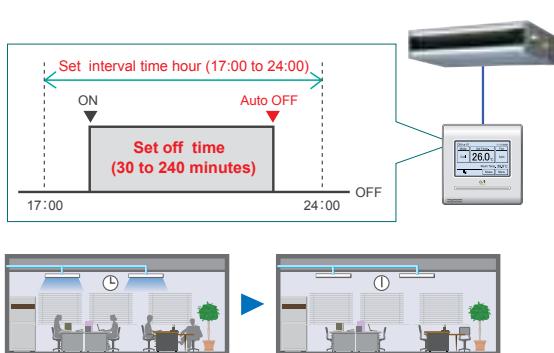

#### Economy operation

Economy operation can be set by remote controller. The temperature setting is offset automatically over a certain period of time.

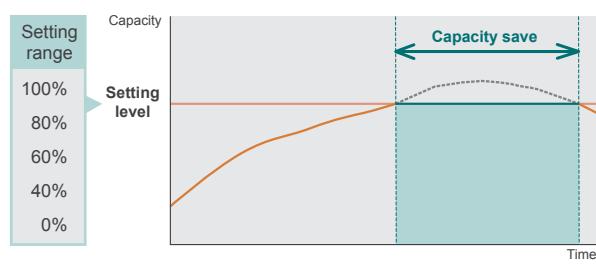

#### Auto-off timer

- The indoor unit automatically is turned off when it reaches to the preset operating time frame.
- The time frame of the "Auto off timer" can be flexibly scheduled.

#### Capacity save operation

Operation capacity can be set in 5 steps for rated capability. The power consumption at peak is cut down and the maximum load is suppressed.

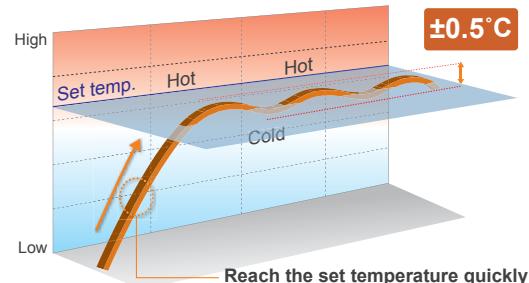

## More Comfort

### Precision refrigerant flow control

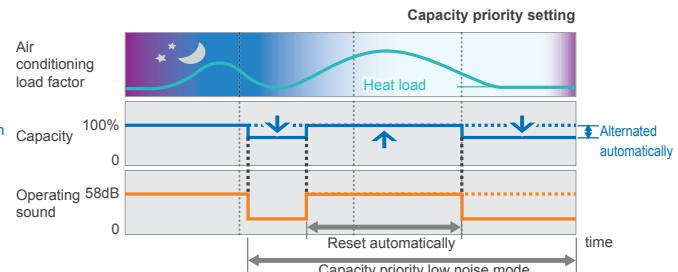

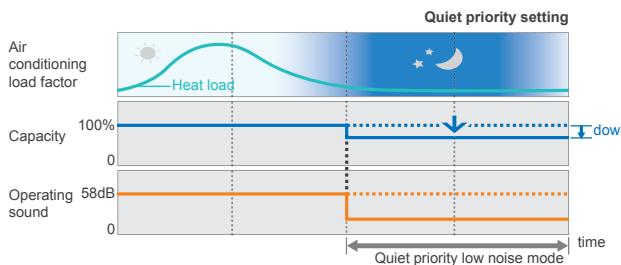

Precision and Smooth refrigerant flow control is achieved by using a DC Inverter control in conjunction with individual indoor unit electronic expansion valve control. This allows for a high precision comfortable temperature control within  $\pm 0.5^{\circ}\text{C}$  of set temperature.

### Quiet operation

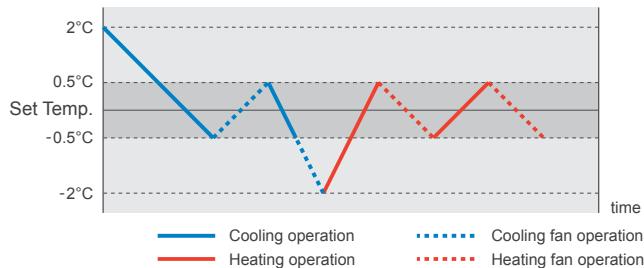

#### For AIRSTAGE V-II,VR-II series

Low noise mode: Two low noise modes can be selected automatically by quiet priority setting and capacity priority setting depending on the usage environment and outside temperature load.

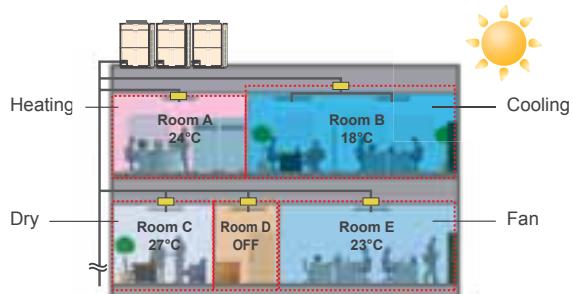

### Auto changeover function

At Auto setting, the cooling/heating mode is automatically switched according to the set temperature and room temperature.

Suitable for especially Heat Recovery type

**Features**

## Design Flexibility

### High capacity connection

#### 4HP-6HP

Airstage J-II series  
Heat Pump type

Connectable indoor unit capacity range  
**50 %\*1 to 130 %**

Connectable indoor unit number  
**up to 9**

#### 8HP-48HP

Airstage V-II series  
Heat Pump type

Connectable indoor unit capacity range  
**50 % to 150 %**

Connectable indoor unit number  
**up to 48**

Airstage VR-II series  
Heat Recovery type

Connectable indoor unit capacity range  
**50 % to 150 %**

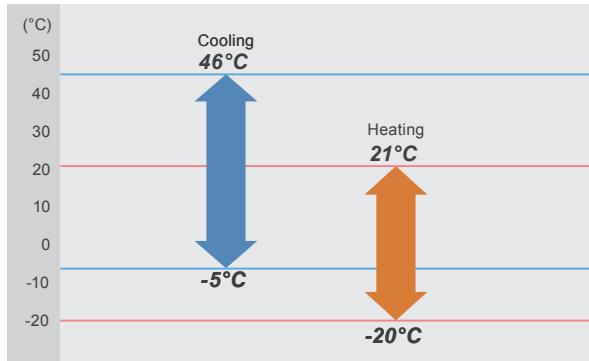

Connectable indoor unit number  
**up to 64**

\*1:Only 4HP is 46%

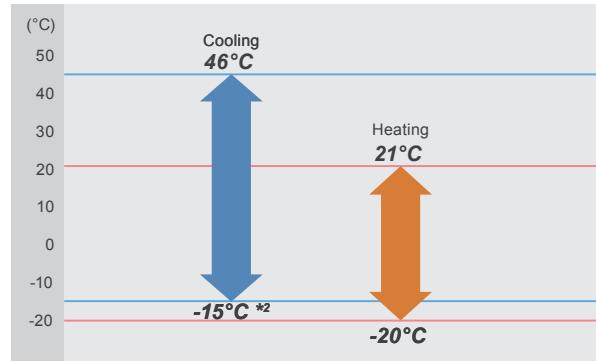

### Wide operating range

Installation in extreme temperature conditions is possible due to an increase in operational range.

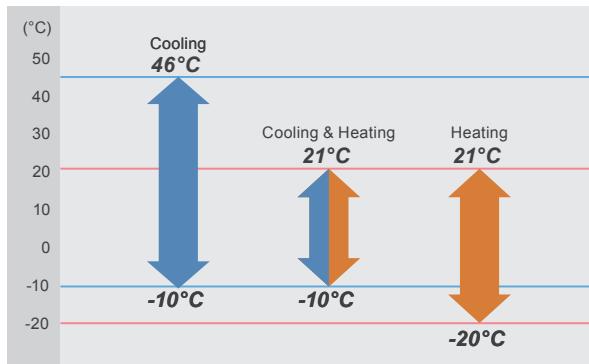

#### Airstage J-II series Heat Pump type

#### Airstage V-II series Heat Pump type

#### Airstage VR-II series Heat Recovery type

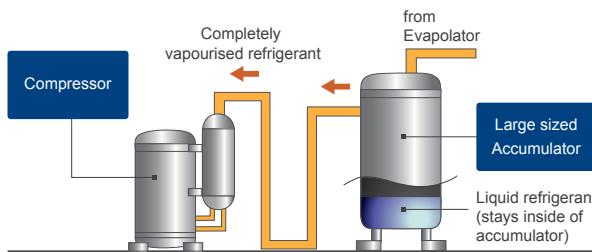

\*2 Note : When a multiple outdoor unit connection is used, operating range is from -5°C to 46°C in cooling.

## High Reliability

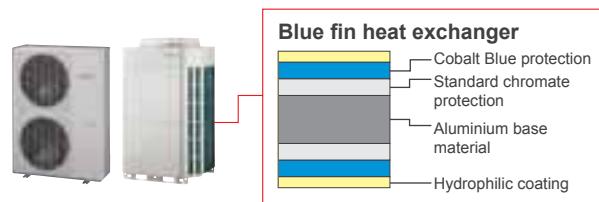

### Liquid back flow protection

By adopting a large sized accumulator, the refrigerant which is not completely vaporized is left inside the accumulator and only a stable gas is fed to the compressor.

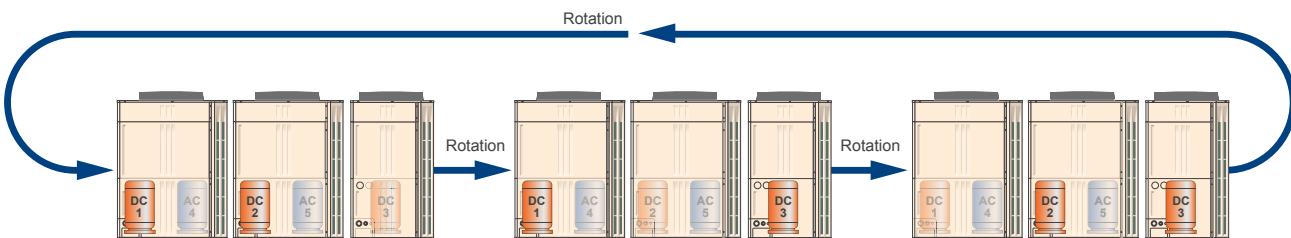

### Adoption of blue fin heat exchanger

Corrosion resistant of the heat exchanger has been improved by the introduction of blue fin treatment to the outdoor unit's heat exchanger.

### Life-extending operation\*3

The compressor starting order is rotated so that the running time is shared.

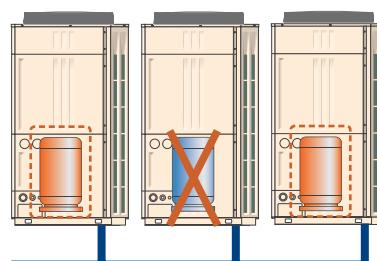

Note: The inverter compressors start in priority. Rotate operation is alternated by the start / stop timing of the compressors

### Backup operation\*3

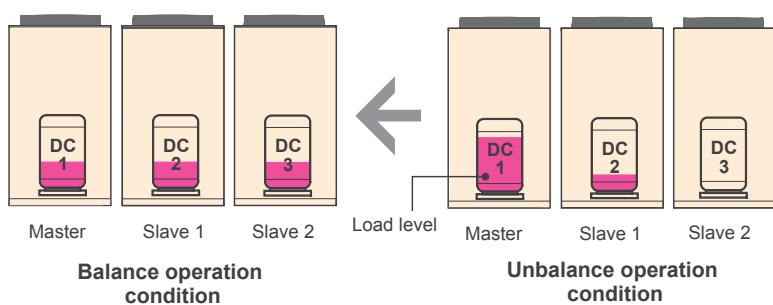

If one compressor fails, backup operation will be performed by the remaining compressors\*.

\*Note: Backup operation may not be possible depending on the trouble state.

### Advanced Refrigerant Control\*3

Innovative compressor control logic has been introduced in order to balance the refrigerant mass flow rate of each outdoor unit by controlling the inverter speed.

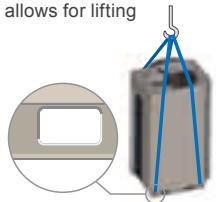

\*3:Not available for AIRSTAGE J-II series

**Features**

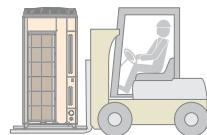

## Easy Installation

### Easily transported

Easily craned using lifting belt hooks  
Design of outdoor unit allows for lifting straps to be used

Transporting by forklift  
Transport with forklift is possible.

Can be transported in a small elevator

### Easy access

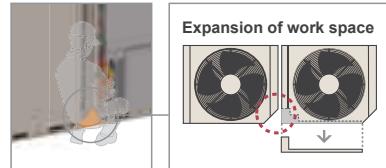

Flexible installation by 4 way pipe direction

Reduced installation intervals by front access

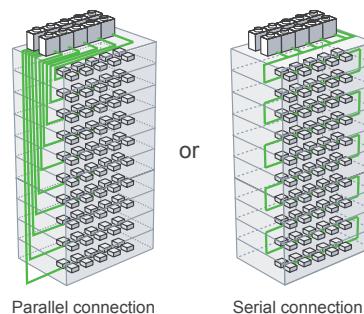

By adopting a L-Shape front panel that can be removed, the work space for installation and service has been significantly expanded by this new design. For multiple installations, work is performed easily and efficiently even in a narrow space.

### Simple wiring work

Installation of the wiring systems is made easier as the communication wiring can be installed continuously between the indoor, outdoor and RB units.

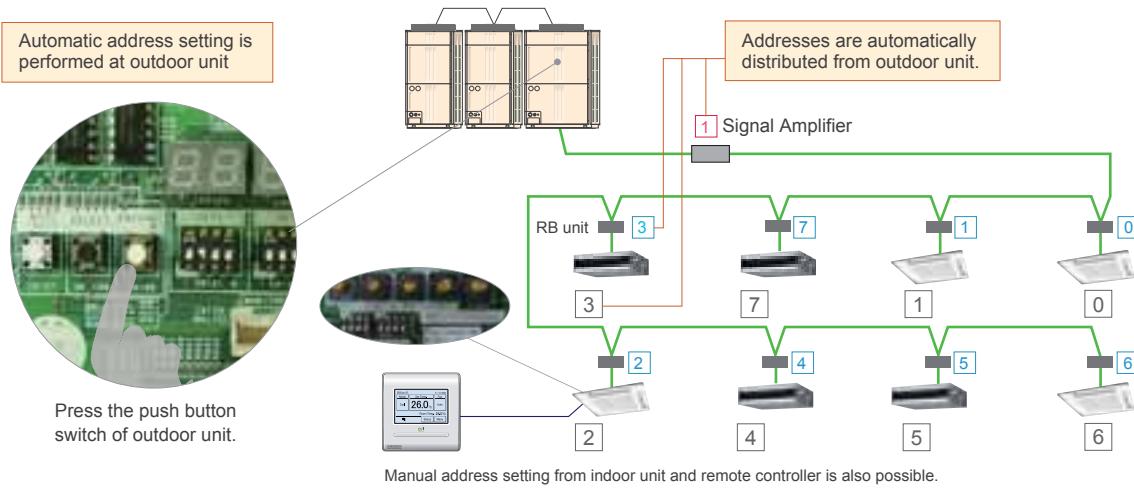

Note: Serial connection can't use the automatic address setting in a multiple refrigerant system.

**Up to maximum length 3,600m**

### Automatic address setting

The address of the indoor unit, RB unit and signal amplifier through the automatic function setting on the outdoor unit PCB.

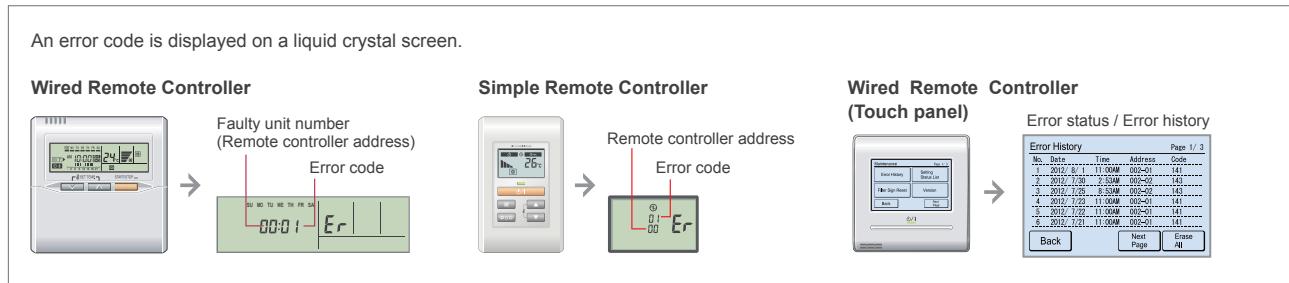

# Easy Service & Maintenance

## Design for Easy Maintenance

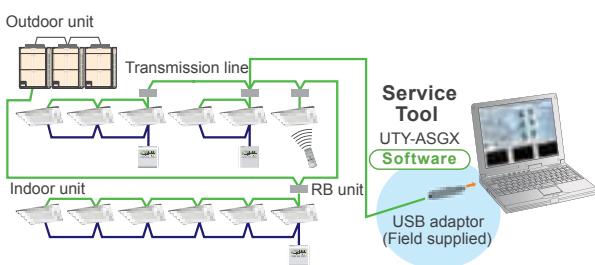

Error status can be checked easily via the indoor unit wired controller

## Trouble diagnosis by Service Tool

### Connection to Service Tool

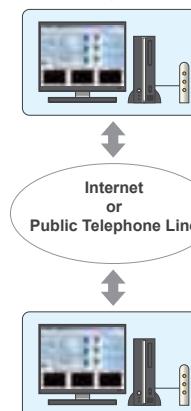

- Detail operation status and recent error history can be checked and analyzed by using the Service Tool.
- Last 5 min. operation memory can be also be recorded.

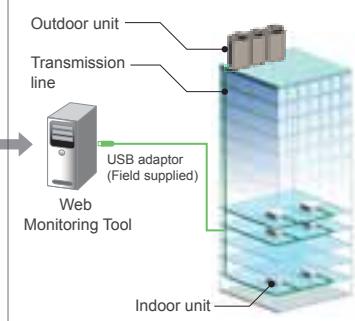

## Remote monitoring

The Web Monitoring system allows you view system operation at all times over the internet ensuring trouble free operation.

### Monitoring Side

### VRF Network System Side

The operating VRF network system in the building can be monitored real time over the Internet.

## Heat pump : AJYA40LALH / AJYA45LALH / AJYA54LALH

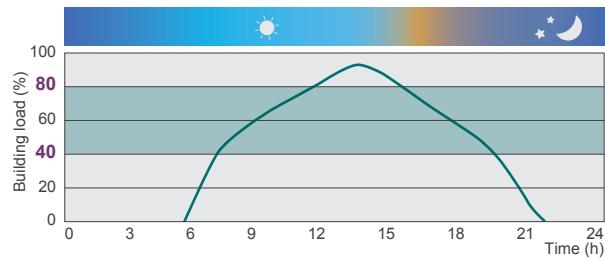

Fujitsu General provides air conditioning systems for a wide range of applications from small office buildings and stores to large houses.

### Features

The building load is the range of almost 40 % to 80%. Therefore, most air conditioners do not operate at maximum load, but operate at low to medium loads. Especially, for multi system, operation performance at partial load is important because all the air conditioners do not always operate all the time. Aiming at energy saving performance matched to actual operation, Fujitsu General has developed a high intermediate performance air conditioner corresponding not only to the rated performance at 100% load, but also to low to medium load

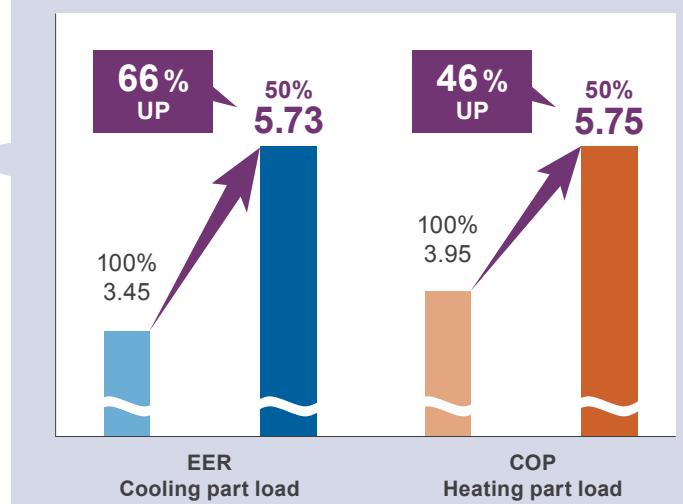

### Load curve (a typical office building)

### High EER / COP

### High part load performance (6HP class)

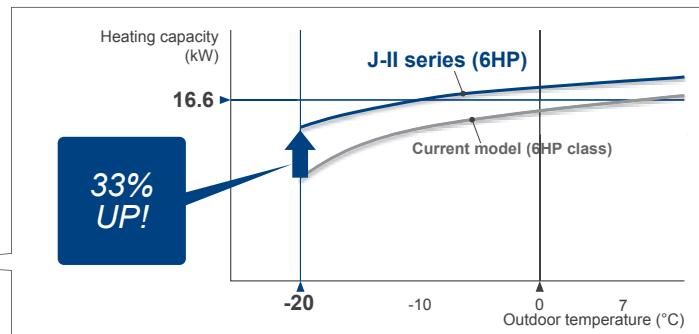

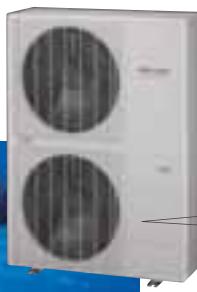

Conditions : Connected indoor units: AUXA30GALH+AUXD24GALH  
 Cooling : indoor temp. of 27°CDB / 19°CWB, outdoor temp. of 35°CDB / 24°CWB  
 Heating : indoor temp. of 20°CDB / 15°CWB, outdoor temp. of 7°CDB / 6°CWB

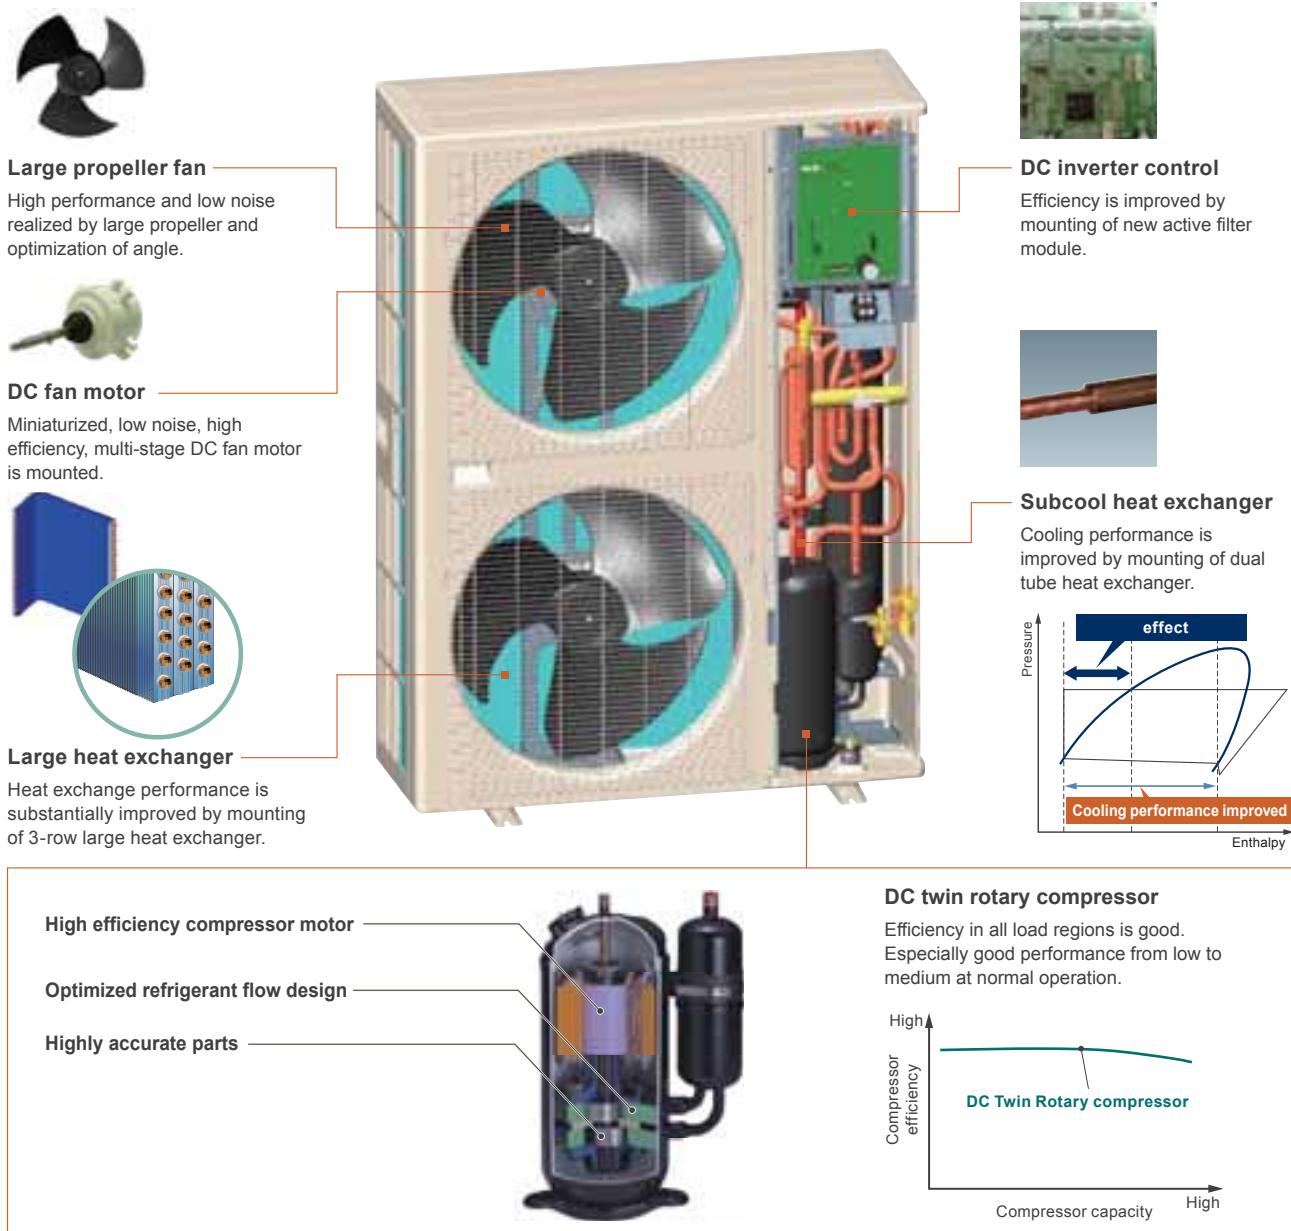

## Features

### Powerful Heating

Heating capacity is improved at low outdoor temperature by our advanced technology.

### Advanced high efficiency technology

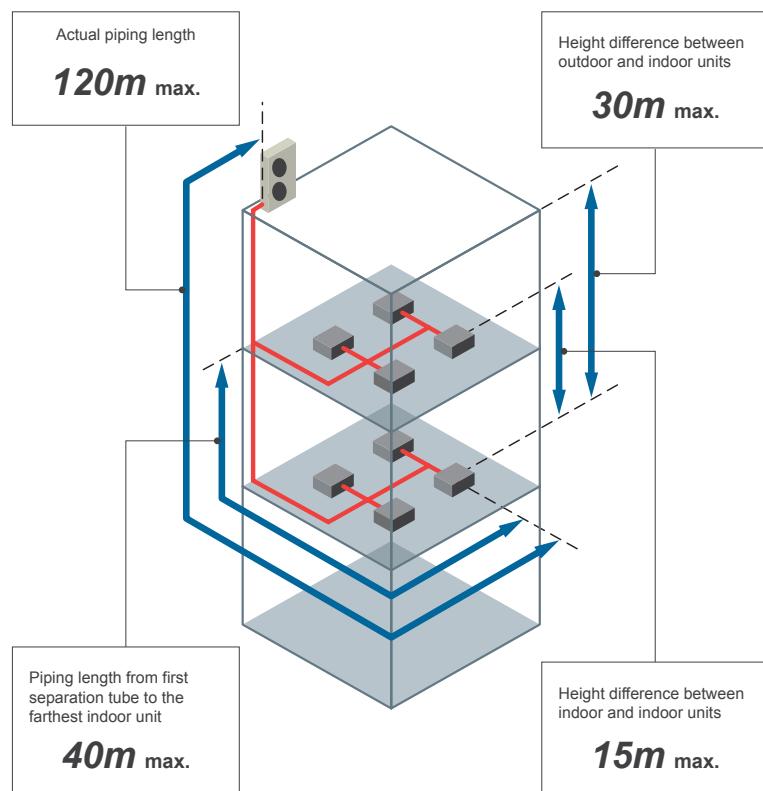

## Features

### Long Piping Length

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 180 m. This opens up new possibilities in system design.

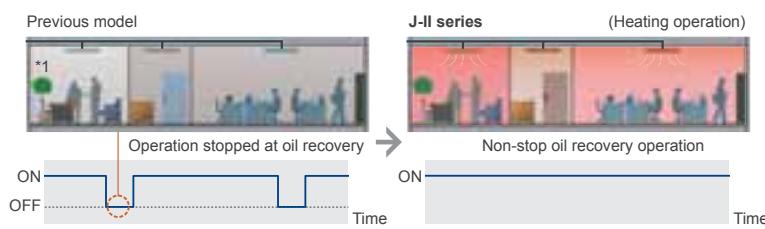

Total pipe length  
**180m max.**

### More Comfort

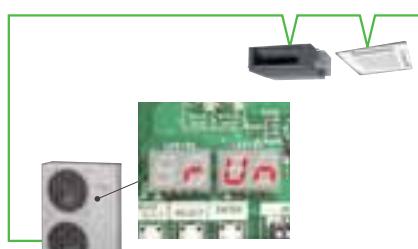

#### Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

#### Easier Installation

**Connection check function :** Possible to confirm whether wiring connection and address setting are correct by a quick check run function.

- Display connected indoor unit numbers
- Duplicately set address number of indoor unit can be displayed

## Specifications

Rating Capacity range	HP	4	5	6

	Gas mm	ø15.88	ø15.88	ø19.05
Operation range	Cooling °C	-5 to 46	-5 to 46	-5 to 46
	Heating °C	-20 to 21	-20 to 21	-20 to 21

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

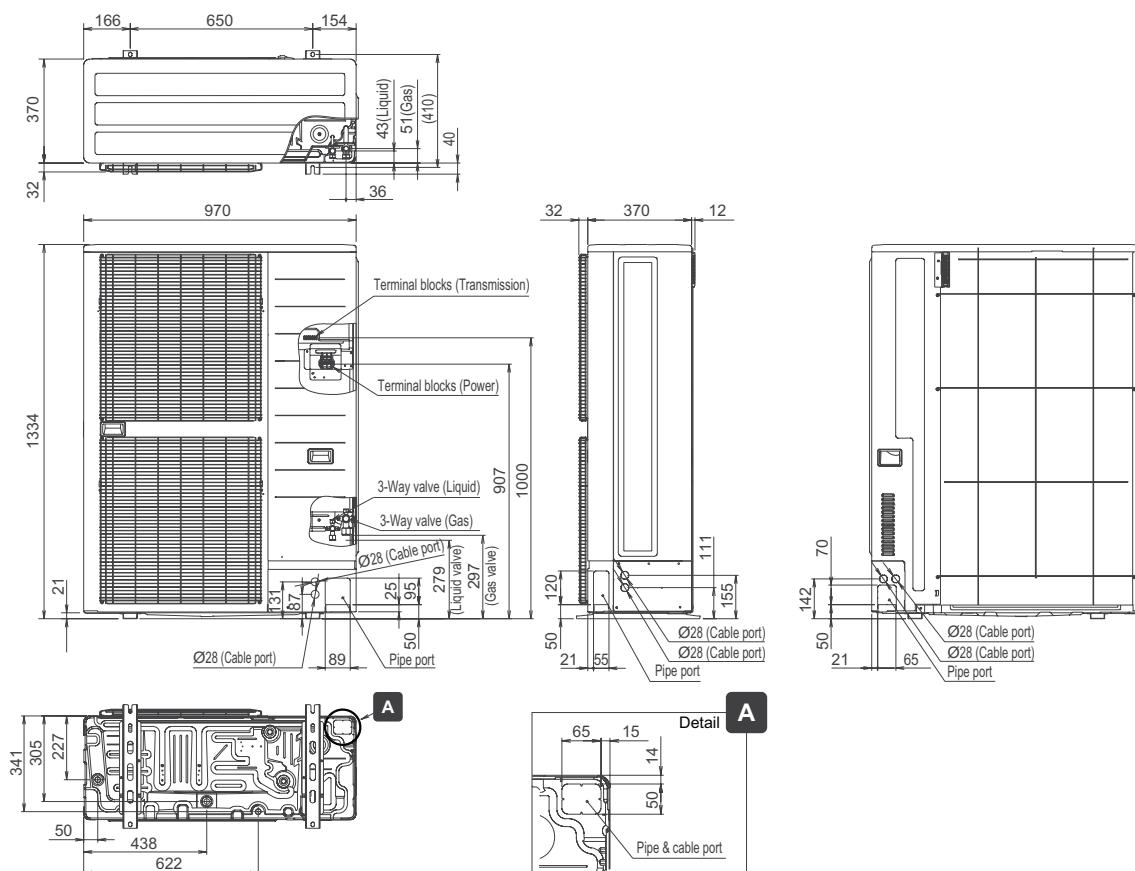

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

The protective function may work when using it outside the operation range.

## Dimensions

(Unit : mm)

Model : AJYA40LALH / AJYA45LALH / AJYA54LALH

## Heat pump

Smart and cutting edge design  
 Extensive lineup from 8HP to 48HP in 2HP increment  
 Connectable indoor unit capacity ratio up to 150%

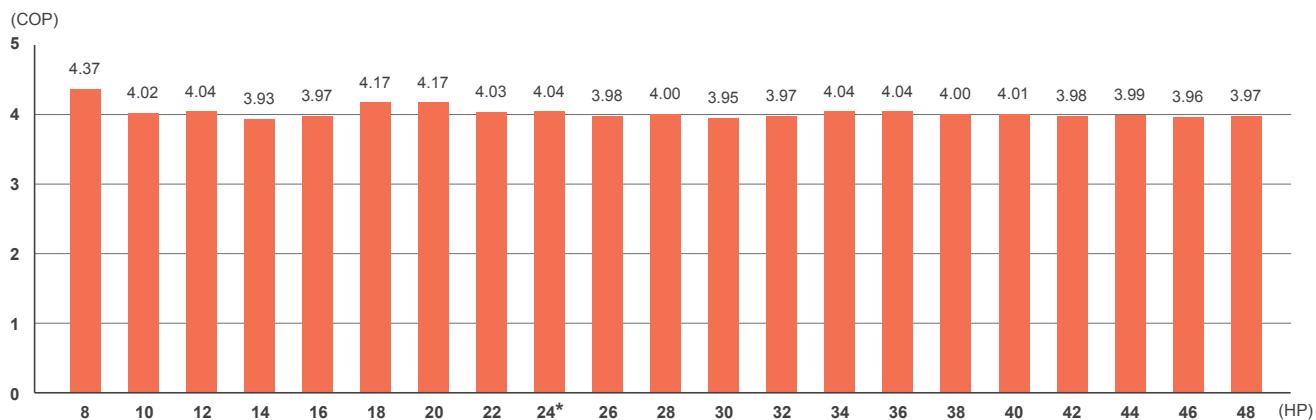

## Features

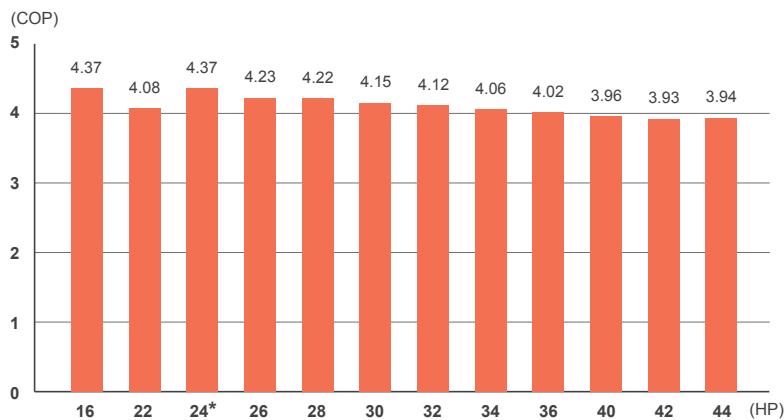

## Efficiency in actual operation

Top class high COP is realized for all combinations by our unique heat exchanger structure, high efficient DC twin compressor, and other our own technologies.

## Space saving combination

## Energy efficiency combination

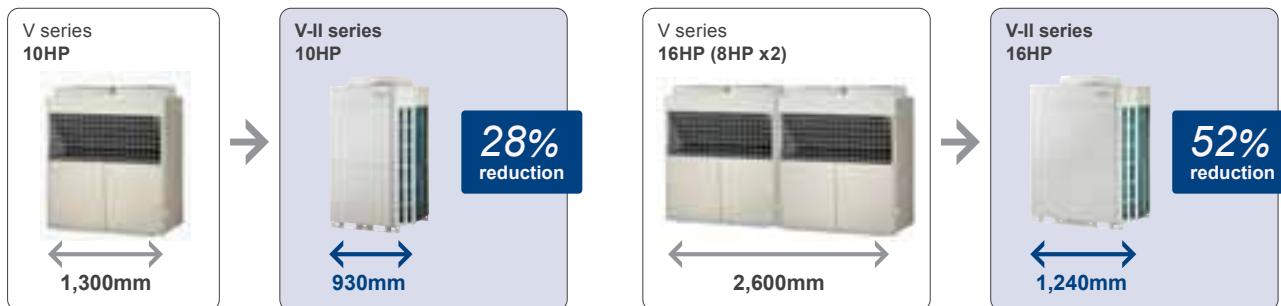

### For 24 HP Combination

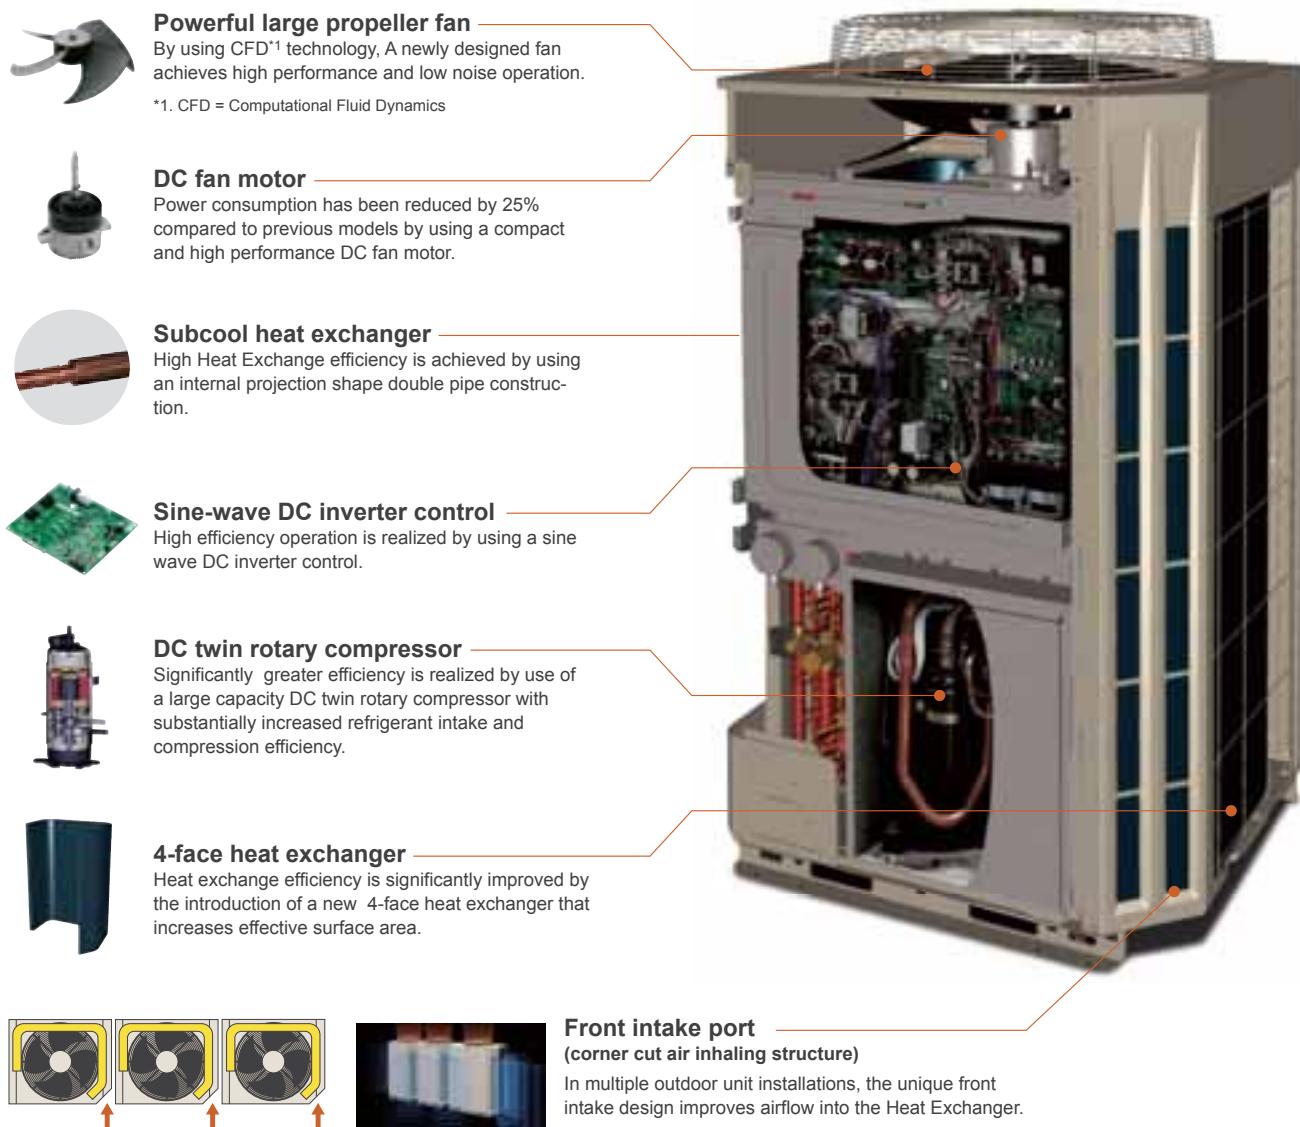

## Features

### Space saving and compact size

Compact size has been achieved by significantly reducing the width of the outdoor units compared to previous models.

### Energy saving technology that boosted operation efficiency

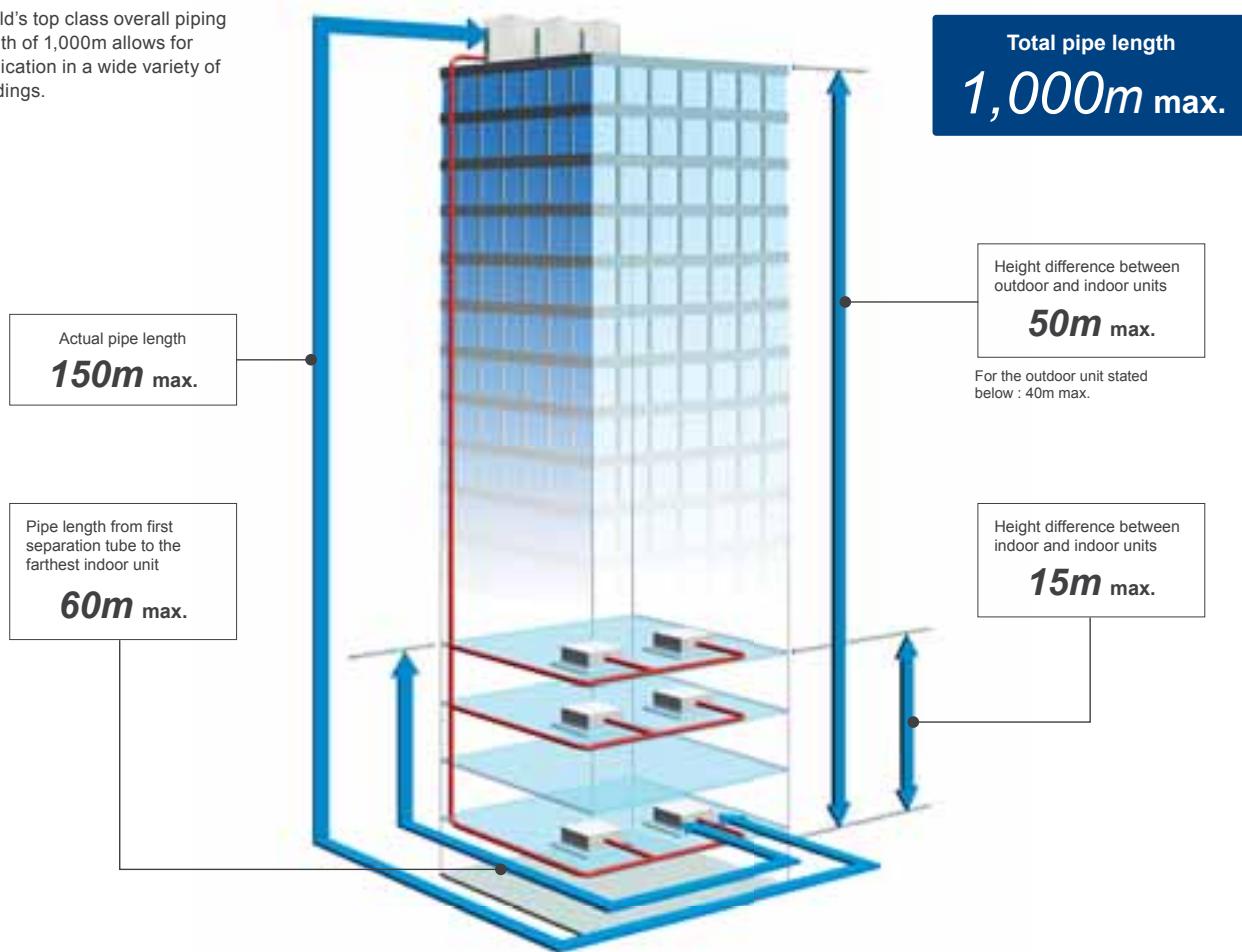

## Features

### Design Flexibility

#### Overall piping length 1,000m

World's top class overall piping length of 1,000m allows for application in a wide variety of buildings.

#### High static pressure of 80Pa

The outdoor unit can have a condenser hood easily connected with a static pressure of 80Pa standard. This allows outdoor units to be installed within plant rooms in high rise buildings.

Powerful discharge with an external static pressure of 80Pa.

**80Pa**  
as standard

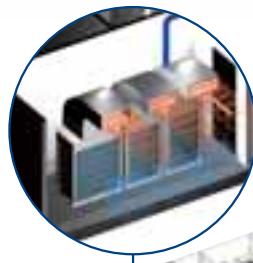

Previous model

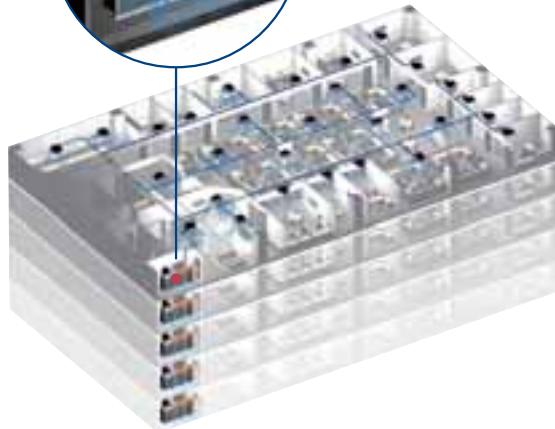

V-II series

Large diameter fan and DC motor has been utilized allowing an external static pressure of 80Pa. This is approximately 2.6 times greater than the previous model.

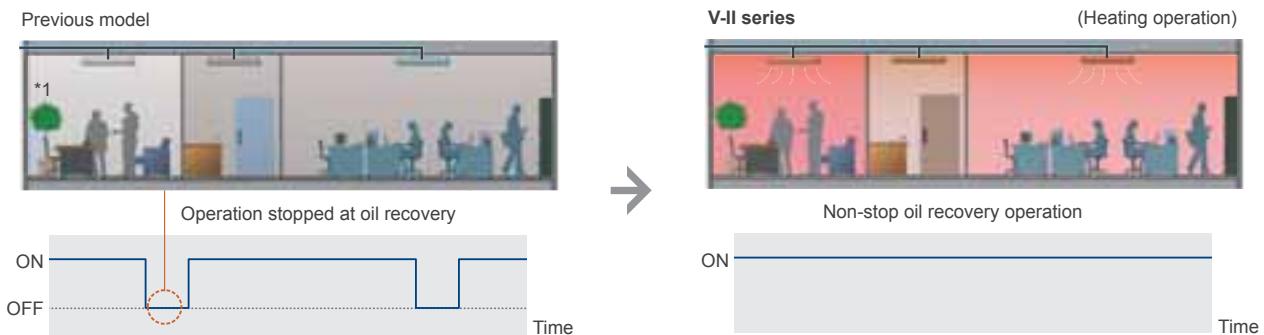

Installation Example

## More Comfort

### Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

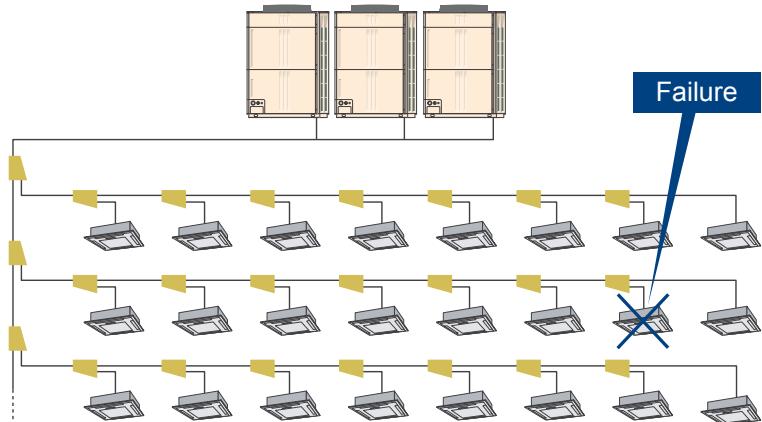

## Easy Service & Maintenance

Maintenance of electrical components, valves, and compressor parts from the front is possible.

### Indoor unit continuous operation

Each indoor unit is controlled individually on the system network. This allows all indoor units to continue to operate unaffected even if an error should occur at any indoor unit's on the VRF network system.

### Outdoor units lineup

	Heating	-20 to 21	-20 to 21	-20 to 21	-20 to 21	-20 to 21	-20 to 21

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C, the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

\*1 Minimum connectable indoor unit number is 2.

However ARXC72 and ARXC90 can be used signal connection.

\*2 The noise value is the value when measured in an anechoic room.

When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

### NEW Heat Recovery

Smart and cutting edge design  
 Extensive lineup from 8HP to 48HP in 2HP increment  
 Connectable indoor unit capacity ratio up to 150%

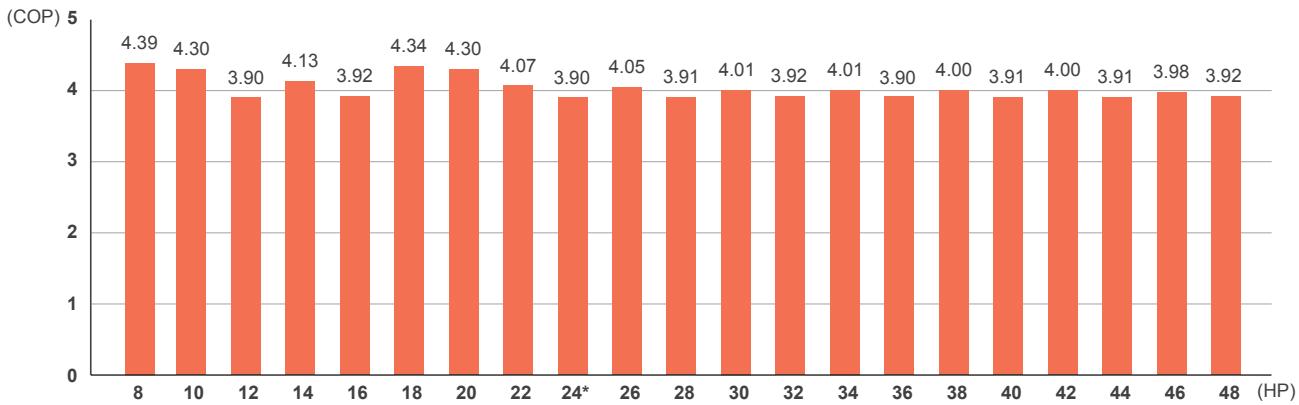

### Features

## High Efficiency

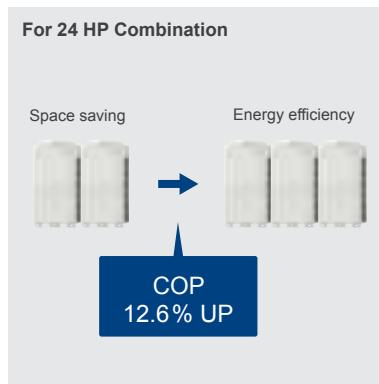

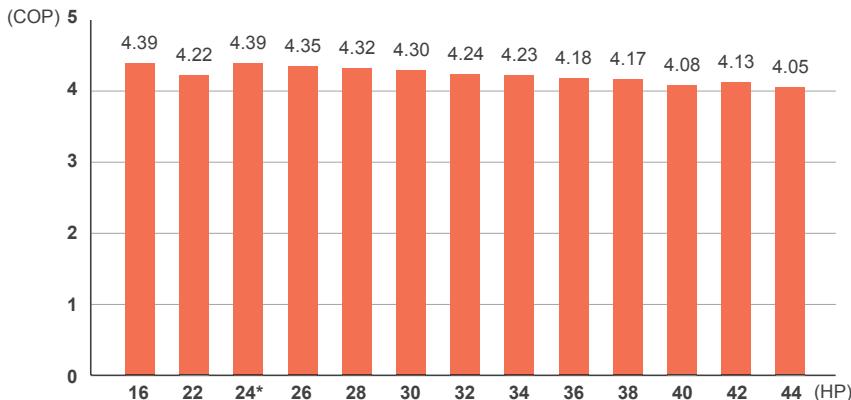

### Efficiency in actual operation

Top class high COP is realized for all combinations by our unique heat exchanger structure, high efficient DC twin compressor, and other our own technologies.

#### Space saving combination

#### Energy efficiency combination

## Features

### Energy saving technology that boosted operation efficiency

#### Powerful large propeller fan

By using CFD<sup>1</sup> technology, a newly designed fan achieves high performance and low noise operation.

\*1. CFD = Computational Fluid Dynamics

#### 3 phase DC fan motor

Efficiency is substantially improved by high efficient motor with sophisticated driver control. In addition, low noise is realized by DC fan motor.

#### Subcool heat exchanger

High Heat Exchange efficiency is achieved by using an internal projection shape double pipe construction.

#### Sine-wave DC inverter control

High efficiency is realized by adoption of reduced switching loss IPM.

#### High efficient compressor

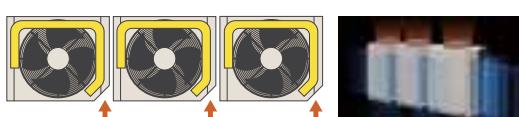

#### Large capacity DC inverter compressor

Large capacity high efficient DC twin rotary compressor with excellent intermediate capability.

#### 4-face heat exchanger

Heat exchange efficiency is significantly improved by the introduction of a new 4-face heat exchanger that increases effective surface area.

#### Front intake port

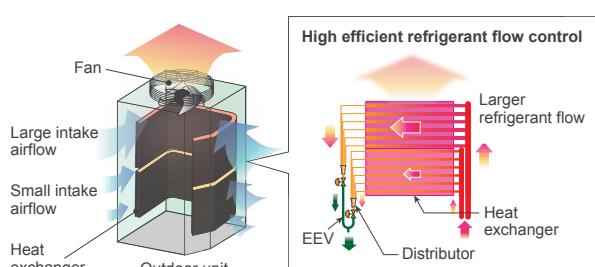

#### (corner cut air inhaling structure)

In multiple outdoor unit installations, the unique front intake design improves airflow into the Heat Exchanger.

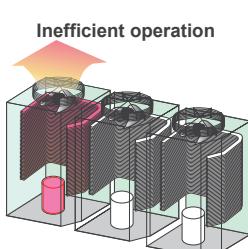

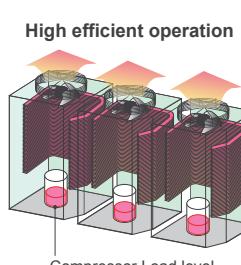

### Ideal heat exchanger path control

Heat exchanger is split into top and bottom. Heat exchange efficiency is improved by optimum heat exchanger path refrigerant control. Refrigerant is more distributed at the top side heat exchanger with a large intake airflow.

### Sophisticated operation control

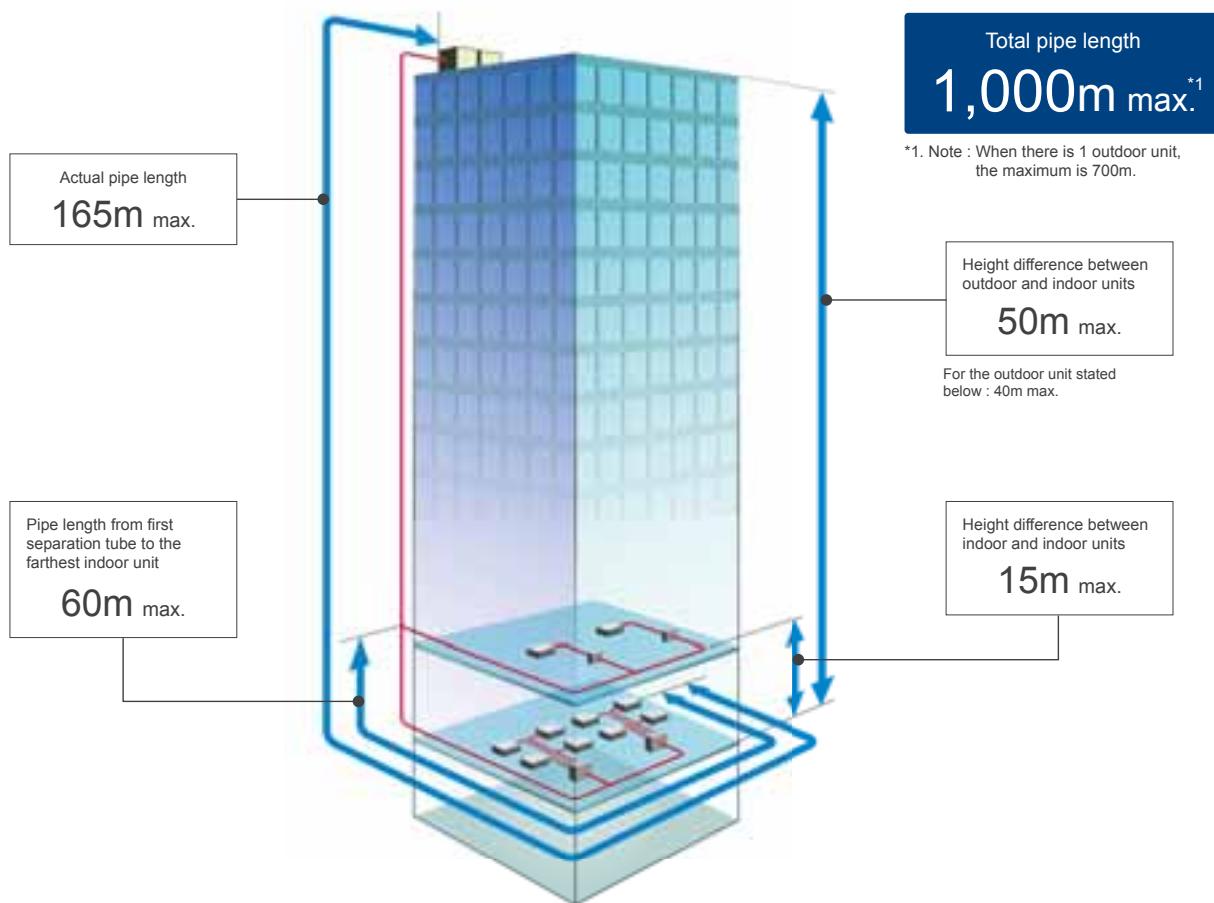

When multiple outdoor units are connected, sophisticated operation is performed by each compressor. Efficiency is improved by all compressors at part load and distributing refrigerant to all of the heat exchangers rather than to one compressor.

Features

## Design Flexibility

Overall piping length 1,000m

## High static pressure of 80Pa

Large diameter fan and 3 phase DC motor has been utilized allowing an external static pressure of 80Pa. This allows outdoor units to be installed on balconies, etc. on each floor in high rise buildings.

Powerful discharge with an external static pressure of 80Pa.

80 Pa  
as standard

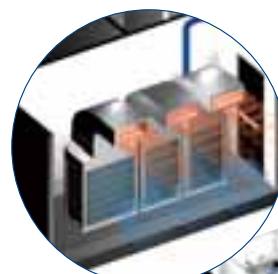

Previous model

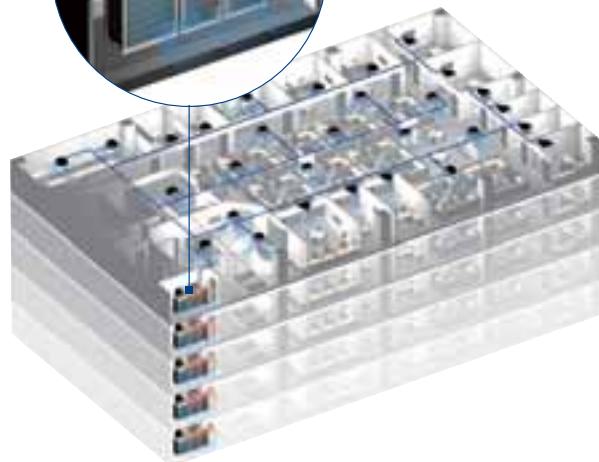

V-II series

Large diameter fan and DC motor has been utilized allowing an external static pressure of 80Pa. This is approximately 2.6 times greater than the previous model.

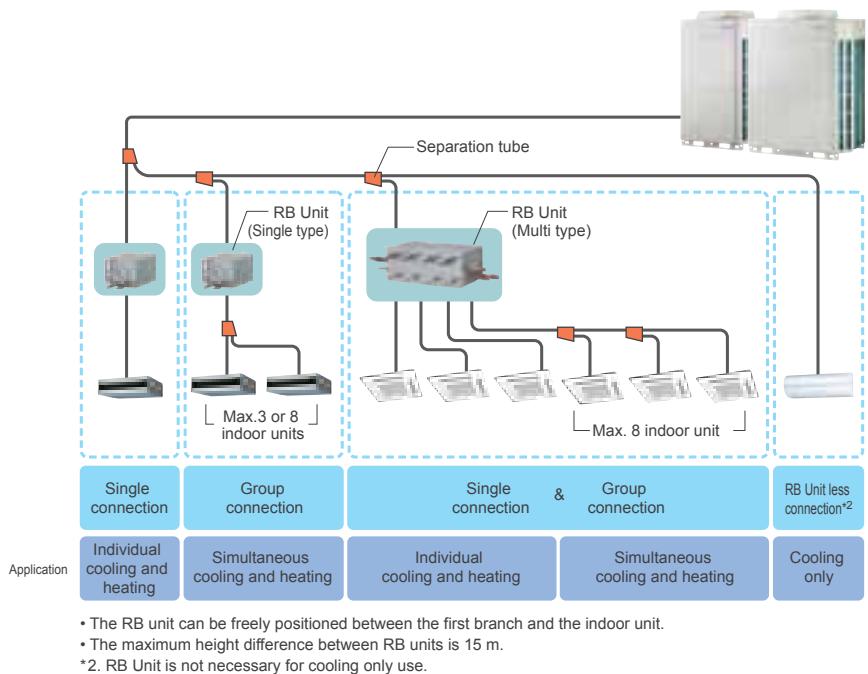

Installation Example

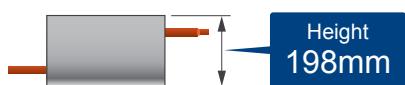

## Flexible piping connection

A more flexible refrigerant piping work is possible by the use of various piping and RB Unit connections, for adjustments to the floor layout and building structure.

## Easy Installation & Maintenance

### Flexible installation of RB unit

- Small & slim design saves space
- A drain pipe is not required
- The control box position can be changed to meet the installation conditions

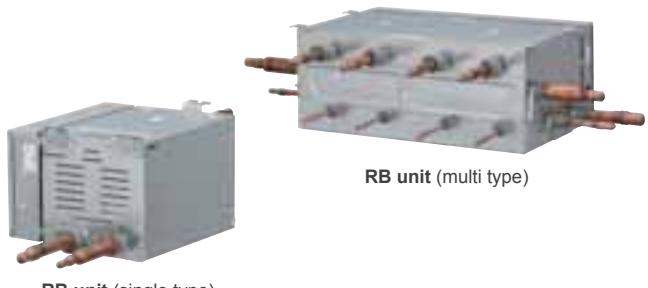

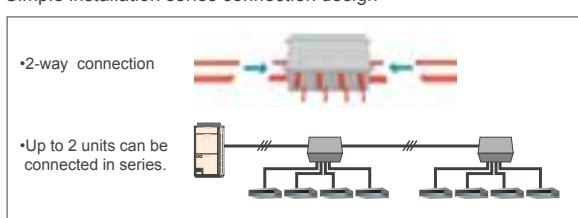

Installation possible from either side for freedom of the control box

Installation possible on the upper-side for use in narrow space

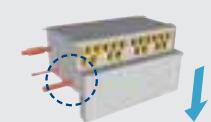

- Small design saves space
- A drain pipe is not required
- Simple installation series connection design

### Easy to maintenance in a narrow space

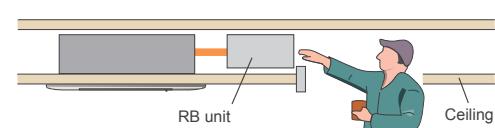

- Maintenance can be performed from the side.

- Electric box can be temporarily fixed by sliding down.

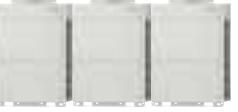

- Parts can be replaced easily even at narrow space in the ceiling.

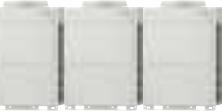

**Outdoor units lineup**

•Combinations other than the followings are not recommended.

	Heating		-20 to 21	-20 to 21	-20 to 21	-20 to 21	-20 to 21	-20 to 21		
	Cooling/Heating		-10 to 21	-10 to 21	-10 to 21	-10 to 21	-10 to 21	-10 to 21		

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C,

the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

\*1 Minimum connectable indoor unit number is 2.

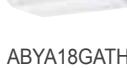

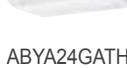

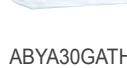

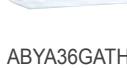

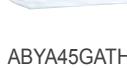

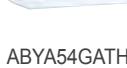

\*2 The noise value is the value when measured in an anechoic room.  
When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

**Indoor Unit Lineup**

12 Types, 55 Models, Capacity range from 1.1kW to 25.0kW

Capacity range (kW)		1.1	2.2	2.8	3.6	4.5
Model code		4	7	9	12	14
<b>Cassette</b>	Compact Cassette	 <b>NEW</b>				
	Cassette					
<b>Duct</b>	Low Static Pressure Duct					
	Slim Duct (Drain pump internal)	 <b>NEW</b>				
	Medium Static Pressure Duct					
	High Static Pressure Duct					
<b>Floor</b>	Floor (*Same as Ceiling models)					
	Concealed Floor (*Same as Low Static Pressure Duct models)					
	Slim Concealed Floor (*Same as Slim Duct models)	 <b>NEW</b>				
<b>Ceiling</b>	Ceiling					
<b>Wall Mounted</b>	Wall Mounted	 <b>NEW</b>				
	Wall Mounted (EEV external)	 <b>NEW</b>				

With this model, connection of EV kit is necessary.

# Controller

## NEW Wired Remote Controller (Touch Panel) : UTY-RNRY

Easy operation by high-definition large STN-LCD touch panel screen

- Easy finger touch operation with LCD panel
- Built-in weekly/Daily timer(ON/OFF,Temp.,Mode)
- Backlight enables easy operation in a darkened room
- Room temperature display
- Control up to 16 indoor units
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

Max. controllable  
**16**  
Indoor units

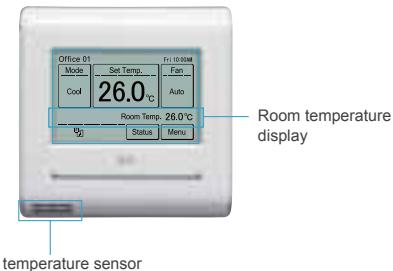

## High performance and compact size

In addition to the individual control, various energy saving controls can be realized using one remote controller only.

## Accurate and comfortable control

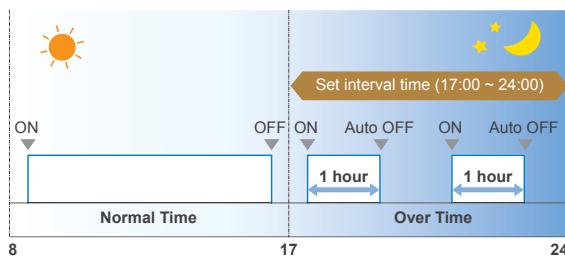

Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller.

## Various energy saving control

### Auto OFF timer

- The indoor unit automatically is turned off when it reaches to the preset operating time frame.
- The time frame of the "Auto off timer" can be flexibly scheduled.
- Can be set off time 30 ~ 240 minutes

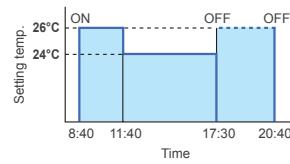

Ex.) At interval time hour (17:00 to 24:00) to prevent forgetting to turn off  
Set off time : 1 hour

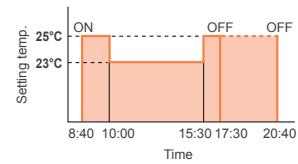

### 2 schedules Weekly Timer

- 2 schedules such as for the summer and winter can be set.
- 8 setting changeable per day of week (Setting items: On/Off, Temperature, Mode, Time)

#### Schedule 1 (Summer schedule)

#### Schedule 2 (Winter schedule)

### Set Temperature Auto Return

The setting temperature automatically returns to the previous setting temperature. The time range in which the set temperature can be changed is 10 to 120 minutes.

### Set Temperature Upper and Lower Limit Setting

The set temperature range can be set for each operation mode.  
(Cooling / Heating / Auto)

## Specifications

Model name	UTY-RNRY
Power Source	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 20.4
Weight (g)	220

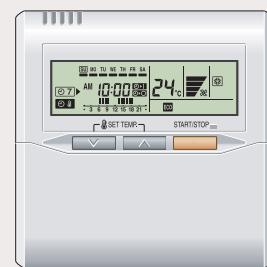

DC12V is supplied by the indoor unit.

Max. controllable  
**16**  
Indoor units

### Wired Remote Controller : UTY-RNKY

The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

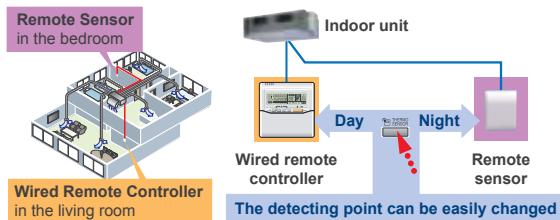

- Simple operation with Built-in Weekly / Daily Timer.
- Control up to 16 indoor units.
- Up to 2 wired remote controllers can be connected to a single indoor unit.

### Accurate and comfortable

Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller. This new wired remote controller and the optional remote sensor allows flexibility in sensor location, suitable for all requirements.

#### Example of changing sensor

Displayed temperature is set temperature.

### Built-in timers

**Weekly timer:** Possible to set ON/OFF time to operate twice each day of the week.

**Setback timer:** Possible to set temperature for two times spans and for each day of the week.

At "Weekly timer" + "Set back timer" setup

### Diagnosis check function

Two methods are available for determining the cause of failure in the event of a malfunction occurs:

### Simple installation

Components are compatible with standard switch boxes. Flat back surface allows to be installed wherever it is needed.

Max. controllable  
**16**  
Indoor units

### Simple Remote Controller :

UTY-RSKY / UTY-RHKY (Without operation mode)

Compact remote controller provides access to basic functions

- Up to 16 indoor units can be controlled with one remote controller.
- Suitable for hotels or offices as it is easily operated with no complex functions.

### User-friendly operation

- A large On / Off button is provided in the centre of the remote controller for easy operation.
- Background light enables easy operation in a darkened room.
- Following an error display, diagnostics can be carried out on the controller.

### Functions

Model	UTY-RSKY	UTY-RHKY
On / Off	●	●
Fan control	●	●
Operation mode	●	— *1
Room temp. setting	●	●

\*1: "Operation mode" setting is not available. It is recommend to use together with other type controller.

### Specifications

Model name	UTY-RNKY	UTY-RSKY	UTY-RHKY
Power Source	DC 12V	DC 12V	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 18	120 x 75 x 14	120 x 75 x 14
Weight (g)	160	90	90

DC12V is supplied by the indoor unit.

# Controller

## Wireless Remote Controller : UTY-LNHY

Max. controllable  
**16** indoor units

Selectable  
**4** daily timers

Simple and sophisticated operations with a choice of 4 daily timers

- A single controller controls up to 16 indoor units.

## Built-in timers

### Select from 4 different timer programs:

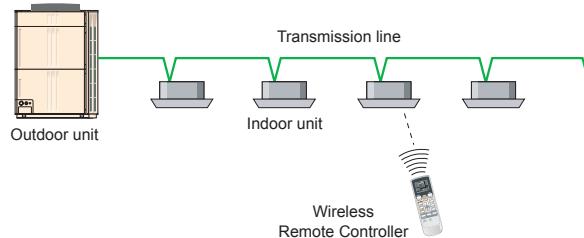

On / Off / Program / Sleep

**Program timer:** The program timer operates the ON and OFF timer once within a 24 hour period.

**Sleep timer:** The sleep timer function automatically corrects the set temperature according to the time setting to prevent excessive cooling or heating during sleep hours.

## System addressing

During installation work, system addressing can be performed using the Wireless Remote Controller, thus eliminating manual switch setting.

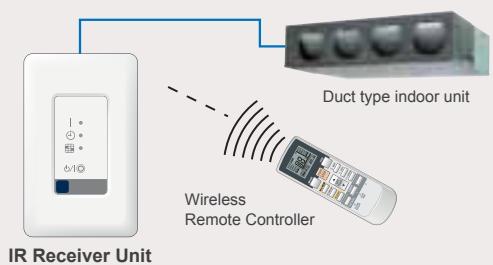

## Easy installation and operation

• Code selector switch prevents indoor unit mix-up. (Up to 4 codes can be set.)

• Wide and precise transmitting range.

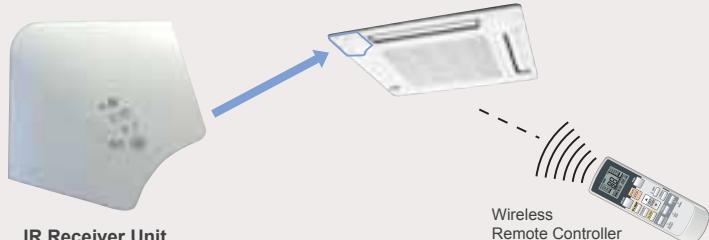

## IR Receiver Unit : UTB-YWC

Necessary to control for all duct type by Wireless Remote Controller

## IR Receiver Unit : UTY-LRHYB1

Cassette type indoor unit can be controlled with Wireless Remote Controller

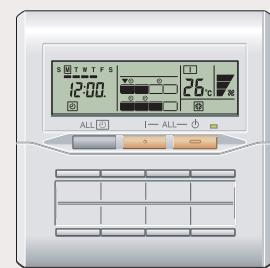

## Specifications

Model name	UTY-LNHY	UTB-YWC	UTY-LRHYB1
Battery	1.5V (R03 / LR03 / AAA) x 2	DC 12V	DC 12V
Dimensions (H x W x D) (mm)	170 x 56 x 19	145 x 90 x 30	193.9 x 193.9 x 31.2
Weight (g)	85	150	140

DC12V is supplied by the indoor unit.

## Group Remote Controller : UTY-CGGY

Max. controllable  
**64**  
group R.C.  
in a VRF  
network system

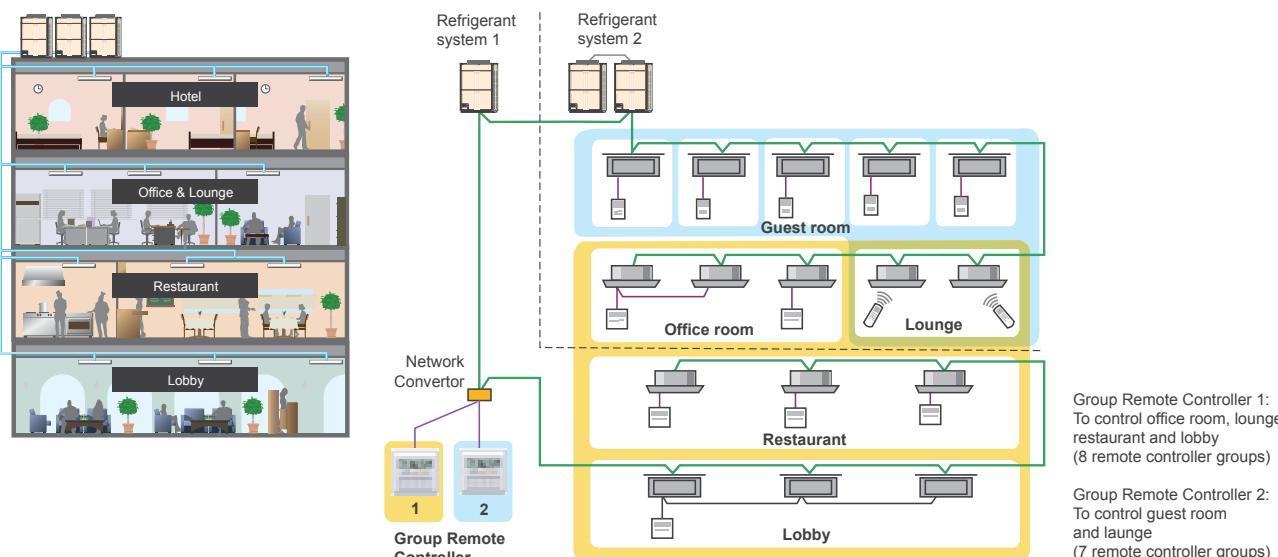

Max.  
controllable  
**8**  
remote  
controller groups

Group control of indoor units with simple operation

- Up to 8 remote controller groups can be controlled by one Group Remote Controller.
- Up to 64 Group Remote Controllers can be connected in one VRF network system.
- Network Convertor is required to connect Group Remote Controllers to a VRF network system. (Network Convertor allows up to 4 Group Remote Controllers)

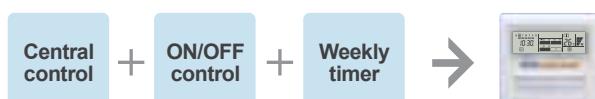

## Control up to 8 remote controller groups

- Single Group Remote Controller controls and monitors up to 8 remote controller groups.

## High performance and compact size

ON / OFF, Operating mode, Room temperature and Fan speed setting can be controlled / monitored centrally or individually.

## Built-in weekly timers

The weekly timer is provided as a standard function.

- The timer can be set up for up to 4 times per day. (On / Off, operating mode, set temperature)
- Allows separate settings for each day of the week.

## Specifications

Model name	UTY-CGGY
Power Supply	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 18
Weight (g)	200

DC12V is supplied by the indoor unit.

# Controller

**Central Remote Controller : UTY-DCGY**

Central Remote Controller fits small- and medium-sized buildings and tenants.

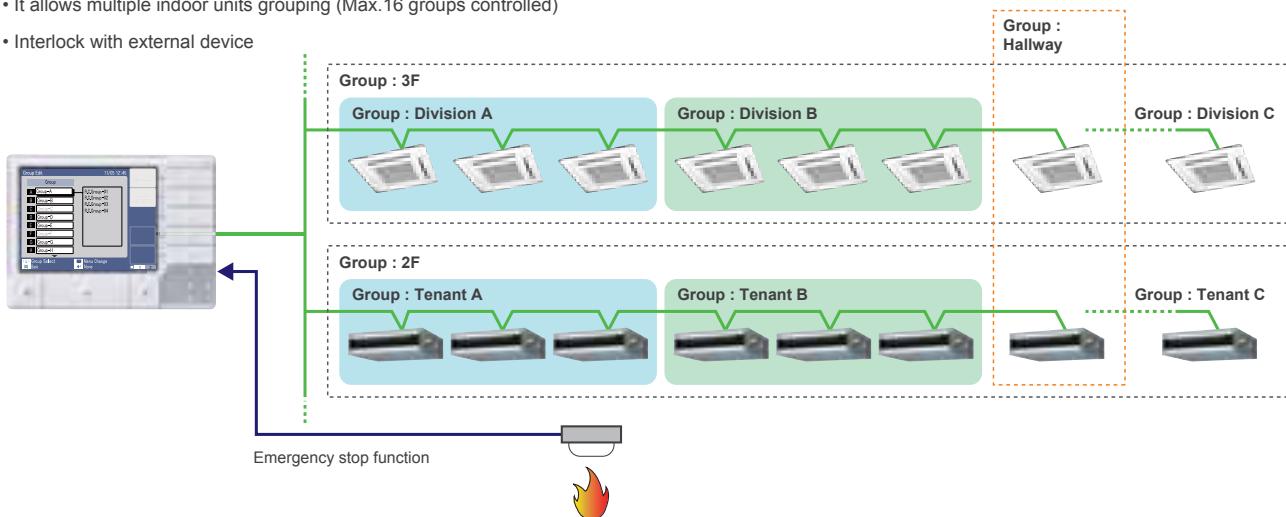

- Individual control and monitor of 100 indoor units
- 5 inch TFT color screen
- User friendly view and easy operation
- External input / output contact
- Detachable power supply unit
- Corresponds to 7 different languages like English, Chinese, French, German, Spanish, Russian, Polish.

**Max. controllable 100 indoor units**

**Max. controllable 16 groups**

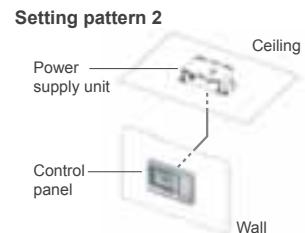

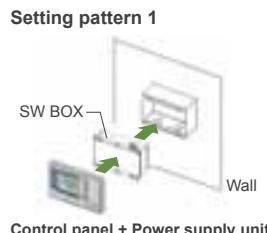

## System overview

- It allows multiple indoor units grouping (Max.16 groups controlled)
- Interlock with external device

## Easy Installation

- The control panel and power supply unit can be installed separately.
- For flexibility in installation, the Control panel can be built into the wall or fix on the wall.

## Functions

- Diverse control of indoor units
- Automatic clock adjustment
- Weekly timer
- Error history

## Specifications

Model name	UTY-DCGY	
	Control Panel	Power Supply Unit
Power Supply	DC 5 V	100-240V, 50-60Hz, Single phase
Dimensions (H x W x D) (mm)	120 x 162 x 25.7	99 x 135 x 39.2
Weight (g)	308	355

## <PACKING LIST>

Packing List	Control Panel / Power Supply Unit / Connecting cable, etc.
--------------	--

Max.  
controllable  
**400**  
Indoor units

## Touch Panel Controller : UTY-DTGY

- Large-sized 7.5-inch TFT color
- LCD Easy finger touch operation
- Stylish shape and design to suit all application
- No additional component is required for installation
- Up to 400 indoor units can be controlled
- Selectable 2 display types (Icon / List) in monitoring mode
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

## Easy operation

- Wide range of simple-to-understand icons
- Operation can be selected using your finger or the dedicated touch pen by pressing the appropriate on-screen icon
- Up-to-date status display
- Background color identifies current control operation blue for monitoring, green for operational control

## Functions

Individual control

Flexible grouping

Schedule control

Indoor units operation monitoring

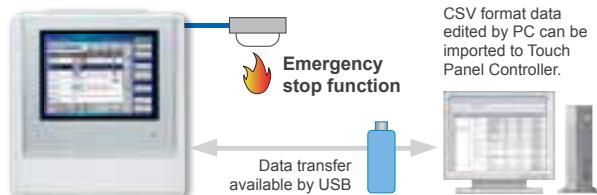

## Automatic clock adjustment

The time setting of each controller can be set in batch automatically.

## Versatility

- **Emergency stop function:** Air conditioner can be turned off through the external input control
- The stored data can be transferred via USB port
- CSV format data edited by PC can be imported to Touch Panel Controller.

## Specifications

Model name	UTY-DTGY
Power Supply	100-240V 50/60Hz, Single phase
Dimensions (H x W x D) (mm)	260 x 246 x 54
Weight (g)	2,150
Interface	USB 2.0

## Easy installation

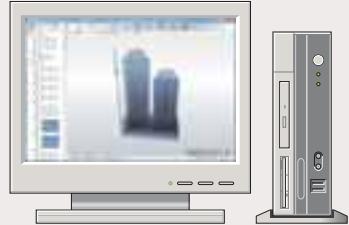

- Touch Panel Controller is easily mounted to the wall.
- Flat back surface allows to be installed wherever it is needed.
- No additional component is required for installation.

# Controller

**System Controller : UTY-APGX** Software

System Controller realizes the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1600 indoor units, and 400 outdoor units can be controlled.
- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

Max. controllable  
**4**  
VRF network systems

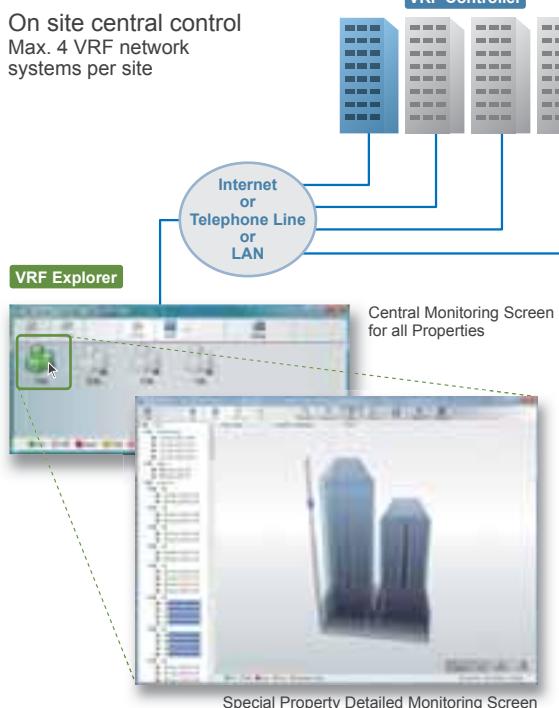

Max. controllable  
**400**  
outdoor units

Max. controllable  
**1,600**  
indoor units

## Remote centralized control

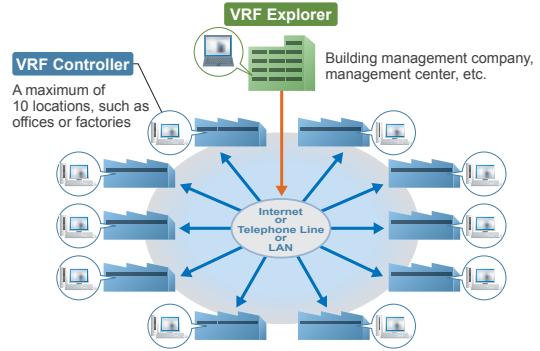

System Controller may be used on site or remotely over various networks for remote central control. System Controller requires

2 softwares working together. VRF Controller runs on site and communicate with VRF system. VRF Explorer runs remotely and provides user interface and communicate with the VRF Controller. VRF Controller and VRF Explorer program may run in a single PC or in different PCs separated by network. By using VRF Explorer software, one PC can perform central control of 10 VRF system sites with max. 20 buildings per site.

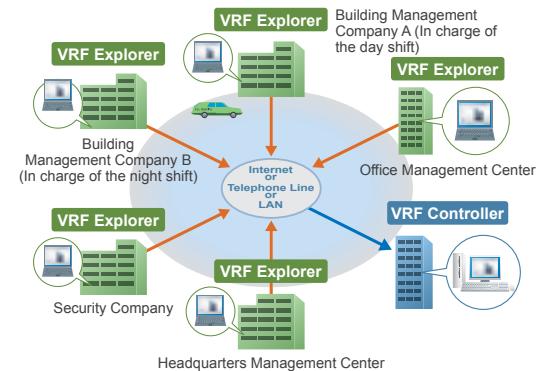

## Remote central control

1 VRF Explorer can control or monitor up to 10 sites.

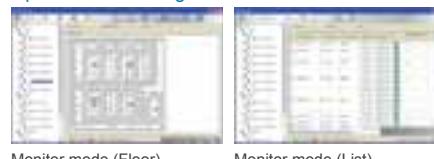

1 VRF Controller can be monitored from any number of VRF Explorers (Up to 5 connections simultaneously).

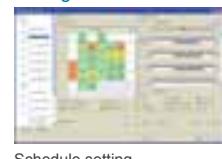

## User friendly view and operation

### Operation monitoring of each site

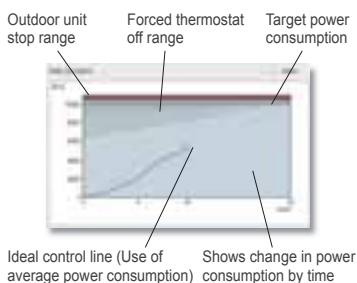

### Management functions

## Energy saving management Option UTY-PEGX:software

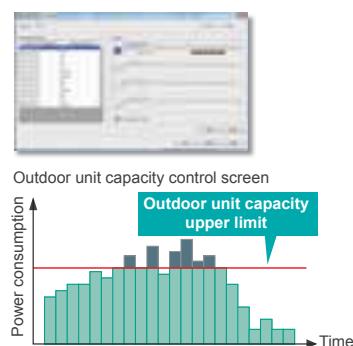

### Peak cut operation

Controls overall operation while maintaining comfort according to the overall power consumption target value.

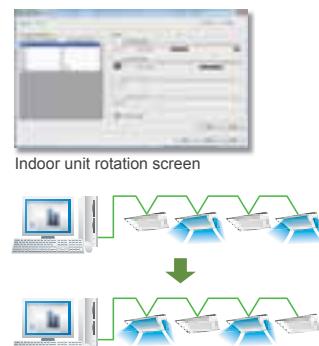

### Outdoor unit capacity save

Sets an upper limit of outdoor unit capacity and performs capacity save operation at peak times.

### Indoor unit rotation operation

Reduces annual power consumption by operating indoor units in rotation.

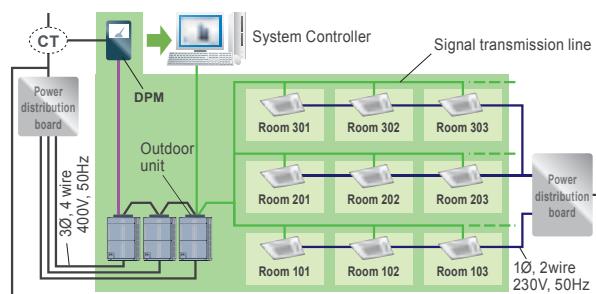

## Electricity charge apportionment

Apportions the power used by indoor and outdoor units and automatically calculates the electricity charge for each tenant. When you want to calculate the power used during a certain period in hotels, etc., computation linked with an electric meter is also possible. (Option)

### Others

- Batched stop
- Oprating & control record
- Error display & E-mail nitification
- Divers control of indoor units
- Schedule control
- Prohibition setting

Billing management for users for a set period Option of time, such as for hotels

### Personal computer specifications

Operating system	<ul style="list-style-type: none"> <li>• Microsoft® Windows® XP SP3 (32-bit) Professional (*1)</li> <li>• Microsoft® Windows® Vista® SP2 (32-bit) Home Premium, Business (*2)</li> <li>• Microsoft® Windows® 7 SP1 (32/64-bit) Home Premium, Professional (*2)</li> <li>• Microsoft® Windows® 8 (32/64-bit) Pro (*2)</li> </ul> <p>[Supported languages]</p> <p>(*1) English only (*2) English, Chinese, French, German, Russian, Spanish, and Polish</p>

Hardware required	DVD-ROM Drive

### <Option available>

Energy Saving Software	UTY-PEGX(*1)	Additional support for energy saving function and Electricity Charge Apportionment using electricity meter.
------------------------	--------------	---

### <Packing list>

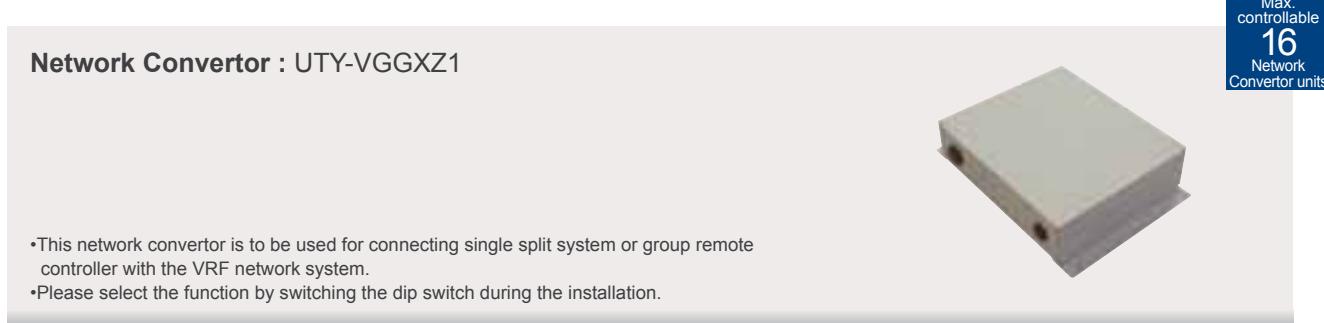

Name and shape	Quantity	Application
DVD-ROM	1	Includes the software and manuals for System Controller. Both VRF Controller and VRF Explorer software are included.
Wibu Key (Software protection key)	1	Software protection key to be inserted in a USB slot running System Controller. System Controller may only run on a PC with Wibu Key. However, Wibu key is not required for remote VRF Explorer software.

Personal computer must be field supplied. U10 USB Network Interface must be field supplied. Contact Echelon® Corporation or its local sales representative for detail.

Product Name : U10 USB Network Interface - TP/FT-10 Channel Model Number : 75010R

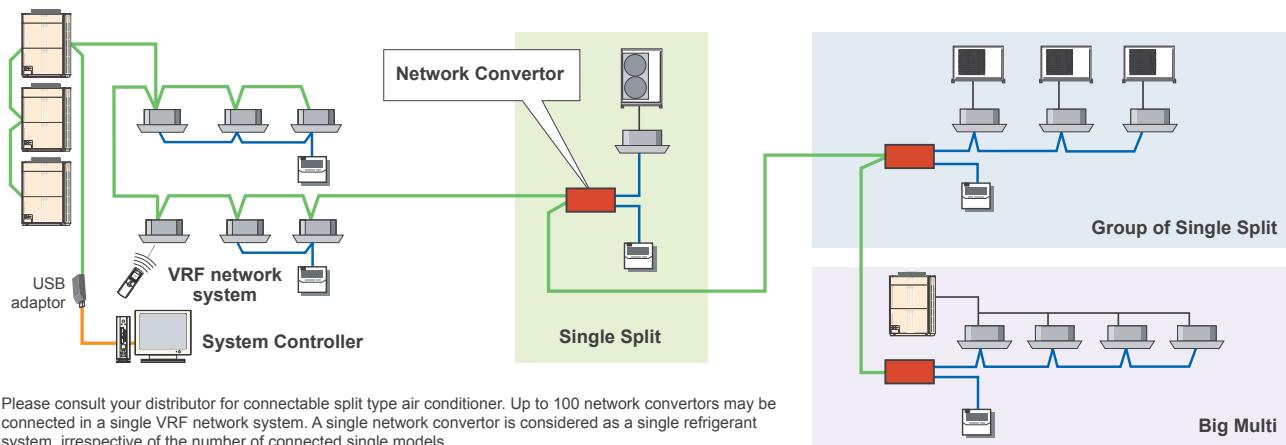

\*1: Energy Saving Software (UTY-PEGX) is available for the indoor units and the outdoor units after revision code B or later.

# Adaptor & Convertor

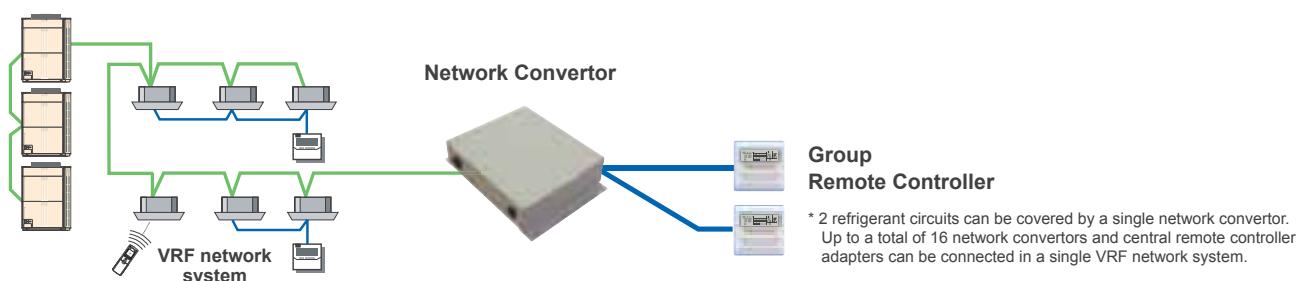

## Installation example

- Split type systems can be controlled from a central remote controller or PC controller through connection to the VRF's network convertor.
- Standard remote controller and central remote controller provide On / Off control, master control, temperature and fan control, etc.
- A single network convertor can be used to connect and control up to 16 single units.

## Used for connecting Group Remote Controller

4 group remote controllers can be connected to a single Network convertor.

## Specifications

Model name	UTY-VGGXZ1	UTY-VLGX
Power Supply	208-240V 50/60Hz, Single phase	208-240V 50/60Hz, Single phase
Power Consumption (W)	6.5	4.5
Dimensions (H x W x D) (mm)	67 x 288 x 211	67 x 288 x 211
Weight (g)	1,500	1,500

## Transmission specifications (BMS side)

Transmission speed	78 kbps
Transceiver	FT-X1 (Echelon® Corporation)
Transmission way form	Free topology
Terminal resistor	None (It attaches at the terminal of a network.)

## Network Convertor for LONWORKS® : UTY-VLGX

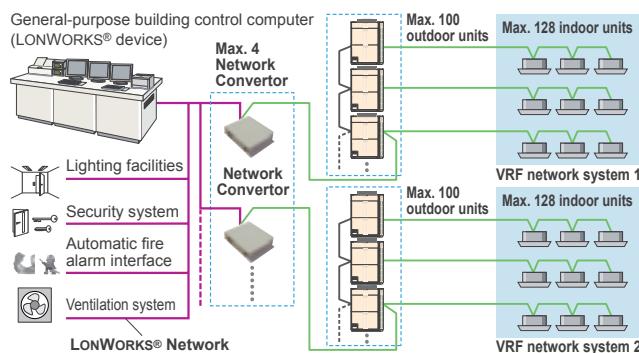

Max. controllable  
**4**  
Units to BMS

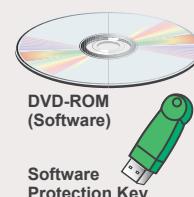

Max. controllable  
**128**  
indoor units

- For connection between VRF network system and a LONWORKS® open network for management of small to medium-sized BMS and VRF network system.
- The UTY-VLGX permits central monitoring and control of a VRF network system from a BMS through a LONWORKS® interface.
- Up to 128 Indoor units can be connected to one Network Convertor for LONWORKS®

## Installation example

## BACnet® Gateway : UTY-ABGX Software

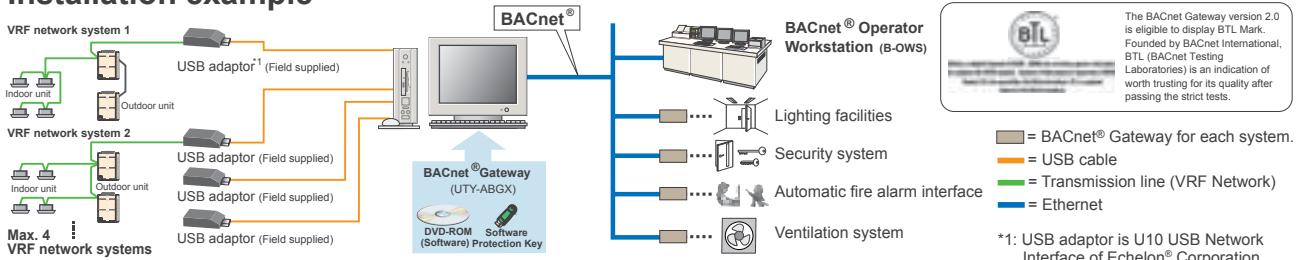

Max. controllable  
**4**  
VRF network systems

Max. controllable  
**400**  
outdoor units

Max. controllable  
**1,600**  
indoor units

- The VRF network system can be incorporated into a Building Management System.
- Enables central control of up to 1,600 indoor units through BACnet®, a global standard for open networks.
- Conforms to ANSI / ASHRAE Standards® 135-2004 BACnet® Application Specific Controller (B-ASC) BACnet® / IP over Ethernet.
- Connects up to 4 VRF network systems (1,600 indoor units / 400 outdoor units) per gateway.

## Installation example

## Personal computer specifications

Operating system	<ul style="list-style-type: none"> <li>Microsoft® Windows® XP SP3 (32-bit) Professional</li> <li>Microsoft® Windows® Vista® SP2 (32-bit) Home Premium, Business</li> <li>Microsoft® Windows® 7 SP1 (32/64-bit) Home Premium, Professional</li> <li>Microsoft® Windows® 8 (32/64-bit) Pro</li> </ul> <p>[Supported languages] English, Chinese, French, German, Russian, Spanish, and Polish</p>
CPU	Intel® Core™ i3 2GHz or higher
Memory	2GB or more (Windows® XP, Vista®, 7 32-bit), 4GB or more (Windows® 7 64-bit, Windows® 8)
HDD	40GB or more of free space
Display	1024 x 768 or higher resolution
Interface	USB port (x2-5) is required Ethernet port is required
Software required	Adobe® Reader® 9.0 or later
Hardware required	DVD-ROM Drive

## <Packing list>

Name and shape	Quantity	Application
DVD-ROM	1	Includes the software and manuals for BACnet® Gateway.
Wibu Key (Software protection key)	1	Software protection key to be inserted in a USB slot running BACnet® Gateway. BACnet® Gateway may only run on a PC with Wibu Key.

Personal computer must be field supplied. U10 USB Network Interface must be field supplied. Contact Echelon® Corporation or its local sales representative for detail.  
Product Name : U10 USB Network Interface - TP/FT-10 Channel Model Number : 75010R

# Adaptor & Convertor

## KNX Interface : FJ-RC-KNX-1i **NEW**

The KNX Interface allows a complete integration of air conditioners with KNX Network systems.

- Simple installation due to small and compact size.
- No separate external power supply required (just KNX bus power).
- Can be used for single indoor units and group controlled (up to 16) indoor units

### KNX Network

Home Controller

Lighting facilities

Security system

Automatic fire alarm interface

Windows bind

The KNX Interface can be used with or without Wired Remote Controller.

or

Split Indoor unit

## Modbus Interface : FJ-RC-MBS-1 **NEW**

The Modbus Interface allows a complete integration of air conditioners into Modbus Networks.

- Simple installation due to small and compact size.
- No separate external power supply required.
- The Modbus Interface permits central monitoring and control of air conditioners from BMS, .

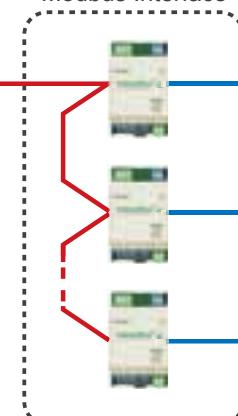

### Modbus Network

BMS/Central Controller

Max. 63  
Modbus Interface

The Modbus Interface can be used with or without Wired Remote Controller.

VRF Indoor unit

VRF Indoor unit

Split Indoor unit

## Specifications

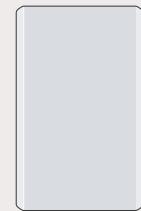

Model name	FJ-RC-MBS-1
Consumption Current	80mA
Dimensions (H x W x D) (mm)	93x53x58
Weight (g)	85

Model name	FJ-RC-KNX-1i
Power source	29V DC, 7mA Supplied through KNX bus.
Dimensions (H x W x D) (mm)	70x70x28
Weight (g)	70

## External Switch Controller : UTY-TEKX

Air conditioner switching can be controlled by connecting other sensor switches

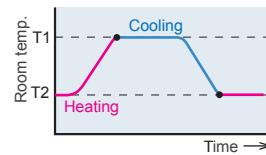

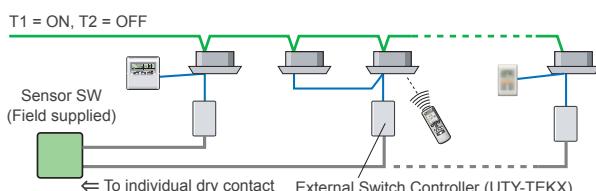

- In combination with a field supply Card-Key Switch or other sensor, the External Switch Controller allows control of the ON / OFF, Room temperature, Fan speed and Master control functions. This makes this product suitable for installations such as hotel rooms.
- Card-key or other sensor switches are available as a field supplied parts.

## Installation example

Auto mode operation, which switches the cooling and the heating automatically, is enabled by using the sensor switch and External Switch Controller.

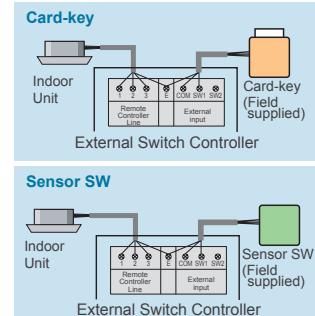

Note: All indoor units will operate in the same mode.

Note 1.  
Please choose a thermosensor switch which can be set up for T1 and T2.

Note 2.  
The remote controller's operation is prior to the auto mode operation.

## Electrical wiring

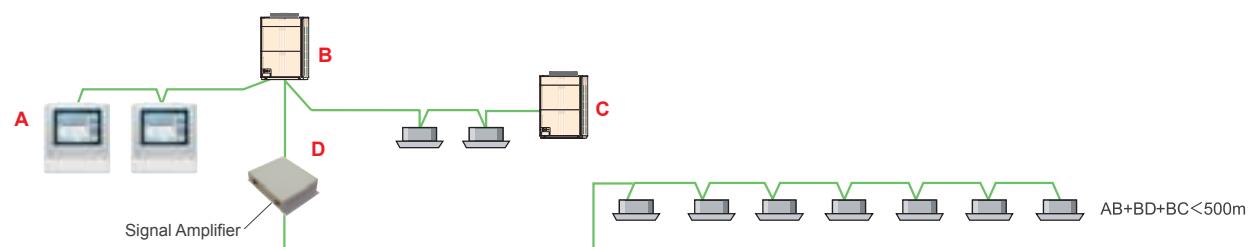

## Signal Amplifier : UTY-VSGXZ1

- Transmission Line length can be extended up to 3,600m with multiple Signal Amplifiers.
- Up to 8 signal amplifiers can be installed in a VRF network system.
- A signal amplifier is required,
  - When the total wiring length of the transmission line exceeds 500m.
  - When the total number of units on the transmission line exceeds 64.

## Installation example

## Specifications

	UTY-VSGXZ1
Model name	UTY-VSGXZ1
Power Supply	208-240V 50/60Hz, Single phase
Power Consumption (W)	4.5
Dimensions (H x W x D) (mm)	67 x 288 x 211
Weight (g)	1,500

	UTY-TEKX
Power Supply	DC 12V
Dimensions (H x W x D) (mm)	120 x 75 x 30
Weight (g)	100

DC12V is supplied by the indoor unit.

# Service & Maintenance

**Service Tool : UTY-ASGX** Software

Extensive monitoring and analysis functions for installation and maintenance

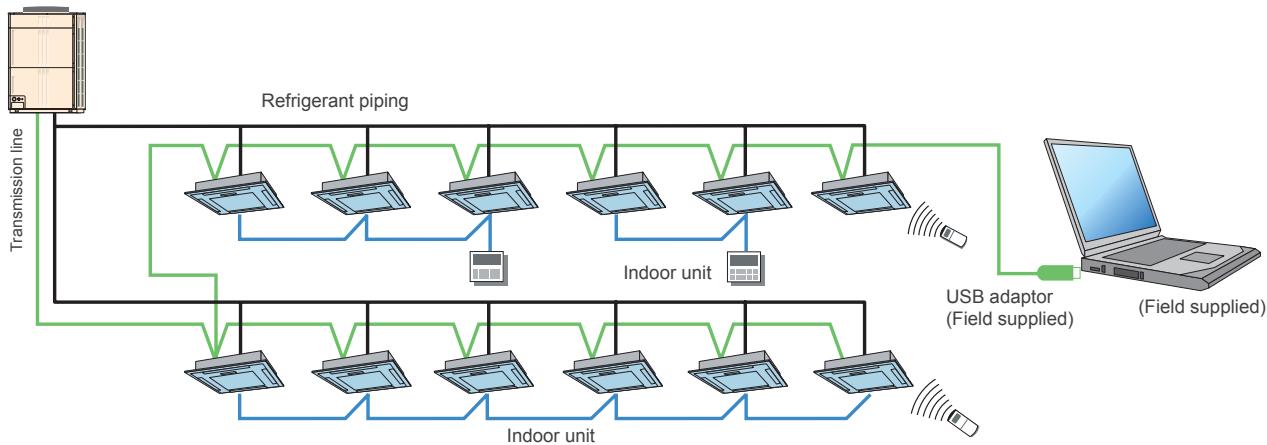

- Operation status can be checked and analyzed to detect even the smallest abnormalities
- Storage of data on system operation status on a PC allows access even from off site.
- Up to 400 indoor units (a single VRF network system) can be controlled and monitored for large scale buildings or hotels
- This software can be connected to any point of transmission line with USB adaptor (field supplied).

Max. Monitor and control  
400 indoor units

Max. Monitor and control  
100 outdoor units

## Web Monitoring Tool : UTY-AMGX Software

VRF network system can be supported  
**4**

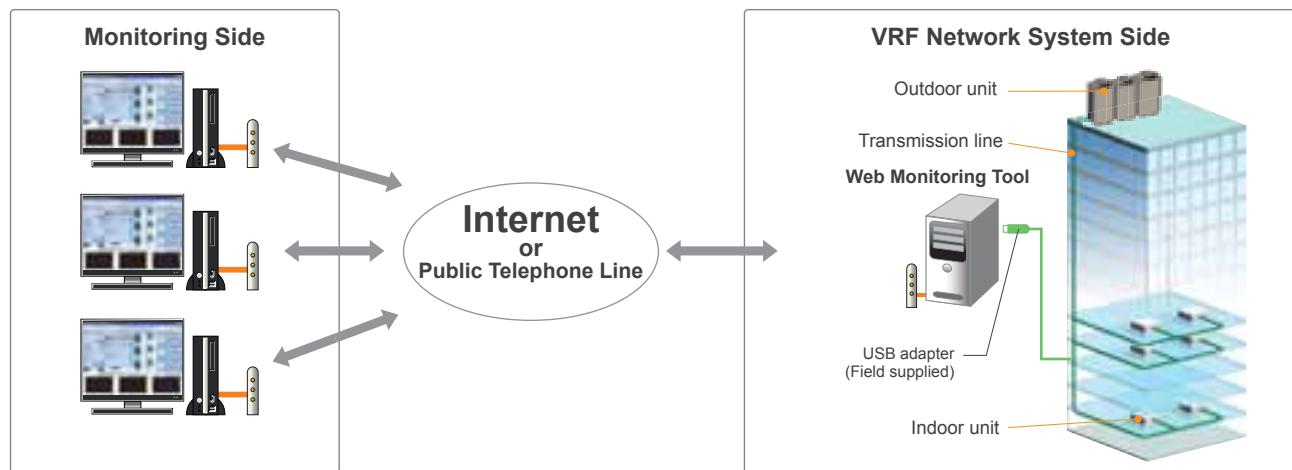

**1,600**  
indoor units  
can be  
supported

### Product features

- Troubleshooting is performed by monitoring each air conditioning unit remotely during periodical system checks.
- Error notification can be automatically transmitted to several locations using the internet\*1.
- Requires either a dedicated internet connection or public telephone line.
- Determination of an error occurrence can be made through error warnings and equipment status information obtained from a remote location.
- The monitoring data in a remote side can be optionally downloaded. And, this data can be displayed in offline mode of the service tool.
- Monitoring side computer is not required to install special software, requires only general web browser.

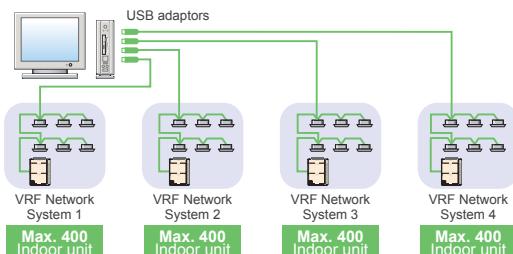

\*1: Use of internet mail system required.

## Web Monitoring System

## Support 4 VRF network systems

USB adaptor (max. 4 adaptors per PC) permit, monitoring of up to 1,600 indoor units.  
Suitable for large-scale buildings or hotels.

## Suppresses indoor temperature changes while providing fresh air

High efficiency and low noise are achieved using a highly efficient element. Comfortable air-conditioned environment is provided by effectively determining whether to use heat-exchange ventilation or normal ventilation while meeting diverse needs.

# Energy Recovery Ventilator

### **Energy saving ventilation**

Thanks to efficient recovery of thermal energy lost during Ventilation, you can save an air-conditioning fee.

### **Facility saving**

Thanks to a drastic reduction of load incurred by outside air, you can make air-conditioners more compact in parallel with the recovery of thermal energy.

### **Humidity adjusting effect**

In a cooling mode, a highly humid open-air is brought near to a dehumidified room atmosphere and then supplied.

In a heating mode, a room humidity is transferred to the dry outside air and then supplied.

### **Sound shield effect**

The ducts of the unit and the heat exchange element are characteristic of sound shield effect, so that the office and store environment can be preserved.

# Energy Recovery Ventilator

UTZ-BD025B / UTZ-BD035B / UTZ-BD050B / UTZ-BD080B / UTZ-BD100B **NEW**

Energy recovery ventilator unit offers maximum comfort and greater energy savings.

UTZ-BD025B

UTZ-BD035B

UTZ-BD050B

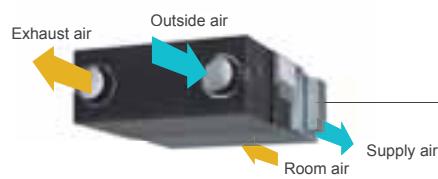

UTZ-BD080B

UTZ-BD100B

## Features

**Adopts a highly efficient counter-flow heat exchange element**

## Heat exchange ventilation and normal ventilation

### Heat exchange ventilation

When a room is cooled or heated, the exhausted cooling / heating energy is recovered by heat-exchange ventilation.

### Normal ventilation

This is used in the spring and autumn, when rooms are not cooled or heated, that is, when there is little difference between the indoor and outdoor air conditions. In addition, at night during the hot season, when the outside air temperature drops the outside air is drawn inside without heat exchange, alleviating the load on the air conditioning equipment.

## High Efficiency

### Energy efficiency and ecology

Energy consumption is dramatically reduced by using a counter-flow heat-exchange element. Air conditioning load is reduced by approximately 20%, resulting in significant energy savings. Recovers up to 77% of the heat in the outgoing air.

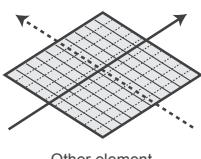

**20%**  
Energy saving

## More Comfort

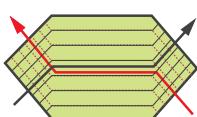

### Quiet operation

Significantly reducing low pressure loss and noise allows low-noise operation.

### Features of heat exchange element

Other element  
(Cross-flow element)

Fujitsu element  
(Counter-flow element)

With the cross-flow element, air moves in a straight line across the element. With the counter-flow element, air flows through the element for a longer time (longer distance), so the heat-exchange effect remains unchanged.

## Design Flexibility

### Extended range of an external static pressure

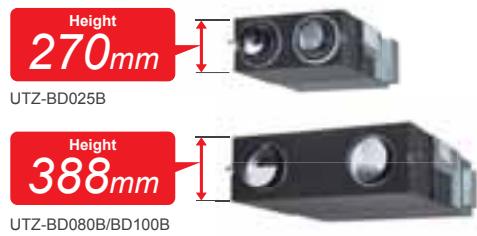

An external static pressure is improved by adopting a powerful fan motor. This allows for application in a wide variety of buildings.

## Features

# Easy Installation and Maintenance

## Slim shape and easier installation

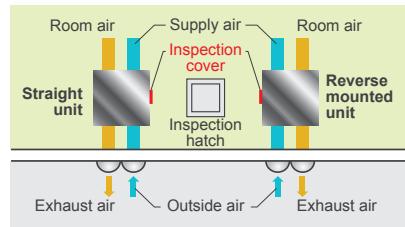

Counter-flow heat exchange element used for reduced noise and slimmer, more compact body shape.

## Reverse mountable direct air supply / exhaust system

Adoption of straight air supply / exhaust system: Duct design is simplified because the air supply / exhaust ducts are straight.

Since each unit can be mounted in reverse position, only one inspection hole is needed for two units: Two units can share one inspection hole so duct work is easier and more flexible.

**WATERSTAGE™** makes an Economical and Clean hot water heating system by Heat Pump

**Complete Solution meets various needs**

The clean energy produced by **WATERSTAGE™** reliably delivers "comfort" to all spaces in the home up to the living room, bedrooms, bath and swimming pool.

## AIR TO WATER

**156** Split

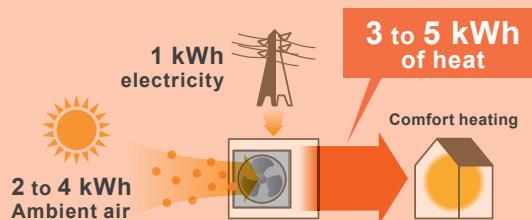

**157** Split DHW integrated

**158** Monobloc

### WHAT'S A HEAT PUMP ?

Absorbing free energy from the atmosphere.

Heat pump system requires only 1kW of electricity to generate 3 to 5 kW thermal energy.

**WATERSTAGE™**

# Split type

## High power series

Hydraulic unit : WSYK140DC6 / [3phase] WSYK160DC9

Outdoor unit : WOYG112LCT / WOYG140LCT

[3phase] WOYK112LCT / WOYK140LCT / WOYK160LCT

## NEW Comfort series

Hydraulic unit : WSYA050DD6 / WSYA100DD6

Outdoor unit : WOYA060LDC / WOYA080LDC / WOYA100LDT

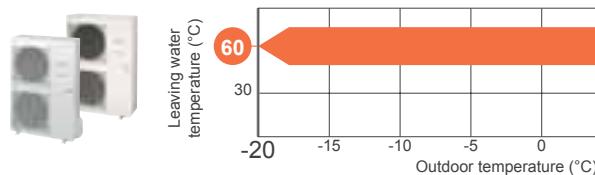

## Features

### High Efficiency & Comfort

#### High leaving water temperature

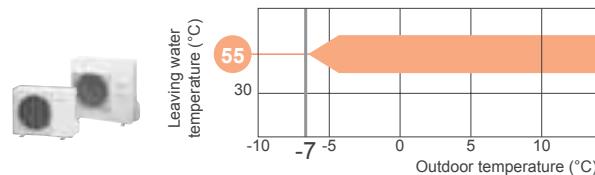

**High power series** : High leaving water temperature of 60°C is kept even when outdoor temperature is down to -20°C without using backup heaters.

At -20°C outdoor temperature : 60°C Hot water

**Comfort series** : Maximum leaving water temperature is 55°C without backup heater. Hot water supply temperature can be maintained even at -7°C outdoor temperature.

At -7°C outdoor temperature : 55°C Hot water

\* If you want to raise the hot water supply temperature, backup heaters can be used for auxiliary operation.

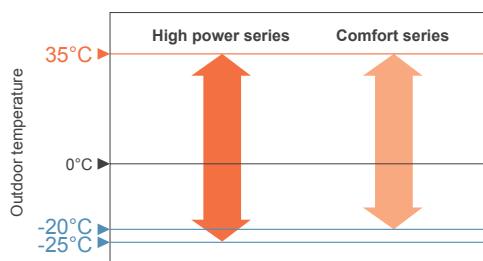

#### High COP

Air to water heat pumps work with much more efficiency and save more energy than a traditional heating system.

\*The data refer to 16kW type Condition : Outdoor Temp. 7°C Heating Temp. 35°C.

#### Wide operation range

# Split DHW Integrated type

## NEW High power series

Hydraulic unit : WGYG140DD6 / [3phase] WGYK160DD9

Outdoor unit : WOYG112LCT / WOYG140LCT

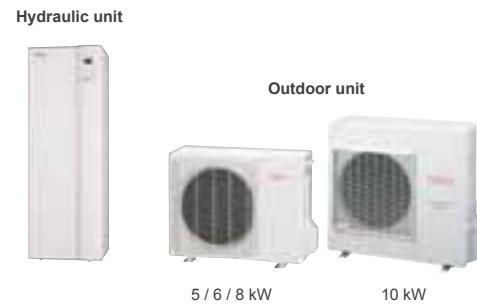

[3phase] WOYK112LCT / WOYK140LCT / WOYK160LCT

## NEW Comfort series

Hydraulic unit : WGYA050DD6 / WGYA100DD6

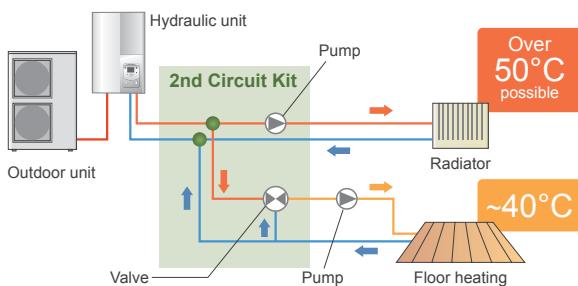

Outdoor unit : WOYA060LDC / WOYA080LDC / WOYA100LDT

## Intelligent Control

### 2 Zone individual control\*

2 Zone individual control (2 under floor heating zones or under floor heating + radiator zone, etc.)\*

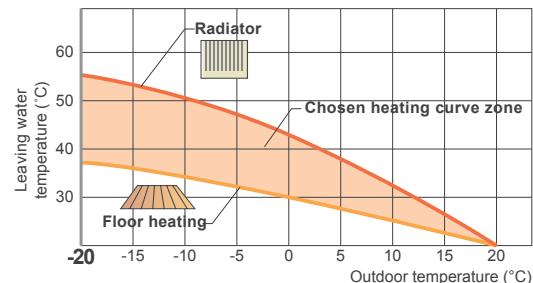

\*Optional parts are required.

### Automatic heating curve control

Automatic temperature regulation in accordance with heating curve  
(Depends on heating terminal and outdoor temperature)

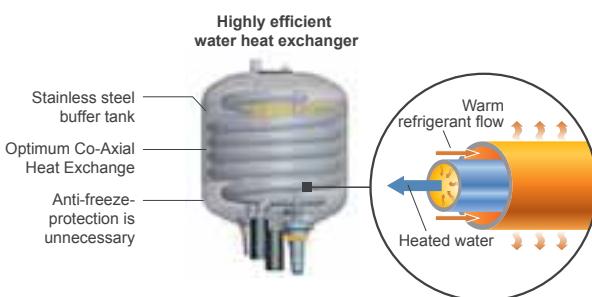

#### Automatic temperature control with heating curve

## High Reliability

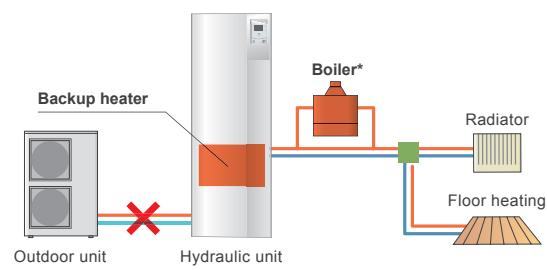

### High durability

- Corrosion protected
- No flow switch and no filter necessary

### Emergency operation

System can continuously supply hot water by built in back up heater or boiler, as emergency, even if an error has occurred.

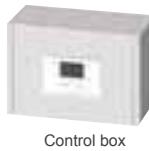

\*When additional boiler is connected

# Monobloc type

## Compact series

Monobloc unit : WPY-A080LA / WPY-A100LA

Control box : UTW-SCBYA

Control box

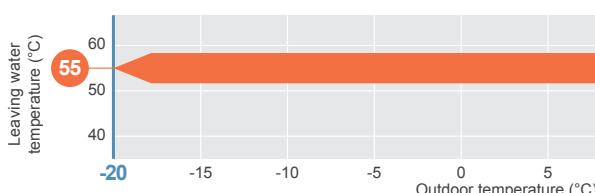

## Features

### Compact & High Performance

#### High leaving water temperature

High leaving water temperature of 55°C is kept even when outdoor temperature is down to -20°C without using backup heaters.

#### High COP

High COP is realized by using a DC twin rotary compressor, inverter technology, and high efficient water heat exchanger.

\*Condition : Outdoor Temp. 7°C Heating Temp. 35°C.

#### Compact & light weight design

### Intelligent Control

**Wired remote controller (control box) is adopted as standard.**

Control box

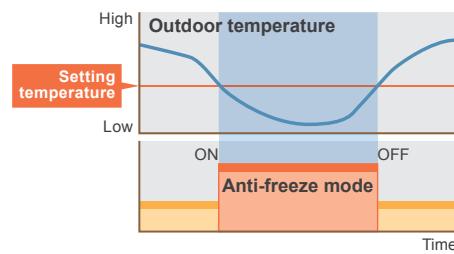

#### And more

- Automatic heating curve control
- Cooling operation is possible
- Anti-Legionella function
- Possible to docking the boiler or electric heater for backup (Field supplied)

### High Reliability

#### Anti-freeze function

Water circulation and compression can be automatically performed at low outdoor temperature. Freezing of circulated water can be prevented.

#### Easy installation & maintenance

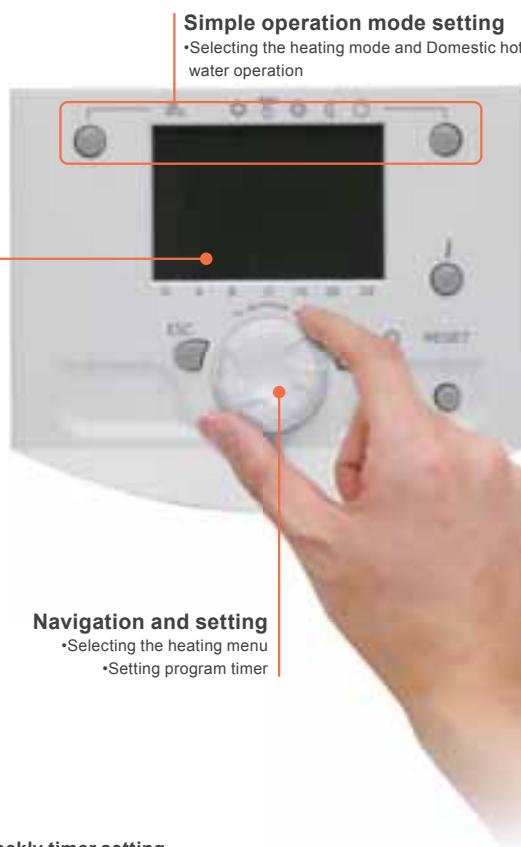

- No installation of refrigerant circuit connections.
- Easy access for maintenance operations

# Smart & Comfort Control

## Comfort

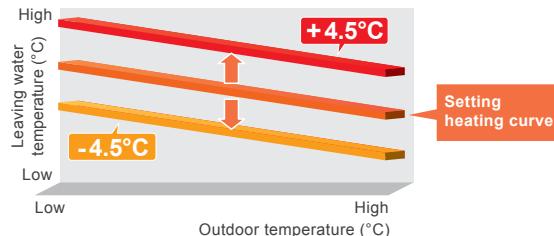

**Large LCD display**  
• Operation status display  
• Error display  
• Plain text

### Automatic heating curve operation

Automatic heating curve control based on outdoor temperature and setting room temperature.

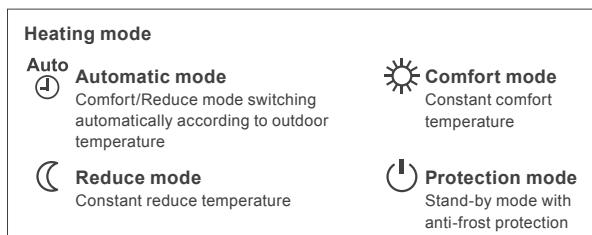

This can be adjusted when too warm or too cold.

## Energy Saving

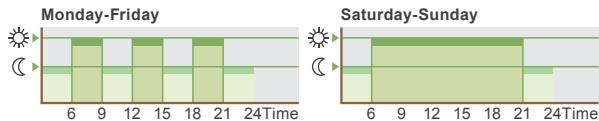

### Programmable timer

- The setting of timer operation can easily be adjusted.
- Changing the heating mode linked with time is possible.

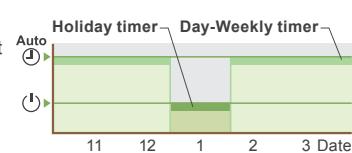

### Day-Weekly timer setting

- The day-weekly timer can be set up for up to 3 times per day.
- Allows separate settings for each day of the week.

### Holiday timer setting

- The holiday timer can be set up for up to 8 periods.
- If you are absent for a long time in the winter, freezing of room can be prevented.

## Safety Function

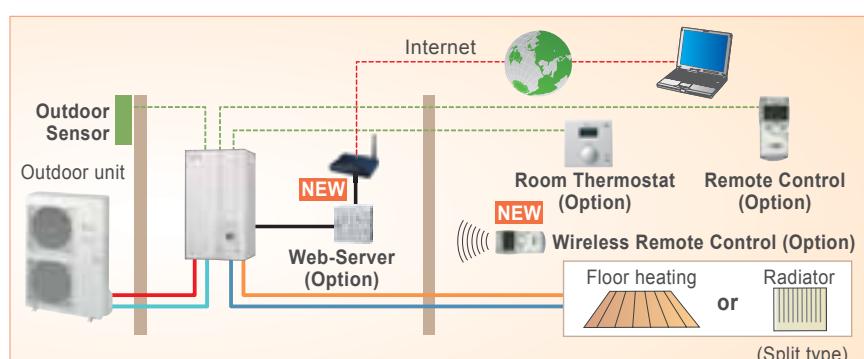

### Auto-changeover

If the cooling operation function is set, the system can automatically switch to cooling or heating, depending on the outdoor temperature to provide all-season comfortable air conditioner.

## Extendibility

### Remote control-extension

Various remote controls are available on your hands. Remote control is also available via Web. All kinds of life styles are supported.

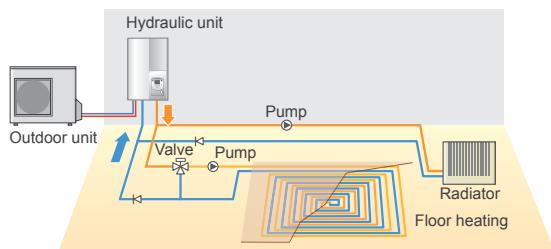

# Case studies

## Split Case studies

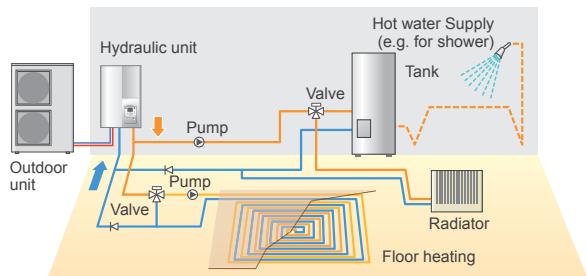

### 2 emitter simultaneous heating (Individual control)

Floor heating + Radiator

### 3 types of heat distribution

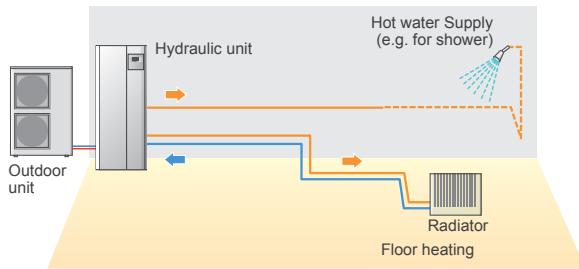

Floor heating + Radiator + Domestic Hot Water

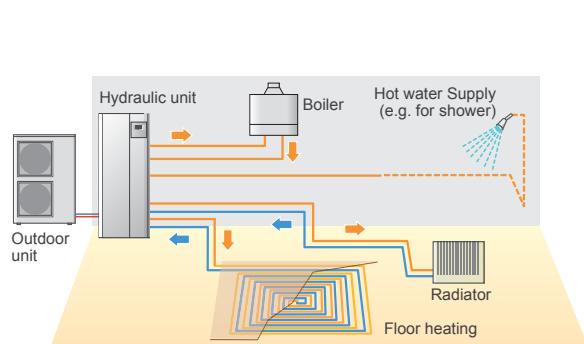

## Split DHW integrated Case studies

### Single heating & Domestic Hot Water

Radiator + Domestic Hot Water

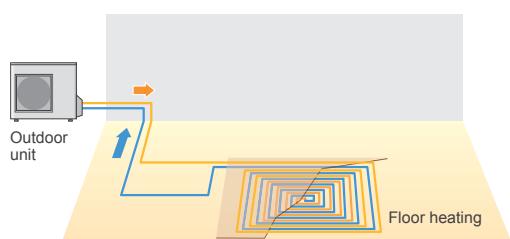

### Boiler connected to heating (Boiler + Heating) & Domestic Hot Water

## Monobloc Case studies

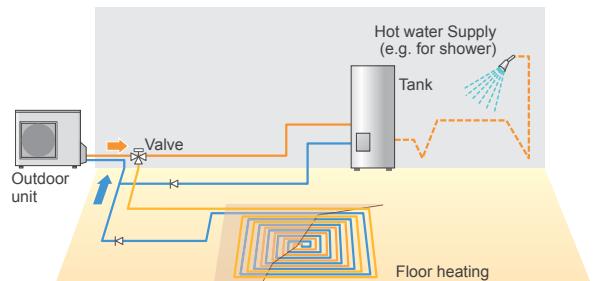

### Single heating system

Floor heating

### 2 types of heat distribution

Floor heating + Domestic Hot Water

\*1 : DHW operation is possible without DHW Kit and DHW Tank.

\*2 : Cooling operation is possible without Cooling Kit.

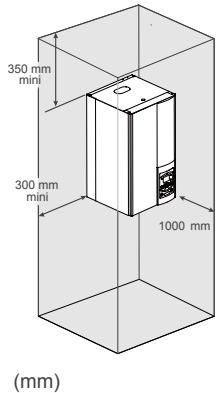

\*3 : UTW-KL1XD is required for connection.

\*4 : UTW-KSTXD (OCI700 adapter), UTW-KW1XD or UTW-KW4XD is required for connection

# Installation Limitations

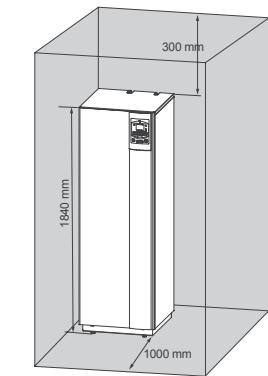

## Equipment Installation

### Split Type Hydraulic unit

- Hydraulic unit should be hung on the wall
- Weight < 60kg (including water)
- Space for maintenance should be respected

### Split DHW integrated Type Hydraulic unit

- Floor stand
- Weight: 366kg (including water)
- Space for maintenance should be respected.

\*1. The values of heating capacity/power input/COP are based on measurement of EN14511 standard. Usage environment, such as operation of the heating equipment, room temperature, and controller adjustments, may cause disparities between practically determined values and spec. values and these values.

\*2. Sound pressure level measured at distance of 1m from the device.

# FEATURE EXPLANATION

## Comfortable function

### Human sensor

Human sensor catches movements of people in a room.

### Up / down swing flaps

The up/down flaps automatically swing up and down.

### Double swing automatic

Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

### Automatic air flow adjustment

The micro-computer automatically adjusts the air flow effectively to follow the changes of room temperature.

### Auto restart

In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.

### Auto-changeover

The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.

### 10°C HEAT operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

### Connectable distributing duct

### Connectable fresh air duct

### Fresh air intake

Fresh air can be taken in by a fan which can be connected using external control unit.

### Economy mode

Limits the maximum operation current, and performs operation with the power consumption suppressed.

### Powerful mode

Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.

### Low Noise Mode

Sound noise level of outdoor unit can be selected.

### V-PAM control models

### i-PAM control models

## Convenient function

### Sleep timer

The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

### Program timer

This digital timer allows selection of one of four options: ON, OFF, ON→OFF or OFF→ON.

### Weekly timer

Different on-off times can be set for each day.

### Weekly + setback timer

Weekly + Setback timer can set temperature for two times spans and for each day of the week.

### Filter sign

Indicates the filter cleaning period by lamp.

## Clean function

### Long-life ion deodorization filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by ultra-fine-particle ceramic.

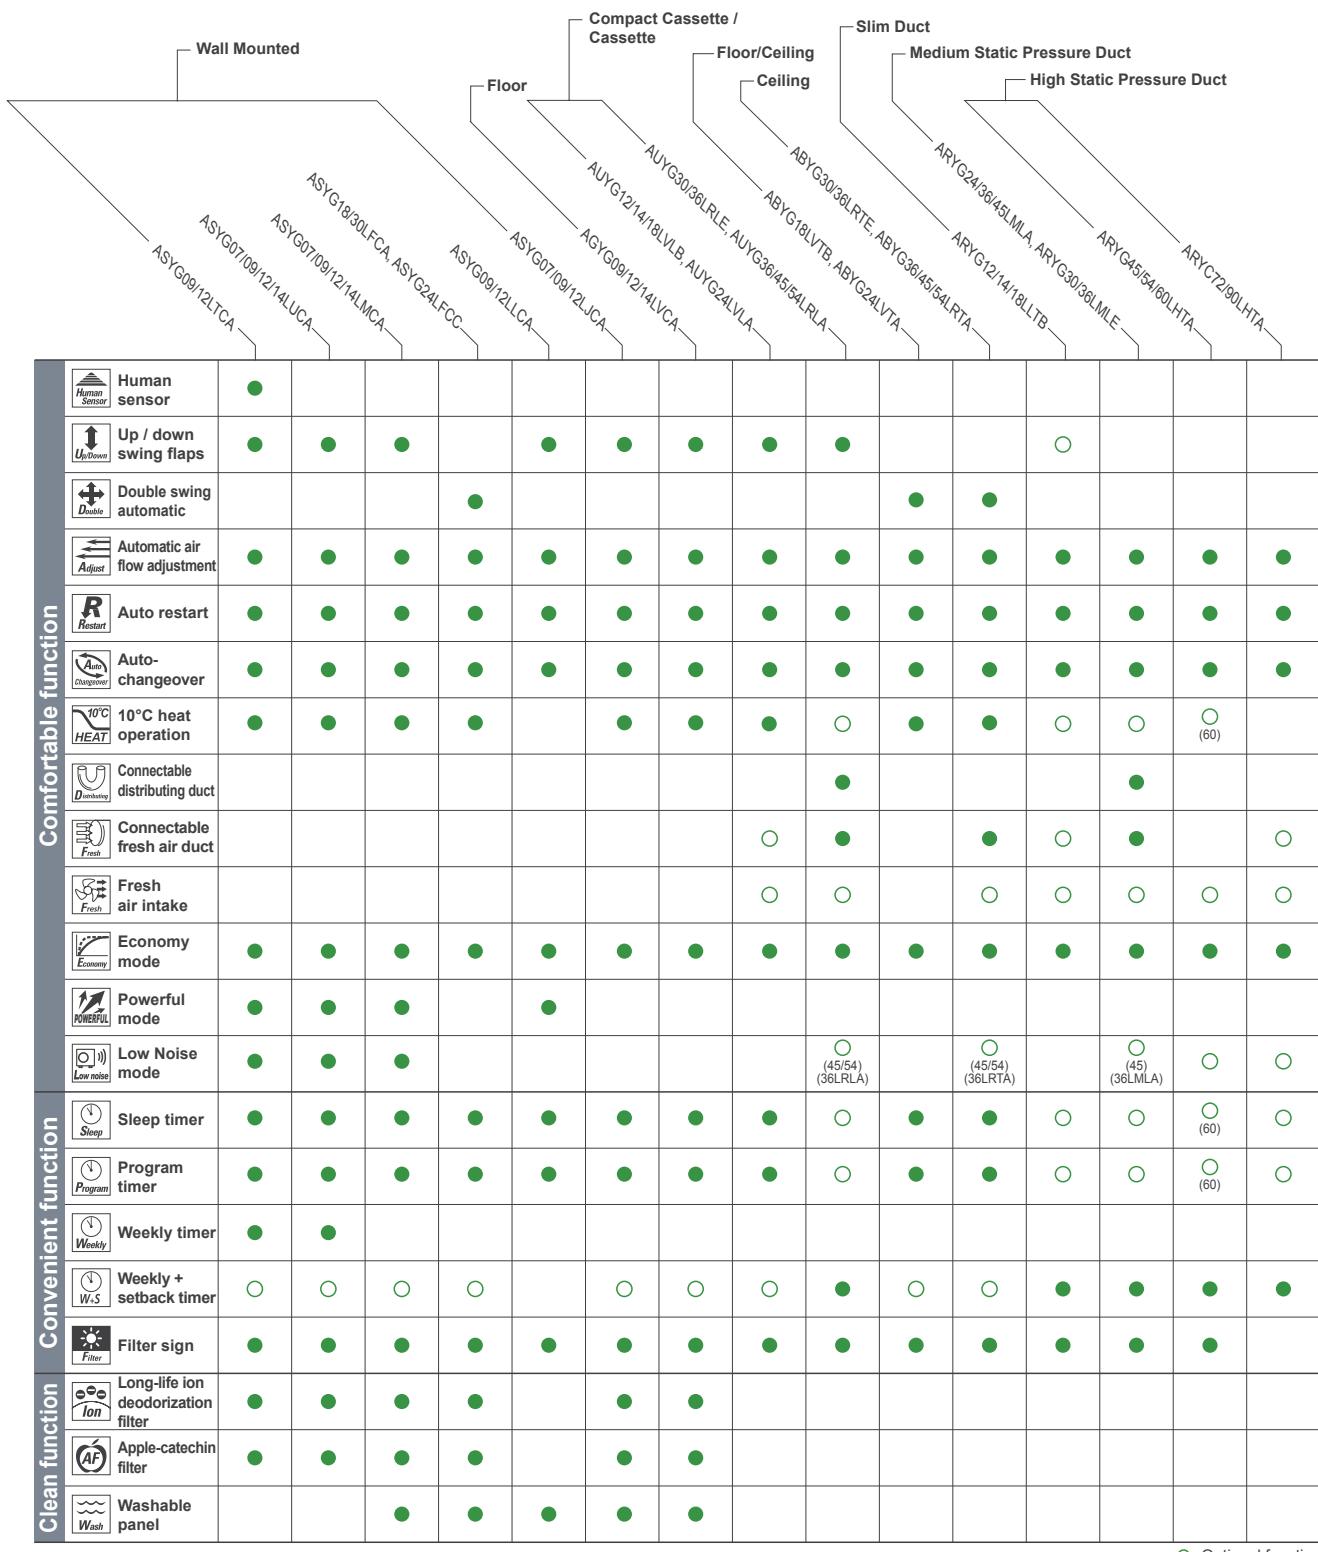

### Apple-catechin filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed into the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

### Washable panel

## Notice for specifications

I.U.=Indoor Unit    O.U.=Outdoor Unit    Qu=Quiet    \* =Not decided yet

- Specifications and design are subject to change without notice for future improvement.
- For further details, please check with our authorised dealer.
- Cooling/Heating capacities are based on the following conditions.

Cooling	Indoor temp. : 27°C DB/19°C WB Outdoor temp. : 35°C DB/24°C WB	Heating	Indoor temp. : 20°C DB/15°C WB Outdoor temp. : 7°C DB/6°C WB
---------	---	---------	---

- Performance test is in accordance with EN14511
- Seasonal efficiency test is on accordance with EN14825
- Sound power test is in accordance with ENV12102
